

A TEXT BOOK
of
ECONOMICS

for
B.A. & B. Com. Students

by
Prof. SAEED NASIR
Principal Municipal College
Lyallpur

Can be had from

ILMI KITAB KHANA

Kabir Street Urdu Bazar, Lahore.

CONTENTS

Chapter	Subject	Page
1.	The Problem of Definition	1-31

Economics as the Study of Wealth. Economics a Study of Material Requisites. Criticism. Economics as a Study of Scarcity and Choice. Criticism. Is Economics Neutral between Ends? Economic Theory and Practice. Concept of Economic Welfare. Relation between Wealth and Welfare. Factors determining Economic Welfare. Advance of Economic Welfare. Maximization of Economic Welfare. Economics as Science. The Economic Problem. Scope of Economics. The Nature of Economics Laws. Nature of Economics Laws or Generalizations. Economics Laws are Essentially Hypothetical. Comparison with other Laws. Methods of Economic Analysis. **The Social Sciences.** Sociology and Economics. History and Economics. Practical Science and Economics. Economics and Ethics. Economics and Psychology.

Importance of the Study of Economics.

Intellectual Value.

Practical Advantages. Personal State in Economics. Economics for the leader. Poverty and Development. Economics for the citizen. Questions.

2. ECONOMIC SYSTEMS 32-70

Basic Functions of an Economic System. What is to be produced. How is to be produced. Distribution of National Products. Current consumption and future investment.

Capitalism

Basic Tenants of Capitalism

Private Property. Freedom of enterprise. Freedom of Contract. Price Mechanism. Inequality of Income. Profit

Motive. Co-existence of Competition and Combination. Specialization. Sovereignty of the consumer. Achievements of Capitalism. Criticism of Capitalism. In the words of Lenin.

Socialism

Indictment of Capitalism. Socialists Analysis of Capitalism. Socialists Programme of Reform. Socialists Campaign. Demerits of Socialism

Socialists Reply. What is Communism? How Russia has tackled its various Economic problems?

Ownership of Private Property. Pricing System. Supply of Labour and Wages. Finance. Banks. Trade. Interest. Allocation of Factors of Production.

Free Enterprise. Economy and Mixed Economy. Mixed Economy. Criteria for judging a Good Economic System. High Level of employment. A Progressive Higher Standard of Living. Economic Liberty and Security. Provision of Goods and Services. Stable Economy. Fair Distribution of Income. Peaceful methods. Price Mechanism and the various Economic systems.

Functions of Price mechanism in a Capitalistic Economy.

What commodities are to be produced? How the goods are to be produced? For whom the goods are to be produced?

Price mechanism and Socialism.

What commodities are to be produced. How the goods are to be produced.

Price mechanism and Mixed Economy

What commodities are to be produced? How the goods are to be produced? For whom the goods are to be produced?

The Influence of Price System on Resource Allocation.

Influence of price system on resource allocation. The Influence of Price System of Investment Direction. The Influence of the price system on production techniques.

Land intensive method of production. Labour intensive method of production. Capital intensive method of production. Technological Changes.

The influence of the price system on consumption patterns. The influence of price system on Foreign Trade. The Influence of Price System on National Income Distribution.

Economic Analysis.

Micro Economic Approach. Macro Economic Approach. Conclusion. Questions.

3. BASIC MARKET MODELS

71-78

What is 'market'? Essentials of a Market.

Extent of the Market.

Nature of the Commodity. Nature of demand. Extent of Supply. Efficient Means of Communication and Transport. Peace and Security. Durability of the Commodity. Policy of the State. Currency and Credit System. Degree of Division of Labour.

The Key Assumptions of Pure Competition. Perfect Competition.

Very large number of buyers & sellers. Perfect Substitutes. No attachment or Associations. Perfect Mobility. Perfect Knowledge.

Pure Monopoly.

Single Seller. No close Substitute. Control over Price. Exclusion of Competitors. Publicity for sale promotion.

Monopolistic Competition.

Multiplicity of buyers and sellers. Product differentiations. Control over price. Entry of new firms. Stiff competition.

Oligopoly.

A few sellers. Quality of the Product. Entry to the market. Expenses on advertisement.

Characteristics of the Four Basic Market Models. Questions.

4. THE THEORY OF DEMAND.

The meaning of Demand. Law of Demand. Limitations of the Law of Demand. Demand Schedule and Demand Curve. Composite Demand schedule.

Changes in Demand.

Extension and Construction of demand. Rise and Fall of Demand.

Factors causing Changes in Demand.

