

AUSTRALIAN ANIMAL TOXINS

The creatures, their toxins and care of the poisoned patient

SECOND EDITION

STRUAN K. SUTHERLAND

JAMES TIBBALLS

OXFORD
UNIVERSITY PRESS

Introduction	xvii
Acknowledgments	xix
Symbols and abbreviations	xxi
References	xxiv

1 Historical background 1

2 The potency and action of Australian venoms and toxins 7

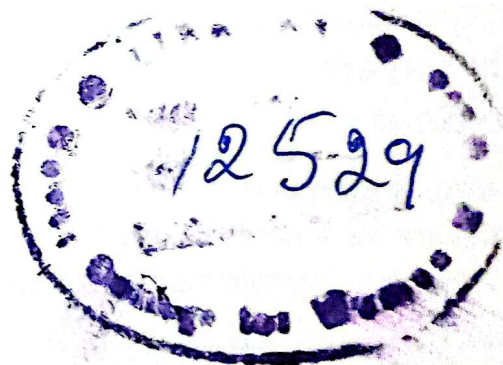

Introduction	8
Neurotoxic and neuromuscular effects of venoms and toxins	8
Potency of non-reptilian venoms and toxins	9
Components of snake venoms	9
The lethal dose 50% (LD ₅₀) or median lethal dose, with comparative studies on snake venoms	14
The venom output of snakes and potencies of their venoms	14
Effects of snake venoms	17
Scientific and medical applications of venom research	27

3 First aid for bites and stings 28

Introduction	29
Development of a new type of first aid	29
The pressure-immobilisation method of first aid	31
Clinical experience with the pressure-immobilisation first aid method	38
Bites and stings not treated with pressure-immobilisation method	42
Out-of-date and bad first aid	45

4 The biology of Australian snakes 48

Introduction	49
Build and movement	50
Speed and defensive behaviour	50
Tree climbing and swimming	51
Senses	51
Feeding habits	52
Metabolism	53
Ecdysis (sloughing of skin)	53
Reproduction	54
Venom apparatus	54
Immunity to their own venom	56
Fallacies about snakes	57
Avoiding snake bite	57
The distribution of snakes	58

5 Identification of snakes and their venom 59

- Introduction 60
- Distinguishing venomous snakes from lizards and pythons 61
- Size, colour and scalation of snakes 62
- Key to the identification of Australian snakes 64
- Detection and measurement of snake venom 65

6 Genus *Notechis*, Tiger Snakes 74

- 6:1 *Notechis scutatus*, the Mainland or Eastern Tiger Snake 75
- 6:2 *Notechis ater*, the Black or Island Tiger Snake 91

7 Genus *Pseudonaja*, Brown Snakes 99

- 7:1 *Pseudonaja textilis*, the Common or Eastern Brown Snake 101
- 7:2 *Pseudonaja nuchalis*, the Western Brown Snake or Gwardar 115
- 7:3 *Pseudonaja affinis*, the Dugite 120
- 7:4 *Pseudonaja guttata*, the Speckled Brown Snake 123
- 7:5 *Pseudonaja modesta*, the Five-ringed Brown Snake 124
- 7:6 *Pseudonaja inframacula*, the Peninsula Brown Snake 125
- 7:7 *Pseudonaja ingrami*, Ingram's Brown Snake 127
- 7:8 *Pseudonaja tanneri*, Tanner's Brown Snake 129

8 Genus *Austrelaps*, the Copperheads 130**9 Genus *Pseudechis*, Black Snakes** 137

- 9:1 *Pseudechis porphyriacus*, the Red-bellied or Common Black Snake 139
- 9:2 *Pseudechis australis*, the Mulga or King Brown Snake 146
- 9:3 *Pseudechis guttatus*, the Blue-bellied or Spotted Black Snake 152
- 9:4 *Pseudechis colletti*, Collett's Snake 154
- 9:5 *Pseudechis butleri*, Butler's Snake or Yellow-bellied Black Snake 157
- 9:6 *Pseudechis papuanus*, the Papuan Black Snake 159

