

Experimental Psychology

AN INTRODUCTION

LEO POSTMAN
and
JAMES P. EGAN

CONTENTS

PREFACE	xiii
1. THE SCOPE OF EXPERIMENTAL PSYCHOLOGY	1
Experimental Psychology as Method—Stimuli and Responses as Variables—Experimental Control of Variables—Description and Explanation—Forms of Behavior Studied in Experimental Psychology	
2. THE PSYCHOPHYSICAL METHODS	9
The Basic Problems of Psychophysics—The Basic Concepts of Psychophysics—Experimental and Quantitative Methods in Psychophysics—Methods for Measuring the Absolute Threshold—Methods for Measuring the Differential Threshold—The Method of Average Error—The Judgment of Intervals—Comparison of Experimental Procedures	
3. CUTANEOUS SENSITIVITY	33
The Pressure Sense—The Pain Sense—The Temperature Senses—Cutaneous Receptors—Experiment I—Experiment II	
4. AUDITION	51
The Physical Dimensions of the Auditory Stimulus—Auditory Discrimination—Attributes of Auditory Experience—Physiological Basis of Pitch and Loudness—Beats, Difference Tones, and Masking—Aural Harmonics—Localization of Sounds—Auditory Fatigue—Speech, Hearing, and Communication—Special Problems of Control in Auditory Experiments—Experiment III—Experiment IV	
5. SMELL AND TASTE	85
Smell—Taste—The Common Chemical Sense—Experiment V	

6.	VISION	105
	The Visual Stimulus—The Dimensions of Color—Stimulus Mixture—Afterimages—Dark Adaptation—Light Adaptation—Visual Acuity—Spatial and Temporal Summation—The Duplicity Theory—Special Problems of Control in Visual Experiments—Experiment VI—Experiment VII	
7.	PERCEPTION OF COLOR	146
	Modes of Appearance of Colors—The Color of Objects—Color Constancy—Color Contrast—Experiment VIII—Experiment IX	
8.	PERCEPTION OF FORM	162
	Figure and Ground—Perceptual Grouping—Form Constancy—Geometrical Illusions—Experiment X—Experiment XI	
9.	PERCEPTION OF SPACE	177
	Sensory Systems in Space Perception—Basic Visual Conditions—The Spatial Framework—The Perception of Distance—The Perception of Size—Experiment XII—Experiment XIII	
10.	PERCEPTION OF MOVEMENT	206
	Physical Movement and Perceived Movement—Perception of a Moving Stimulus—Apparent Movement in the Absence of Physical Movement—Auditory and Tactile Stimuli to Perceived Movement—Autokinetic and Induced Movement—Experiment XIV	
11.	EXPERIMENTAL ANALYSIS OF JUDGMENT	217
	The Tasks of Analysis—Types of Judgment—The Expression of Judgments—Stimulus Scales and Response Scales—Some General Principles of Judgment—Reliability and Validity of Judgments—Experiment XV—Experiment XVI	
12.	REACTION TIME AND ASSOCIATION	239
	Reaction Time: Reaction Time, Judgment Time, and Latency—Standard Apparatus in Reaction-Time Ex-	

CONTENTS

periments—The Determinants of Reaction Time—Association Experiments—Experiment XVII—Experiment XVIII

ix

13. MEASUREMENT OF LEARNING

Definition of Basic Terms—Types of Learning—Measurement of Learning—Learning Curves

275

14. CONDITIONING

A Typical Conditioning Experiment—The Main Concepts of Conditioning—The Main Parameters of Conditioning Experiments—Secondary Determinants—Types of Conditioning Experiments—Conditioning an Instrumental Response—Quantitative Methods in Conditioning—Special Problems of Control in Conditioning Experiments—Experiment XIX.

287

15. EXPERIMENTAL STUDY OF HUMAN LEARNING

Methods of Practice—The Basic Variables in Learning Experiments—Performance as a Function of What Is Learned—Performance as a Function of How Learning Proceeds—Individual Differences Among Learners—Special Problems of Control in Learning Experiments—Experiment XX—Experiment XXI

312

16. RETENTION AND FORGETTING—I

The Measurement of Retention—The Temporal Course of Forgetting—The Determinants of the Rate of Forgetting—Retention as a Function of the Conditions of Learning—Retention as a Function of Interpolated Activity: Retroactive Inhibition—Retention as a Function of the Test Situation—Reminiscence—Experiment XXII—Experiment XXIII

352

17. RETENTION AND FORGETTING—II: QUALITATIVE CHANGES

The Process of Memory Change—The Method of Successive Reproduction—Comparison of Successive and Single Recalls—The Method of Serial Reproduction—The Continuity of Perception, Memory, and Report—

395

CONTENTS

Memory Changes and Testimony and Rumor—Experiment XXIV

18. TRANSFER OF TRAINING 418
Types of Transfer—Design of Transfer Experiments—
What Is Transferred in Transfer of Training—The Ex-
perimental Analysis of Transfer—Cross-Education—
Experiment XXV—Experiment XXVI
19. EMOTIONAL BEHAVIOR 445
The Nature of Emotional States—Differentiation of
Emotional States—Some Measures of Physiological
Change in Emotion—Facial Expression of Emotions—
Experiment XXVII—Experiment XXVIII
20. BEHAVIOR IN SOCIAL SITUATIONS 463
The Formation of Norms—Suggestion and Suggestibil-
ity—The Determinants of Suggestibility—Work in a
Group Situation—Experiment XXIX—Experiment XXX
- NAME INDEX 501
- SUBJECT INDEX 507

LIST OF EXPERIMENTS

I. Demonstration of Thermal Adaptation	46
II. Mapping Cutaneous Sense Spots	47
III. The Threshold of Hearing	78
IV. Masking	80
V. Olfactory and Gustatory Sensitivity	102
VI. Stimulus Mixture	139
VII. Visual Acuity	141
VIII. Color Constancy	159
IX. Demonstration of Achromatic and Chromatic Contrast	160
X. Perceptual Grouping	172
XI. Form Constancy	174
XII. Discrimination of Visual Depth	200
XIII. Size Constancy	202
XIV. Apparent Movement	214
XV. The Anchoring of a Response Scale	231
XVI. Judgment Time as a Measure of Difficulty of Decision	234
XVII. Simple and Disjunctive Reaction Time	268
XVIII. Detection of Guilt Through Word Association	270
XIX. Conditioned Hand Withdrawal	305
XX. Serial Position Effects Under Massed and Distributed Practice	341

PREFACE

that would be required for adequate documentation. There are, moreover, many facts and principles which have been fully established and accepted into the body of psychological knowledge and which need no longer be identified with any single source. We have, therefore, adopted the practice of most of the elementary textbooks in psychology and have confined ourselves principally to selected references at the end of each chapter.

In writing this text we have at times leaned heavily upon the more advanced treatises and handbooks. We shall not try to enumerate these sources. Our indebtedness to specific men and their works will be obvious.

We are grateful to the editor of this series, Professor Gardner Murphy, for his help and encouragement. We are indebted to William F. John who labored patiently over many of the illustrations. Elizabeth Egan kindly helped in the preparation of the manuscript. Lorraine Lerman helped to read the proof. Our most faithful and patient helper in the preparation of the manuscript was Dorothy L. Postman. Without her efforts, it would have been difficult indeed to complete this book.

Many publishers and authors have kindly consented to the reproduction of original material. We are greatly indebted to them for their courtesy. Specific acknowledgments appear in the text.