Changes in Population. Changes in Tastes. Changes in Income. Changes in the Distribution of Wealth. Changes in Price of Substitutes. Changes in the State of Trade.

Why does the demand curve slope downward?

Income Effect. Substitution Effect. Entry of New Buyers. Exceptional Demand Curve.

5. THE THEORY OF SUPPLY.

91-98

The Meaning of Supply. Distinction between Supply and Stock. Supply Schedule. The Law of Supply. Extension & Contraction of supply vs. Rise and Fall of Supply.

Rise and Fall of Supply.

Rise or increase in Supply. Fall or Decrease in Supply.

The Determinants of Supply.

Changes in Factor Prices. Change in Technique. Improvement in the Means of Transport. Climatic Changes in case of Agricultural Products. Political Changes. Taxation Policy. Goals of Firms.

6. ELASTICITY OF DEMAND AND SUPPLY.

99-120

Elasticity of Demand and its measurement. Elasticity Formula. Measurement of Elasticity by the Total Expenditure Test. Determinants of Elasticity of Demand.

Demand for Necessaries of life is less elastic or Inelastic. Elasticity depends on the existence of Substitutes. Elasticity

depends on
postponement
on the range
of a commo

depends on the variety of uses. Elasticity depends on the postponement of consumption of goods. Elasticity depends on the range of price level. Elasticity varies with the uses of a commodity to which it is put.

Different Concepts of Elasticity.

Price Elasticity. Concept of Income Elasticity.

Positive Income Elasticity of Demand. Negative Income Elasticity of Demand. Zero income Elasticity. Sale of commodity in two different Markets.

Measurement of Elasticity of Demand Curve at a Point.

Formula for Measurement of Point Elasticity. Elasticity of a curved demand curve at a point.

Importance of Elasticity of Demand.

Elasticity of supply.

Schedule. Inelastic Supply. Perfect inelastic supply curve.

Perfect elastic supply.

Measurement of Elasticity of Supply.

Equal to Unity. Greater than Unity. Less than Unity.

Formula of Measurement of Elasticity of Supply. Questions.

7. EQUILIBRIUM OF DEMAND AND SUPPLY 121-131

Effects of changes in Demand on Equilibrium Price.

Perfect Elastic Supply. Perfectly Inelastic Supply. Elasticity of supply greater than unity. Elasticity less than unity.

Effects of Changes in Supply on Price.

132-159

Inelastic Demand.

Effects of changes in both supply and demand on equilibrium price. Questions.

8. THE THEORIES OF HOUSEHOLD BEHAVIOUR

Theory of consumer behaviour.

The Basis of Demand.

The Concept of Utility. The Concepts of Total Utility and

Marginal Utility. The Concept of Marginal Utility. The Law of Diminishing Marginal Utility. Diagrammatic Representation of the Law. Assumptions of the Law. Practical Importance of the Law of Diminishing Utility. The Law of Marginal Utility and the Law of Demand. Consumer's Surplus. Distribution of Expenditure. System of Taxation. The Equilibrium of a Household. Limitations of the Law. Importance of the Law.

Marginal Rate of Substitution (MRS). Diminishing Marginal Rate of Substitution. Personal Valuation and Market Valuation. Multi-Commodity Market. Marginal Rate of Substitution and the Demand Schedule. Substitution effect and Income effect. Improvement on the Law of Diminishing Marginal Utility. Concept of Consumer's Equilibrium. Marginal Utility Analysis. Second Method. Indifference Approach. The indifference curve analysis approach is based on four assumptions. Consumption Possibilities Line and the explanation of consumer's equilibrium. The Equilibrium of the Household. Household's equilibrium under different situations. Properties of Indifference Map. The indifference map exhibits the following properties. Importance of indifference Approach in Economic Analysis. Criticism. Questions.

9. PRODUCTION COSTS.

160-182

The Concept of cost of production. Implicit Costs. Concepts of nominal cost and real cost. Real cost or Opportunity cost. **Analysis of Cost of Production.**

Variable Costs. Fixed Costs. Average Fixed Cost. The behaviour of Average Fixed cost. Average variable cost. The Behaviour of Average Variable Cost. Average Total Cost. The Behaviour of Average Total Cost. Short Run and Long Run cost curves and their behaviour. Long Run Average Cost Curve. Marginal Cost. Long Run Marginal Cost Curve. Relation of Average variable cost and average Total cost to marginal cost. Average Variable Cost and

Marginal Cost
Total Revenue
Revenue curve
tion and in
individual
