

STATISTICS

IN PSYCHOLOGY AND EDUCATION

SIXTH EDITION

HENRY E. GARRETT

R. S. WOODWORTH

CONTENTS

PART I: DESCRIPTIVE STATISTICS

I. The Frequency Distribution	
I. Measures in General	1
II. Drawing up a Frequency Distribution	4
III. The Graphic Representation of the Frequency Distribution	8
IV. Standards of Accuracy in Computation	19
2. Measures of Central Tendency	
I. Calculation of Measures of Central Tendency	27
II. Calculation of the Mean by the "Assumed Mean" or Short Method	35
III. When to Use the Various Measures of Central Tendency	38
3. Measures of Variability	
I. Calculation of Measures of Variability	43
II. Calculation of the SD by the Short Method	51
III. The Coefficient of Variation, V	57
IV. When to Use the Various Measures of Variability	59
4. Cumulative Distributions, Graphic Methods and Percentiles	
I. The Cumulative Frequency Graph	62
II. Percentiles and Percentile Ranks	65
III. The Cumulative Percentage Curve or Ogive	69
IV. Several Graphic Methods	78
5. The Normal Distribution	
I. The Meaning and Importance of the Normal Distribution	87

CONTENTS

ii. Properties of the Normal Probability Distribution	
iii. Measuring Divergence from Normality	96
iv. Applications of the Normal Probability Curve	99
v. Why Frequency Distributions Deviate from the Normal Form	105
	114
6. Linear Correlation	
i. The Meaning of Correlation	122
ii. The Coefficient of Correlation	125
iii. The Calculation of the Coefficient of Correlation by the Product-Moment Method	134

PART II: INFERENCE AND PREDICTION

7. Regression and Prediction	
i. The Regression Equations	151
ii. The Accuracy of Predictions from Regression Equations	160
iii. The Solution of a Second Correlation Problem	168
iv. Factors Affecting the Interpretation of r	171
v. The Interpretation of the Coefficient of Correlation	175
8. The Significance of the Mean and of Other Statistics	
i. The Meaning of Statistical Inference	184
ii. The Significance of the Mean and of the Median	185
iii. The Significance of Measures of Variability	195
iv. Significance of Percentages and of the Correlation Coefficient	197
v. Sampling and the Use of Standard Error Formulas	202
9. The Significance of the Difference between Means and Other Statistics	
i. The Significance of the Difference between Means	212
ii. The Significance of the Difference between σ 's	232
iii. The Significance of the Difference between Percentages and Correlation Coefficients	235
10. Testing Experimental Hypotheses	
i. The Hypothesis of "Chance"	247
ii. The χ^2 (Chi-Square) Test and the Null Hypothesis	253
iii. Nonparametric Methods	256

11. Analysis of Variance	
i. How Variance Is Analyzed	277
ii. The Significance of the Difference between Means Derived from Independent or Uncorrelated Measures or Scores (One Criterion of Classification)	279
iii. The Significance of the Difference between Means Obtained from Correlated Groups (Two Criteria of Classification)	291
iv. Analysis of Covariance	295

PART III: SPECIAL TOPICS, CORRELATION AND TEST CONSTRUCTION

12. The Scaling of Mental Tests and Other Psychological Data	
i. The Scaling of Test Items	309
ii. Scaling Judgments	323
13. The Reliability and Validity of Test Scores	
i. The Reliability of Test Scores	337
ii. Reliability in Terms of True Scores and Measurement Errors	345
iii. The Validity of Test Scores	354
iv. Item Analysis	361
14. Further Methods of Correlation	
i. Correlation from Ranks	371
ii. Biserial Correlation	375
iii. Correlation from Fourfold Tables	384
iv. The Contingency Coefficient, C	392
v. Curvilinear or Nonlinear Relationship	396
15. Partial and Multiple Correlation	
i. The Meaning of Partial and Multiple Correlation	403
ii. An Illustrative Multiple Correlation Involving Three Variables	406
iii. Formulas for Use in Partial and Multiple Correlation	411
iv. The Significance of a Partial r , Partial Regression Coefficient, b , and Multiple R	414
v. Some Problems in Predicting from the Multiple Regression Equation	417
vi. Limitations to the Use of Partial and Multiple Correlation	421

xii • CONTENTS

16. Multiple Correlation in Test Selection

I. The Wherry-Doolittle Test Selection Method

II. Spurious Correlation

428

441

17. Derivations of Key Formulas and Some Additional Techniques

445

Tables

457

Table of Squares and Square Roots

473