10 Genus *Acanthophis*, Death Adders 160**11 Genus *Oxyuranus*, the Taipan and the Small-scaled or Fierce Snake** 167

- 11:1 *Oxyuranus scutellatus*, the Taipan 168
- 11:2 *Oxyuranus scutellatus canni*, the Papuan Taipan 183
- 11:3 *Oxyuranus microlepidotus*, the Small-scaled or Fierce Snake 187

12 *Tropidechis carinatus*, the Rough-scaled or Clarence River Snake

13 *Cryptophis nigrescens*, the Small-eyed Snake

203

14 Genus *Hoplocephalus*

209

- 14:1 *Hoplocephalus bungaroides*, the Broad-headed Snake 210
- 14:2 *Hoplocephalus stephensii* Stephens' Banded Snake 213
- 14:3 *Hoplocephalus bitorquatus*, the Pale-headed Snake 217

15 Snakes of uncertain or lesser medical importance

220

- Treatment of bites by small or juvenile dangerous snakes 222
- 15:1 *Vermicella annulata*, the Bandy-bandy or Ringed Snake 226
- 15:2 *Suta suta*, the Curl Snake or Myall Snake 227
- 15:3 *Denisonia devisii*, De Vis' Snake or De Vis' Banded Snake 229
- 15:4 *Denisonia maculata*, the Ornamental Snake 231
- 15:5 *Demansia papuensis* and *Demansia vestigiata*, Black Whip Snakes 232
- 15:6 *Demansia psammophis*, the Yellow-faced Whip Snake 235
- 15:7 *Hemiaspis damelii*, the Grey Snake 237
- 15:8 *Hemiaspis signata*, the Black-bellied Swamp Snake or Marsh Snake 238
- 15:9 *Cacophis squamulosus*, the Golden-crowned Snake 239
- 15:10 *Tropidonophis mairii*, the Common Keelback or Freshwater Snake 239
- 15:11 *Echiopsis curta*, the Bardick 240
- 15:12 *Boiga irregularis*, the Brown Tree Snake 241
- 15:13 *Drysdalia coronoides*, the White-lipped Snake 242
- 15:14 *Furina (Glyphodon) tristis*, the Brown-headed Snake 243
- 15:15 *Pailsus pailsei*, the False Mulga Snake or 'False King Brown Snake' 244

16 Family *Hydrophiidae*, Sea Snakes

246

Treatment of sea snake bites 250

Genus *Acalyptophis* 252

- 16:1 *Acalyptophis peronii*, the Horned Sea Snake 252

Genus *Aipysurus* 253

- 16:2 *Aipysurus apraefrontalis*, the Short-nosed Sea Snake 254
- 16:3 *Aipysurus duboisii*, Dubois' Sea Snake 254
- 16:4 *Aipysurus eydouxii*, the Spine-tailed Sea Snake 255
- 16:5 *Aipysurus foliosquama*, the Leaf-scaled Sea Snake 255
- 16:6 *Aipysurus fuscus*, the Dusky Sea Snake 256
- 16:7 *Aipysurus laevis*, the Olive-brown or Golden Sea Snake 256
- 16:8 *Aipysurus pooleorum*, the Shark Bay Sea Snake 258
- 16:9 *Aipysurus tenuis*, Mjöberg's Sea Snake 259

Genus *Astrotia* 259

- 16:10 *Astrotia stokesii*, Stokes's Sea Snake 259

Genus *Disteira* 265

- 16:11 *Disteira kingii*, King's Sea Snake 265
- 16:12 *Disteira major* (formerly *Hydrophis major*), the Olive-headed Sea Snake 266

