Editor's Introduction v

Preface ix

Description of Chapter Contents xiii

1. electric charge, coulomb's law of electrostatic forces 1

1.1 *Introduction* 1

1.2 *Electric Charge, Coulomb's Law of Force* 3

1.3 *Charge Distributions* 11

1.4 *Examples* 11

1.5 *Electric Charge and Matter* 14

1.6 *Electrical Measurements* 16

1.7 *Charge Separation* 18

1.8 *Comments on Chapter 1* 21

2. the electric field 25

2.1 *Introduction* 25

2.2 *Electric Field* 26

2.3 *Examples, Calculation of Electric Fields* 29

2.4 *Conductors and Electric Fields* 37

2.5	Electric Lines	48
2.6	Gauss' Flux Theorem	48
*2.7	The Differential Form of Gauss' Flux Theorem	48
2.8	Examples, Use of Gauss' Flux Theorem	49
2.9	Comments on Chapter 2	58

3. the electric potential 65

3.1	Introduction	65
3.2	Work and Potential Energy	65
3.3	The Conservative Nature of the Electric Field	67
*3.4	Circulation Related to Curl	69
*3.5	Examples, Circulation Used for Field Studies	70
3.6	Potential Energy in a Fixed Field	72
3.7	Potential Difference and Potential	73
3.8	The Superposition Principle Applied to Potential	75
3.9	Examples, Calculation of Potential	76
3.10	Potential Related to Electric Field, the Gradient	79
3.11	Examples, Field versus Potential	82
3.12	Charge Clusters, Monopoles, Dipoles, Quadrupoles, Etc.	86
*3.13	Poisson's and Laplace's Equations	87
3.14	The Evaluation of the Electronic Charge	88
3.15	The Electron Volt	89
3.16	Comments on Chapter 3	90

4. capacitance 99

4.1	Introduction	99
4.2	Description of a System of Charged Conductors	100
4.3	The Simplest Case, a Single Isolated Conductor	102
4.4	Capacitance	103
4.5	Capacitance in a System of Conductors	104
4.6	Examples, Calculation of Capacitance	106
4.7	Combinations of Capacitors	108
4.8	Electrostatic Stored Energy	110
*4.9	Self-energy of Electric Charges	112
*4.10	Force between Capacitor Plates, Virtual Displacement	113
*4.11	Electrostatic Problems, the Method of Images	114
4.12	Use of Capacitors in DC and AC Circuits	116
4.13	Some Electrostatic Apparatus	117
4.14	Comments on Chapter 4	118

5. dielectrics 124

5.1	Introduction	124
5.2	Polarization of Matter	125

5.3	Polarization Charge versus Dipole Moment per Unit Volume	129
5.4	Electric Susceptibility and the Nature of the Polarization Vector	130
5.5	Dielectric Theory Applied to Capacitors	132
5.6	Permittivity and the Dielectric Constant	135
5.7	Practical Capacitors	135
5.8	Electric Displacement $\mathbf{D}$	136
5.9	Examples	139
5.10	Boundary Conditions at a Dielectric Surface	140
*5.11	Force between Charges in a Dielectric Medium	143
*5.12	Forces in a Dielectric Fluid, a General Solution	145
5.13	Stored Energy in a Dielectric Medium	146
*5.14	Depolarization Factor	149
*5.15	Atomic Polarizability	151
*5.16	Ferroelectric Materials	155
5.17	Comments on Chapter 5	155
6.	current and circuits	162
6.1	Introduction	162
6.2	Electric Current	162
6.3	Resistance, Resistivity, and Series and Parallel Resistors	165
6.4	An Introduction to Circuits	172
6.5	Energy Exchange in a Circuit	178
*6.6	Kirchhoff's Rules	183
*6.7	The Practical Use of Resistors	185
*6.8	Measurement of Resistance; Current and Voltage Meters	189
6.9	Comments on Chapter 6	195
7.	the physics of conductivity	205
7.1	Introduction	205
7.2	Conductivity in Metals, Classical Model	206
7.3	The Physics of Conductivity, Quantum-mechanical Model	211
7.4	Metals, Semiconductors, and Insulators	213
7.5	Superconductors	227
7.6	Electromotive Force of a Chemical Cell	229
7.7	Contact Potential and Thermal Electromotive Force	232
7.8	Comments on Chapter 7	235
	the magnetic field	238
8.1	Introduction	238
8.2	The Magnetic Force between Current Elements	239
8.3	Examples	245
8.4	Some Properties of the Magnetic Field $\mathbf{B}$	249
*8.5	The Curl of a Magnetic Field	253

- 8.6 The Flux of the Magnetic Field 253
- 8.7 Further Field Calculations 255
- 8.8 Torque on a Current Loop in a Uniform Magnetic Field,
The Magnetic Dipole 256
- *8.9 The Galvanometer 260
- 8.10 Forces on Isolated Moving Charges 262
- *8.11 Applications 264
- 8.12 Comments on Chapter 8 268

