MODERN PHYSICS

B V N Rao

CONTENTS

Preface

vii

Chapter 1. INTRODUCTION

1

- 1.1 The Scope of Modern Physics 2
- 1.2 Review of Classical Physics 2

Chapter 2. SPECIAL THEORY OF RELATIVITY

7

- 2.1 Frames of Reference 7
- 2.2 Inertial Frames of Reference 7
- 2.3 The Earth as an Inertial Frame 9
- 2.4 Galilean Transformation Formulae 9
- 2.5 Newtonian Relativity 10
- 2.6 Newtonian Relativity and Electromagnetism 11
- 2.7 The Michelson-Morley Experiment 11
- 2.8 Einstein's Postulates 14
- 2.9 Lorentz Transformation Equations 15
- 2.10 Lorentz-Fitzgerald Contraction 18
- 2.11 Time Dilation 19
- 2.12 Proper Frame, Proper Length and Proper Time 20
- 2.13 Concept of Simultaneity in Relativity 20
- 2.14 Relativistic Velocity Transformation Equations 21
- 2.15 No Signal can travel faster than Light 23
- 2.16 Relativistic Mass Variation 24
- 2.17 Einstein's Mass-Energy Relation 29
- 2.18 Conservation of Mass-Energy 30
- 2.19 Momentum and Energy Relationship 32

Chapter 3. ELECTROMAGNETISM

41

- 3.1 Displacement Current 41
- 3.2 Total Current 42
- 3.3 The Equation of Continuity 43

3.4	Gauss's Theorem	43
3.5	Biot-Savart Law	44
3.6	Faraday's Law	45
3.7	Ampere's Theorem	46
3.8	Maxwell's Equations	48
3.9	Physical Significance of Maxwell's Equations	48
3.10	Consistency of Maxwell's Equations with the Law of Conservation of Energy	49
3.11	Maxwell's Equations under Static Conditions	49
3.12	Interdependence of Maxwell's Equations	50
3.13	The Electromagnetic Wave and Its Velocity	51
3.14	Plane Electromagnetic Waves in a Dielectric Medium	52
3.15	Relation between the Electric and Magnetic Vectors	54
3.16	Electromagnetic Wave in a Conducting Medium	55
3.17	Poynting Vector	58
3.18	Energy in an Electromagnetic Field	60

Chapter 4. THE ELECTRON 64

- 4.1 Dunnington's Method of Finding the Specific Charge of the Electron 64
- 4.2 Millikan's Oil Drop Experiment for the determination of the Electronic Charge 67

Chapter 5. BOHR'S THEORY OF THE HYDROGEN ATOM 75

- 5.1 The Breakdown of Classical Theory 75
- 5.2 The Hydrogen Spectrum 77
- 5.3 Bohr's Model of the Hydrogen Atom 78
- 5.4 Energy Level Diagrams 82
- 5.5 The Spectrum of Ionised Helium 84
- 5.6 Finite Mass Correction 85
- 5.7 Ratio of the Electron Mass to Proton Mass 87
- 5.8 Hydrogen-like Spectra 87
- 5.9 Sommerfeld's Elliptic Orbits 88
- 5.10 Critical Potentials 92

Chapter 6. VECTOR MODEL OF THE ATOM 102

- 6.1 The Gyromagnetic Ratio 102
- 6.2 Spectral Series 104
- 6.3 The Bohr Magneton 105
- 6.4 The Spinning Electron 106
- 6.5 Electron Spin-Orbit Interaction 107

- 6.6 Spectral Terms and Their Notation 109
- 6.7 Selection Rules 109
- 6.8 Space Quantisation 110
- 6.9 The Lande g Factor 112
- 6.10 The Stern-Gerlach Experiment 113
- 6.11 Explanation of the Results of the Stern-Gerlach Experiment 114
- 6.12 Fine Structure of the Hydrogen Lines 115

Chapter 7. INTERACTION WITH EXTERNAL FIELDS 121

- 7.1 Zeeman Effect 121
- 7.2 Quantum Theory of Normal Zeeman Effect 122
- 7.3 Anomalous Zeeman Effect 124
- 7.4 Anomalous Zeeman Pattern of the Sodium D Lines 125
- 7.5 The Paschen-Back Effect 127
- 7.6 The Stark Effect 129

Chapter 8. PAULI'S EXCLUSION PRINCIPLE 133

- 8.1 Quantum Numbers 133
- 8.2 Pauli's Exclusion Principle 134
- 8.3 The Bohr-Stoner Scheme 135
- 8.4 Explanation of the Periodic Table of Elements 135