- Genus Emydocephalus 267**
 16:13 *Emydocephalus annulatus*, the Ringed or Turtle-necked Sea Snake 267
- Genus Enhydrina 268**
 16:14 *Enhydrina schistosa*, the Beaked Sea Snake 268
- Genus Ephalophis 273**
 16:15 *Ephalophis greyi*, the Southern Mud Snake 273
- Genus Hydrelaps 274**
 16:16 *Hydrelaps darwiniensis*, the Port Darwin or Black-ringed Mud Snake 274
- Genus Hydrophis 275**
 16:17 *Hydrophis elegans*, the Bar-bellied Sea Snake 275
 16:18 *Hydrophis ornatus*, the Reef Sea Snake 277
- Genus Lapemis 278**
 16:19 *Lapemis hardwickii* (formerly *L. curtus*), Hardwick's Sea Snake 278
- Genus Laticauda, the Sea Kraits 280**
 16:20 *Laticauda colubrina*, the Banded Sea Snake or Yellow-lipped Sea Krait 281
 16:21 *Laticauda laticaudata*, the Black-banded Sea Snake 282
- Genus Pelamis 283**
 16:22 *Pelamis platurus*, the Pelagic or Yellow-bellied Sea Snake 283

17 Treatment of snake bite in Australia

286

- At the scene of the snake bite 288
 Snake bite in Australia 288
 Treatment of snake bite 302
 First aid 303
 Clinical management 303
 Treatment of the critically ill snake bite victim 305
 Treatment of the snake-bite victim who is not critically ill 306
 Treatment of suspected snake bite or possible envenomation 308
 Antivenom 308
 Laboratory investigations 314
 Secondary management 316
 Snake bite in children 317
 Other problems associated with snake bite 318
 Snake antivenoms 327
 Snake bite in domestic animals 334

Spiders

343

Australian spiders that may be dangerous 348

Trap-door spiders 349

- 18:1 Family Idiopidae 349
 18:2 Family Actinopodidae 350

- 18:3 Family Nemesiidae (formerly Dipluridae) 352
- 18:4 Family Barychelidae, Brush-footed Trap-door Spiders 353
- 18:5 Family Theraphosidae, Bird-eating or Whistling Spiders 353
- 18:6 Family Clubionidae, Sac Spiders 355
- 18:7 Family Miturgidae, Purse Spiders 356
- 18:8 Family Gnaphosidae, Ground Spiders 356
- 18:9 Family Zoridae 356
- 18:10 Family Heteropodidae, Huntsman Spiders 356
- 18:11 Family Salticidae, Jumping Spiders 358
- 18:12 Family Lycosidae, Wolf Spiders 358
- 18:13 Family Araneidae 361
- 18:14 Family Tetragnathidae 361

Exotic spiders that may be dangerous 363

- 18:15 Family Theridiidae, Comb-footed spiders 363
- 18:16 Family Dysderidae 365
- 18:17 Family Loxoscelidae 365

Treatment of spider bites, excluding *Latrodectus hasselti*, *Atrax* and *Hadronyche* 366

Neurotising arachnidism 367

19 *Latrodectus hasselti*, the Red-back or Jockey Spider 383

Genus *Latrodectus* 384

Latrodectus hasselti, the Red-back Spider 385

20 The genera *Atrax* and *Hadronyche*, Funnel-web Spiders 402

Recognition of lairs and avoidance of bites 405

Genus *Atrax* 406

- 20:1 *Atrax robustus*, the Sydney Funnel-web Spider 406
- 20:2 *Atrax* sp. 1, the Mallacoota Funnel-web Spider 445
- 20:3 *Atrax* sp. 2 445

Genus *Hadronyche* 445

- 20:4 *Hadronyche formidabilis*, the Northern or Tree-dwelling Funnel-web Spider 445
- 20:5 *Hadronyche infensa* group, the Toowoomba or Darling Downs and Port Macquarie Funnel-web Spiders (*H.* sp. 14 spiders) 453
- 20:6 *Hadronyche versuta*, the Blue Mountains Funnel-web Spider 457
- 20:7 *Hadronyche cerbera*, the Southern Tree Funnel-web Spider 460
- 20:8 *Hadronyche venenata* and *H. pulvinator*, Tasmanian Funnel-web Spiders 463
- 20:9 *Hadronyche adalaidensis*, *H. flindersi* and *H. eyrei*, South Australian Funnel-web Spiders 463
- 20:10 *Hadronyche modesta*, *H. meridiana* and *H.* sp. 9, Victorian Funnel-web Spiders 463
- 20:11 *Hadronyche valida* 464
- 20:12 *Hadronyche* sp. 7, the Bermagui Funnel-web Spider 464

