OVER HEAD PROJECTOR

THE NEW ECONOMY PROJECTOR

WITH CONVINCING FEATURES

PREPARED MICROSCOPE SLIDES

Pages 2 to 33

The microscope is an essential instrument for modern biological studies in our schools and universities. The well prepared microscope slide is a most important means of demonstration which can be examined at different magnifications so that increasing amount of detail can be resolved. In this sense it is inexhaustible.

COLOR PHOTOMICROGRAPHS (original exposure) 35 mm

Pages 34 to 35

A photomicrograph, however, shows a particular area of a microscope preparation. The most perfect specimen to illustrate typical structure with utmost clarity of detail is selected from many hundreds of preparations.

Photomicrographs immediately show, on the screen, the details of the specimen required for demonstration at the most suitable magnification. The student subsequently finds it easier to locate the relevant part of a prepared slide under the microscope.

BIOLOGICAL COLOR SLIDES 35 mm

Pages 36 to 42

Our new color slide series are designed for modern biology teaching. They cover all requirements in secondary schools, high schools and colleges.

The series of teaching slides consists of anatomical pictures and diagrams as well as color photomicrographs.

OVERHEAD TRANSPARENCIES

Pages 43 to 45

Color overhead transparencies as modern visual aids become more and more part of biology teaching programmes.

Our multi-colored transparencies are printed by a special process and they excel by reason of their projection quality.

Abbreviations used in this catalogue

t.s.	=	transverse section
l.s.	=	longitudinal section
sec.	=	section
w.m.	=	whole mount
mi	=	photomicrograph
ma	=	photomicrograph
em	=	electron micrograph
rp	=	X-ray photograph
hp	=	human photograph
ar	=	autoradiograph
d	=	drawing, diagram, anatomical picture
