

Explaining Physics

GCSE Edition

Stephen Pople

6785

Oxford

Introduction 3

Acknowledgements 6

Section 1

Forces and motion

- 1.1 Units of measurement 8
- 1.2 Speed, velocity and acceleration 12
- 1.3 Measuring with ticker tape 16
- 1.4 Acceleration of free fall 18
- 1.5 Force, mass and acceleration 21
- 1.6 Gravitational force 24
- 1.7 Balanced and unbalanced forces 28
- 1.8 Moving in circles 31
- 1.9 Changing momentum 34
- 1.10 Action and reaction 37
- 1.11 Conserving momentum 39
- 1.12 Rockets and jets 42
- Further questions on section 1 44

Section 2

Force, work and energy

- 2.1 Combining forces 50
- 2.2 Turning effect of forces 53
- 2.3 Centre of gravity 58
- 2.4 Stretching forces 61
- 2.5 Work and energy 64
- 2.6 Energy for the world 69
- 2.7 Gravitational potential energy and kinetic energy 73
- 2.8 Engines 76
- 2.9 Machines 80
- Further questions on section 2 84

Section 3

Density and pressure

- 3.1 Density 90
- 3.2 Pressure 94
- 3.3 Pressure from the atmosphere 99

- 3.4 Pumps and gauges 104
- 3.5 Archimedes' principle and flotation 106

Further questions on section 3 106

Section 4

Molecular motion and heat

- 4.1 Moving molecules 116
- 4.2 Surface tension 120
- 4.3 Temperature 122
- 4.4 Expansion of solids 126
- 4.5 Uses of expanding solids 130
- 4.6 Expansion of liquids 132
- 4.7 The gas laws 134
- 4.4 Conduction 140
- 4.9 Convection 142
- 4.10 Specific heat capacity 144
- 4.11 Melting and freezing 148
- 4.12 Latent heat of vaporization 152
- 4.13 Vapours and vapour pressure
- Further questions on section 4

Section 5

Waves: light and sound

- 5.1 Light and shade 166
- 5.2 Reflection of light 169
- 5.3 Curved mirrors 172
- 5.4 Refraction 177
- 5.5 Lenses 181
- 5.6 The camera and the eye 187
- 5.7 Telescopes 189
- 5.8 Colour 191
- 5.9 Wave motion 195
- 5.10 Light waves 200
- 5.11 Electromagnetic waves 204
- 5.12 Thermal radiation 208
- 5.13 Sound waves 210
- 5.14 Hearing sounds 214
- 5.15 Vibrating strings and air columns
- Further questions on section 5

Section 6

Electrical energy

- 6.1 Electric charge 230
- 6.2 Charged conductors 234
- 6.3 Charge, potential, and capacitance 237
- 6.4 Cells and batteries 242
- 6.5 Current and voltage in a simple circuit 245
- 6.6 Ohm's Law and resistance 249
- 6.7 Series and parallel circuits 253
- 6.8 E.m.f. and internal resistance 258
- 6.9 Power in an electric circuit 262
- 6.10 Electrical energy – calculations and costs 266
- 6.11 Mains electricity 269
- Further questions on section 6 273

Section 7

Magnets and currents

- 7.1 Magnets 280
- 7.2 Magnetic fields 284
- 7.3 Magnetic effect of a current 288
- 7.4 Electromagnets 290
- 7.5 Fields, currents, and forces 292
- 7.6 Electric motors 295
- 7.7 Electrical meters 298

- 7.8 Electromagnetic induction 303
- 7.9 Generators 306
- 7.10 Mutual induction and transformers 310
- 7.11 Generating and transmitting power for the mains 315
- Further questions on section 7 318

Section 8

Electrons and atoms

- 8.1 Electron beams 324
- 8.2 The cathode ray oscilloscope 328
- 8.3 Electronic components 332
- 8.4 Diodes and rectification 334
- 8.5 Transistors 337
- 8.6 Microchips 341
- 8.7 Logic gates 345
- 8.8 Photoelectrons and X-rays 349
- 8.9 Radioactivity 352
- 8.10 The structure of the atom 357
- 8.11 Radioactive decay 361
- 8.12 Nuclear energy 366
- Further questions on section 8 370
- Revision check list 374
- Answers to numerical questions 378
- Index 382