- 18:3 Family Nemesiidae (formerly Dipluridae) 352
- 18:4 Family Barychelidae, Brush-footed Trap-door Spiders 353
- 18:5 Family Theraphosidae, Bird-eating or Whistling Spiders 353
- 18:6 Family Clubionidae, Sac Spiders 355
- 18:7 Family Miturgidae, Purse Spiders 356
- 18:8 Family Gnaphosidae, Ground Spiders 356
- 18:9 Family Zoridae 356
- 18:10 Family Heteropodidae, Huntsman Spiders 356
- 18:11 Family Salticidae, Jumping Spiders 358
- 18:12 Family Lycosidae, Wolf Spiders 358
- 18:13 Family Araneidae 361
- 18:14 Family Tetragnathidae 361

Exotic spiders that may be dangerous 363

- 18:15 Family Theridiidae, Comb-footed spiders 363
- 18:16 Family Dysderidae 365
- 18:17 Family Loxoscelidae 365

Treatment of spider bites, excluding *Latrodectus hasselti*, *Atrax* and *Hadronyche* 366

Necrotising arachnidism 367

19 *Latrodectus hasselti*, the Red-back or Jockey Spider 383

Genus *Latrodectus* 384

Latrodectus hasselti, the Red-back Spider 385

20 The genera *Atrax* and *Hadronyche*, Funnel-web Spiders 402

Recognition of lairs and avoidance of bites 405

Genus *Atrax* 406

- 20:1 *Atrax robustus*, the Sydney Funnel-web Spider 406
- 20:2 *Atrax* sp. 1, the Mallacoota Funnel-web Spider 445
- 20:3 *Atrax* sp. 2 445

Genus *Hadronyche* 445

- 20:4 *Hadronyche formidabilis*, the Northern or Tree-dwelling Funnel-web Spider 445
- 20:5 *Hadronyche infensa* group, the Toowoomba or Darling Downs and Port Macquarie Funnel-web Spiders (*H.* sp. 14 spiders) 453
- 20:6 *Hadronyche versuta*, the Blue Mountains Funnel-web Spider 457
- 20:7 *Hadronyche cerberea*, the Southern Tree Funnel-web Spider 460
- 20:8 *Hadronyche venenata* and *H. pulvinator*, Tasmanian Funnel-web Spiders 463
- 20:9 *Hadronyche adalaidensis*, *H. flindersi* and *H. eyrei*, South Australian Funnel-web Spiders 463
- 20:10 *Hadronyche modesta*, *H. meridiana* and *H.* sp. 9, Victorian Funnel-web Spiders 464
- 20:11 *Hadronyche valida* 464
- 20:12 *Hadronyche* sp. 7, the Bermagui Funnel-web Spider 464

21 Ticks

Australian ticks as vectors of disease 467

Genus Ixodes 468

21:1 *Ixodes holocyclus*, the Australian Paralysis Tick 468
Allergy to ticks (*Ixodes holocyclus*) 482
Scrub itch 484

Tick paralysis in animals 485

21:2 *Ixodes cornuatus*, the Tasmanian Paralysis Tick 487

Ticks other than those of genus Ixodes 488

21:3 *Amblyomma triguttatum*, the Ornate Kangaroo Tick 488

21:4 *Ornithodoros gurneyi*, the Kangaroo Soft Tick 488

22 Venomous arthropods of medical importance, other than spiders and ticks

489

Ants 491

22:1 *Myrmecia pilosula*, the Jumper Ant 493

22:2 *Myrmecia pyriformis*, the Bull Ant or Bulldog Ant 494

22:3 *Rhytidoponera metallica*, the Green-head Ant 494

Human envenomation 496

Bees 501

22:4 *Apis mellifera*, the Common or European Honey Bee 501

Wasps 509

22:5 Genus *Polistes*, Social or Paper-nest Wasps 511

22:6 *Vespula germanica* and *V. vulgaris*, European and English Wasps 511

22:7 *Diamma bicolor*, the 'Blue-ant' or Wingless Wasp 513

First aid and clinical management of wasp stings 513

Beetles 514

22:8 Families Meloidae, Oedemeridae and Staphylinidae: Blister Beetles 514

22:9 Family Corylophidae 516

Scorpions 516

22:10 Genera *Cercophonius*, *Isometroides*, *Isometrus*, *Liocheles*, *Lychas* and *Urodacus* 516