Chapter 9. X-RAYS 141

- 9.1 Discovery of X-Rays 141
- 9.2 Production of X-Rays 141
- 9.3 Properties of X-Rays 142
- 9.4 X-Ray Diffraction 143
- 9.5 Crystal Structure : Miller Indices 144
- 9.6 Imperfections in Crystals 146
- 9.7 Bragg's Law 150
- 9.8 Bragg's X-ray Spectrometer 153
- 9.9 Verification of Bragg's Law 153
- 9.10 Powder Method of X-Ray Analysis 154
- 9.11 X-ray Spectra 155
- 9.12 Moseley's Law 156
- 9.13 Bremsstrahlung and Production of Continuous X-rays 157
- 9.14 The Origin of the Characteristic X-rays 158
- 9.15 X-ray Energy Levels 159

Chapter 10. THE LASER

- 10.1 Interaction between Energy Levels and Electromagnetic Radiation 170
- 10.2 The Laser Action 171
- 10.3 Population Inversion 171
- 10.4 The Ruby Laser 173
- 10.5 The Helium-Neon Laser 174
- 10.6 Efficiency of a Laser 175
- 10.7 The Men behind the Laser 175

Chapter 11. MOLECULAR SPECTRA

- 11.1 Energy of a Molecule 177
- 11.2 Electron Transition 177
- 11.3 Vibrational Transitions 178
- 11.4 Rotational Transitions 179
- 11.5 Molecular Spectra 179
- 11.6 The Fortrat Diagram 179
- 11.7 Infra-Red Spectra 180
- 11.8 Nuclear Magnetic Resonance 181
- 11.9 Applications of Molecular Spectroscopy 181

Chapter 12. SCATTERING OF LIGHT

- 12.1 Rayleigh's Formula 183
- 12.2 Colour of the Sky, Setting Sun and Smoke 185
- 12.3 Polarisation of Scattered Light 186
- 12.4 Raman Effect 186
- 12.5 Experimental Study of Raman Effect 186
- 12.6 Quantum Theory of Raman Effect 187
- 12.7 Distinction between Raman Effect and Rayleigh Scattering 188
- 12.8 Applications of Raman Effect 189
- 12.9 Laser Raman Spectroscopy 189

Chapter 13. PARTICLE PROPERTIES OF WAVES

- 13.1 Newton's Corpuscular Theory of Light 192
- 13.2 Huyghen's Wave Theory of Light 192
- 13.3 Further Evidence 192
- 13.4 The Inconsistencies in Huyghens' Theory 193
- 13.5 The Electromagnetic Theory of Light 193
- 13.6 The Quantum Theory of Radiation 194
- 13.7 Black Body Radiation 194
- 13.8 The Photoelectric Effect 198
- 13.9 Einstein's Theory of the Photoelectric Effect 199

- 13.10 The Photoelectric Cell 201
 13.11 Applications of the Photoelectric Effect 203
 13.12 The Compton Effect 205
 13.13 Theory of the Compton Effect 207

Chapter 14. WAVELIKE PROPERTIES OF PARTICLES 215

- 14.1 The de Broglie Equation 215
 14.2 The Wave Function 216
 14.3 The Velocity of the de Broglie Wave 217
 14.4 The Davisson and Germer Experiment 221
 14.5 The Principle of Complementarity 224
 14.6 Why the Wave Nature of Matter is not Apparent in Our Daily Observation 225
 14.7 Heisenberg's Uncertainty Principle 225
 14.8 Alternate Form of Heisenberg's Principle 228
 14.9 The Gamma Ray Microscope 228
 14.10 Possibility of the Electron's Existence inside the Nucleus 230
 14.11 Bohr's Quantum Condition and Matter Waves 232

Chapter 15. THE SCHRÖDINGER EQUATION 239

- 15.1 Introduction 239
 15.2 The Wave Equation 240
 15.3 State Function 240
 15.4 Schrödinger's Equation 241
 15.5 Schrödinger's Equation—Steady State Form 242
 15.6 Free Particle 243
 15.7 Particle in One Dimensional Box 244
 15.8 The Harmonic Oscillator 247
 15.9 The Hydrogen Atom 250
 15.10 Quantum Effects in the Domain of Everyday Life 251

Chapter 16. BASIC NUCLEAR PROPERTIES 256

- 16.1 Introduction 256
 16.2 Geiger and Marsden's Experiment 256
 16.3 Rutherford's Theory of Alpha Ray Scattering 258
 16.4 Nuclear Mass—Mass Spectrograph 264
 16.5 Aston's Mass Spectrograph 264
 16.6 Theory of Aston's Mass Spectrograph 266
 16.7 Constituents of the Nucleus 269
 16.8 What Holds the Nucleons Together? 270
 16.9 Binding Energy of Nucleus 271
 16.10 Nuclear Stability 273
 16.11 The Size of the Nucleus 274

16.14	Magnetic Moment of the Neutron	276
16.15	The Shape of the Nucleus	277
16.16	The Liquid Drop Model of the Nucleus	277

