Mechanisms	143
Eye Movements	150
Color Vision	153
Sensory Experience	158
Form Perception	161
Complex Perceptual Processes	167
Other Perceptual Systems	172
Summary	183
Chapter Review	184
Suggestions for Further Reading	185

6 Development 186

The First Nine Months	189
Pregnancy	192
The Birth Process	194
The Newborn	196
Infancy and Childhood	199
Intellectual Development	204
Social Development	214
Adolescence	217
Adulthood	220
Aging	222
Dying: The Final Stage	228
Summary	230
Chapter Review	231
Suggestions for Further Reading	232

7 Language and Intelligence 234

Language	238
Intelligence	252
Mental Retardation	264
Summary	270
Chapter Review	271
Suggestions for Further Reading	272

8 Cognitive Processes 274

Problem Solving	277
-----------------	-----

Concept Formation	287
Creativity	294
Summary	298
Chapter Review	298
Suggestions for Further Reading	299

9 Altered States of Cognition 300

Hypnosis	304
Sleep	309
Drugs: An Introduction	317
Heroin	318
Marijuana	323
LSD	326
Alcohol	328
Cigarette Smoking	332
Caffeine	335
Summary	336
Chapter Review	338
Suggestions for Further Reading	339

10 Social Psychology 340

Attitudes	344
Social Perception	351
Aggression	360
Obedience	365
Groups	370
Summary	374
Chapter Review	375
Suggestions for Further Reading	376

11 Personality 378

Four Approaches	382
Conflict Approach: Sigmund Freud	383
Fulfillment Approach: Carl Rogers	392
Consistency Approach: George Kelly	397
Behavioral Approach	401
Summary	407
Chapter Review	407
Suggestions for Further Reading	409

12 Abnormal Psychology 410

What Is Abnormal Behavior?	415
How Do We Diagnose Abnormal Behavior?	420

Anxiety and Neurosis	422