Pseudoscorpions (chelifers) 520**Caterpillars, moths and butterflies 520**

22:11 *Ochrogaster lunifer*, the Bag Moth, *Euproctis edwardsii*, the Mistletoe Browntail Moth, *Euproctis lutea*, the Freshwater Mangrove Moth 520

22:12 *Anthela nicothoe*, the Hairymary 521

22:13 *Uraba lugens*, the Gumleaf Skeletoniser; *Doratifera oxleyi*, the Chinese Junk 521

22:14 *Chelepteryx collesii*, the White-stemmed Gum Moth 523

Centipedes 525

22:15 Order Scolopendromorpha 525

22:16 *Scutigera* spp., House Centipedes 527

Other venomous arthropods 528

- 22:17 Millipedes, class Diplopoda 528
 22:18 Mosquitoes (family Culcidae) 530
 22:19 Biting Midges ('sandflies'), family Ceratopogonidae 530
 22:20 March Flies (family Tabanidae) 531
 22:21 Thrips (order Thysanoptera) 532
 Clinical management of insect bites 533

23 Ornithorhynchus anatinus, the Platypus 534
 Clinical management of envenomation 542

24 Class Cephalopoda, Octopuses 548

Genus Hapalochlaena, the Blue-ringed Octopuses 551

Human envenomation and prognosis 552

- 24:1 *Hapalochlaena maculosa*, the Lesser or Southern Blue-ringed Octopus 554
 24:2 *Hapalochlaena lunulata*, the Greater or Northern Blue-ringed Octopus 562
 24:3 *Hapalochlaena fasciata*, the Blue-lined Octopus 563

25 Chironex fleckeri, the Box Jellyfish 570
 Distribution and seasonal incidence of stings 571
 Management of envenomation 580

26 Other jellyfish of medical importance 592

Chiropsopids 594

- 26:1 *Chiropsalmus quadrigatus* 594

Carybdeids 597

- 26:2 *Carybdea rastoni*, the Jimble 597
 26:3 *Carukia barnesi*, the Irukandji 600
 26:4 *Tamoya* sp., the Morbakka 607
 26:5 *Physalia*, the Bluebottle or Portuguese Man-o'-War 609

Jellyfish with scalloped medusae 615

- 26:6 *Pelagia noctiluca*, the Little Mauve Stinger 616
 26:7 *Cyanea capillata*, the Hair Jelly 618
 26:8 *Aurelia aurita*, the Saucer Jelly or Moon Jellyfish 620

Other jellyfish 620

- 26:9 *Catostylus mosaicus*, the Blubber Jellyfish 6210
 26:10 *Pseudorhiza haeckeli* 622
 26:11 *Olindias singularis* 622
 26:12 *Chrysaora* sp. 622
 26:13 *Cassiopea* sp., the Upside-down Jellyfish 623

- 27 Venomous Cone Shells**
Clinical management of envenomation 635

- 28 Genus *Synanceia*, Stonefish** 639
First aid 648
Clinical management of envenomation 648

- 29 Venomous fish other than Stonefish** 656
Treatment of envenomation 659

Family Scorpaenidae, Scorpionfish 661

- 29:1 *Pterois volitans*, the Butterfly Cod or Lionfish 661
29:2 *Apistops caloundra*, and *Hypodytes carinatus*, Waspfish 663
29:3 *Scorpaena cardinalis*, *S. ergastulorum* and *S. sumptuosa*, Scorpion Cod 664
29:4 *Gymnapistes marmoratus*, the South Australian Cobbler 665
29:5 *Centropogon australis* and *C. marmoratus*, Fortescues 667
29:6 *Notesthes robusta*, the Bullrout or Kroki 668
29:7 *Parascorpaena picta*, *Scorpaenodes guamensis*, Scorpionfish 671
29:8 *Neosebastes pandus*, the Gurnard Perch 671

