CONTENTS

PREFACE

ix

PART 1 Basic Statistics

1	Basic Ideas in Statistics	3
2	Frequency Distributions and Their Graphic Representation	16
3	Statistical Notation	40
4	Measures of Central Location	52
5	Measures of Variation, Skewness, and Kurtosis	68
6	Probability and the Binomial Distribution	83
7	The Normal Curve	103
8	Regression and Correlation	114
9	Sampling and Sampling Distributions	145
10	Estimation and the Distribution of t	166
11	Hypotheses Testing: Means	178
12	Hypotheses Testing: Other Statistics	198
13	Analysis of Frequencies Using Chi Square	212

PART 2 The Design of Experiments

14	The Structure and Planning of Experiments	237
15	Analysis of Variance: One-Way Classification	250
16	Analysis of Variance: Two-Way Classification	272
17	Analysis of Variance: Three-Way Classification	297
18	Multiple-Comparison Procedures	321

vii

19	Repeated-Measurement and Other Experimental Designs	347
20	Analysis of Covariance	391

PART 3 Nonparametric Statistics

21	The Statistics of Ranks	413
22	Nonparametric Tests of Significance	431

PART 4 Psychological Test and Multivariate Statistics

23	Test Construction Statistics	451
24	Errors of Measurement	466
25	Score Transformations: Norms	479
26	Selected Multivariate Methods	491
27	Multiple Regression and the Analysis of Variance	508
28	Factor Analysis	520

REFERENCES	545
------------	-----

APPENDIX TABLES	549
-----------------	-----

A	Ordinates and areas of the normal curve	550
B	Critical values of t	552
C	Critical values of chi square	553
D	Critical values of the correlation coefficient	554
E	Transformation of r to z_r	555
F	Critical values of F	556
G	Critical values of ρ , the Spearman rank correlation coefficient	560
H	Probabilities associated with values as large as observed values of S in the Kendall rank correlation coefficient	561
I	Critical and quasi-critical lower-tail values of W_+ (and their probability levels) for Wilcoxon's signed-rank test	562
J	Coefficients of orthogonal polynomials	565
K	Critical lower-tail values of R_1 for rank test for two independent samples	566
L	Critical values of the studentized range statistic	570
M	Critical values of the $F_{\max}$ statistic	572