9. induced electromotive force, emf 277

- 9.1 Introduction 277
- 9.2 Faraday's Law of Induction 278
- 9.3 Lenz's Principle 281
- 9.4 Induced Electromotive Force, a New Kind of Electric Field 282
- 9.5 Motional Electromotive Force 287
- 9.6 Examples, Electrical Generators 289
- 9.7 Stored Energy of a Current Loop in a Magnetic Field 291
- 9.8 Examples, Electric Motors 294
- 9.9 Mutual Inductance 299
- 9.10 Self Inductance 302
- 9.11 Examples 303
- 9.12 Calculation of Mutual Inductance 304
- 9.13 Combinations of Inductances 305
- 9.14 Stored Magnetic Energy 308
- *9.15 Applications of Inductance 311
- 9.16 Comments on Chapter 9 316

10. magnetism in matter 325

- 10.1 Introduction 325
- 10.2 Magnetic Contributions of Matter 326
- 10.3 Magnetic Field $\mathbf{H}$ 332
- 10.4 Magnetic Parameters in Matter 336
- 10.5 Boundary Sources of $\mathbf{H}$ 337
- 10.6 Boundary Conditions for $\mathbf{B}$ and $\mathbf{H}$ 341
- 10.7 Stored Energy in Magnetic Matter 343
- 10.8 Examples, Field Calculations 344
- *10.9 Paramagnetism 350
- *10.10 Diamagnetism 354
- *10.11 Ferromagnetism 359
- *10.12 Hysteresis Losses in Magnetic Materials 364
- *10.13 Permanent Magnets 365
- *10.14 Examples 368

- *10.15 Magnetic Circuits 372
- 10.16 Comments on Chapter 10 374

11. alternating-current circuits 382

- 11.1 Introduction 382
- 11.2 Sinusoidal Time Variation 383
- 11.3 The Nature of Sinusoidal Functions 385
- 11.4 AC Voltage Applied to Resistors, Inductors, and Capacitors 388
- *11.5 Use of Complex Numbers 394
- 11.6 Series LCR Circuit 398
- 11.7 Parallel LCR Circuit 403
- 11.8 Resonance 406
- *11.9 Transients 407
- 11.10 Filter Circuits 415
- 11.11 Power in AC Circuits 417
- *11.12 AC Instruments 422
- *11.13 The Transformer 423
- *11.14 Generators 427
- *11.15 Motors 428
- 11.16 Comments on Chapter 11 431

12. maxwell's equations and electromagnetic waves 439

- 12.1 Introduction 439
- 12.2 The General Theory of Electromagnetism 439
- 12.3 Displacement Current 441
- 12.4 The Physics and Mathematics of Waves 445
- 12.5 Electromagnetic Waves 450
- 12.6 Electromagnetic Waves in Matter 455
- 12.7 The Transverse Nature of Plane Waves 456
- 12.8 Propagation of Energy, the Poynting Vector 457
- 12.9 Example, Poynting Vector 460
- *12.10 Generation of Electromagnetic Waves 460
- *12.11 Reflection of Electromagnetic Waves by a Conducting Plane 462
- *12.12 Reflection and Refraction of Electromagnetic Waves at a Dielectric Boundary 463
- *12.13 Electromagnetic Waves in Waveguides 466
- 12.14 Comments on Chapter 12 470

relativity and electromagnetism 477

- 13.1 Introduction 477
- 13.2 Classical Space and Time 478
- 13.3 The Michelson-Morley Experiment 480
- 13.4 Special Relativity 482
- 13.5 Relativistic Dynamics 491

- 13.6 Charge Invariance 493
- 13.7 Relativistic Electric Field Effects 494
- 13.8 The Unity of Electric and Magnetic Fields 497
- 13.9 Comments on Chapter 13 501

14. motion of charged particles in electric and magnetic fields 506

- 14.1 Introduction 506
- 14.2 The Lorentz Force Equation 506
- 14.3 Crossed **E** and **B** Fields 508
- *14.4 Motion in a Converging Magnetic Field 510
- *14.5 Magnetohydrodynamic Waves 515
- *14.6 Flow of a Conducting Medium in a Magnetic Field 517
- 14.7 Comments on Chapter 14 517

***15. electric and magnetic quantum effects 519**

- 15.1 Introduction 519
- 15.2 The Photoelectric Effect 519
- 15.3 Atomic Radiation 523
- 15.4 X-rays and γ Rays 523
- 15.5 The Compton Effect 525
- 15.6 Electron Waves 525
- 15.7 Magnetic Quantization, the Stern-Gerlach Experiment 526
- 15.8 Comments on Chapter 15 528

***16. vacuum tubes and semiconductor devices 530**

- 16.1 Introduction 530
- 16.2 The Vacuum Tube 530
- 16.3 Semiconductor Devices 537
- 16.4 Junction Diode 537
- 16.5 Junction Transistor 541
- 16.6 The Klystron 547
- 16.7 Comments on Chapter 16 549

17. units of measurement 552

- 17.1 Introduction 552
- 17.2 Measuring Systems Compared 553
- 17.3 The CGS System 554
- 17.4 The Gaussian System 556
- 17.5 The MKS System 556
- 17.6 Units Compared 558
- 17.7 Conversion Table 563