Family Synanceiidae 673

- 29:9 *Glyptauchen panduratus*, the Goblinfish 673
29:10 *Inimicus caledonicus* and *I. sinensis*, Ghouls 674

Family Acanthuridae: subfamily Acanthurinae 676

- 29:11 *Acanthurus dussumieri* and *A. triostegus*, Surgeonfish 676

Families Ariidae and Plotosidae, Catfish 677

- 29:12 *Plotosus lineatus* and *Cnidogobius macrocephalus*, Catfish 677

Families Enoplosidae, Siganidae, Uranoscopidae and Platycephalidae 681

- 29:13 *Enoplosus armatus*, the Old Wife 681
29:14 *Siganus lineatus* and *spinus*, Rabbitfish or Spinefeet 682
29:15 *Kathetostoma laevis*, Southern or Eastern Stargazer 684
29:16 *Platycephalus fuscus*, the Dusky Flathead 684

Sharks 686

- 29:17 *Heterodontus portusjacksoni*, the Port Jackson Shark 686
29:18 *Hydrolagus leuroides*, *H. ogilbyi* and *Calilorhynchus milii*, Ghost Sharks 687

Rays (Stingrays) 688

- 29:19 *Myliobatis australis*, the Southern Eagle Ray or Bull Ray 689
29:20 *Aetobatus narinari*, the White-spotted Eagle Ray 689
29:21 *Dasyatis thetidis*, the Black Stingray 690
29:22 *Dasyatis kuhlii*, the Blue-spotted Maskray 691
29:23 *Trygonoptera testacea* and *Urolophus paucimaculatus*, Stingarees 691

30 Miscellaneous venomous creatures (mainly marine) 701

Starfish (class Asteroidea) 703

- 30:1 *Acanthaster planci*, the Crown-of-Thorns Starfish or Sea Star 703

Sea Urchins (class Echinoidea) 705

- 30:2 *Diadema setosum*, the Black or Long-spined Sea Urchin 706
30:3 *Toxopneustes pileolus*, the Flower Sea Urchin 707

Cnidarians (phylum Cnidaria) 709

- 30:4 Order Scleractinia, True (Stony) Corals 709
30:5 Sea Anemones (order Actiniaria) 711
30:6 Fire Coral or False Coral (family Milleporidae) 712
30:7 *Lytocarpus philippinus*, Fire Weed or Fire Fern; *Aglaophenia cupressina*, Stinging Seaweed 713

Sea Slugs (class Gastropoda, subclass Opisthobranchia) 714

- 30:8 *Glaucus atlanticus*, the Glaucus 714

Stinging Sponges (class Demospongiae) 715

- 30:9 *Neofibularia mordens* 716
30:10 *Lissodendoryx* sp. 716
30:11 *Haliclona* sp. 716

Marine Worms (class Polychaeta) 717

- 30:12 *Eunice aphroditois*, the Biting Reef Worm; *Aphrodite australis*, the Sea Mouse; *Eurythoe complanata*, the Bristle Worm; *Chloeia* sp., the Beautiful Sea Mouse 717

True worms (phylum Annelida) 718

- 30:13 Leeches (class Hirudinea) 718

Toads and frogs (class Amphibia) 720

- 30:14 *Bufo marinus*, the Cane or Marine Toad 720
30:15 Frogs 721
First aid 723
Clinical management 723
Prophylaxis 723

724

31 Marine animals poisonous to eat

- 31:1 Order Tetraodontiformes, tetrodotoxic fish poisoning 726
31:2 Ciguatera poisoning 741
31:3 Maitotoxin poisoning 754
31:4 Scombroid (histamine) fish poisoning 757

Shellfish poisoning 760

- 31:5 Paralytic shellfish (saxitoxin) poisoning 760
31:6 Diarrhetic shellfish (okadaic acid) poisoning 763
31:7 Amnesic shellfish (domoic acid) poisoning 764
31:8 Brevetoxins 764

Other poisonings 766

- 31:9** 'Pelagic paralysis' 766
- 31:10** Hypervitaminosis A (liver) poisoning 766
- 31:11** Elasmobranch (shark and ray) poisoning 767
- 31:12** Turtle poisoning 768
- 31:13** Marine crab poisoning 768