Chapter 17. RADIOACTIVITY

283

17.1	Introduction	285
17.2	Radioactive Decay	285
17.3	Half-Life	286
17.4	Mean Life	287
17.5	Activity	288
17.6	Successive Disintegration	288
17.7	Radioactive Displacement Laws	291
17.8	Theory of Alpha Ray Emission	291
17.9	Fine Structure of Alpha Ray Spectra and Nuclear Energy Levels	293
17.10	Beta Ray Spectra—Neutrino Hypothesis	294
17.11	Gamma Ray Emission	296
17.12	The Mossbauer Effect	296
17.13	Half-Life of the Neutron	296
17.14	Transuranic Elements	297
17.15	Radioactive Series	301
17.16	Hydraulic Analogy	304
17.17	Radioactive Dating	305

Chapter 18. PARTICLE DETECTORS

312

18.1	Interaction of <u>Charged Particles with Matter</u>	312
18.2	Wilson Cloud Chamber	313
18.3	Behaviour of Ion Pairs in Electric Fields	314
18.4	The Ionisation Chamber	317
18.5	Proportional Counter	317
18.6	The Geiger-Muller Counter	318
18.7	Uses of Ionisation Instruments	319

Chapter 19. PARTICLE ACCELERATORS

320

19.1	The Cyclotron	320
19.2	The Electron Synchrotron	322
19.3	The Proton-Synchrotron	324

Chapter 20. NUCLEAR REACTIONS

330

20.1	Introduction	330
20.2	Classification of Nuclear Reactions	331

20.3	The Compound Nucleus	331
20.4	Conservation Laws	332
20.5	The Energetics of Nuclear Reactions	333
20.6	Reaction Cross Sections	334
20.7	Interaction of Neutrons with Nuclei	335
20.8	Induced Radioactivity	336
20.9	Applications of Nuclear Reactions	337

Chapter 21. ELEMENTARY PARTICLES 341

21.1	Introduction	341
21.2	Classification of Elementary Particles	343
21.3	The Leptons	343
21.4	The Mesons	343
21.5	The Baryons	344
21.6	Antiparticles	344
21.7	Fundamental Interactions	345
21.8	Conservation Laws	346
21.9	The Quark Model	348

Chapter 22. STATISTICAL PHYSICS 350

22.1	Introduction	350
22.2	Degenerate and Nondegenerate Ensembles	351
22.3	Classical and Quantum Statistics	352
22.4	Distribution Function	352
22.5	Maxwell-Boltzmann Distribution	353
22.6	Dulong and Petit's Law	353
22.7	Einstein's Theory of the Specific Heats of Solids	354
22.8	Fermi-Dirac Distribution	357
22.9	Electron Distribution in a Metal at Absolute Zero	357
22.10	Fermi Energy of Electron Gas in a Metal	359
22.11	Effect of Rise of Temperature on Electron Density	359
22.12	Richardson-Dushman Formula	360

Chapter 23. THE SOLID STATE 366

23.1	Introduction	366
23.2	The Ionic Bond	366
23.3	Ionic Crystals	368
23.4	Properties of Ionic Solids	371
23.5	The Covalent Bond	371
23.6	Properties of the Covalent Bond	374
23.7	The Metallic Bond	375
23.8	The Hydrogen Bond	375

23.9	Comparison between Various Kinds of Bonds	376
23.10	Electron Drift in an Electric Field	376
23.11	Classical Free Electron Theory of Metals	379
23.12	The Band Theory of Solids	381
23.13	Intrinsic Semiconductors	385
23.14	Concept of Holes	386
23.15	Effective Mass	387
23.16	Carrier Concentration in an Intrinsic Semiconductor	387
23.17	Extrinsic Semiconductors	390
23.18	Transport Properties of Semiconductors	393
23.19	The Hall Effect	396
23.20	Determination of the Hall Coefficient	398
23.21	The Optical Properties of Solids	399
23.22	The Thermistor	400
23.23	Measurement of the Energy Gap in a Semiconductor	402
23.24	Superconductivity	403

Chapter 24. ELECTRICAL NETWORKS

412

24.1	Circuit Elements	412
24.2	Kirchhoff's Current Law	413
24.3	Kirchhoff's Voltage Law	413
24.4	Network Analysis Using Kirchhoff's Laws	414
24.5	Mesh Current or Loop Current Method	415
24.6	Node-Voltage Method	416
24.7	Condition for Balance of a Wheatstone Net by Mesh Current Method	416

Chapter 25. LCR CIRCUITS—DC CURRENTS

426

25.1	Circuit Transients	426
25.2	Growth of Current in a Circuit containing a Resistance and an Inductance	426
25.3	Decay of Current in a Circuit containing an Inductance and Resistance	428
25.4	Charging a Capacitor through a Resistance	430
25.5	Discharge of a Capacitor through a Resistance	432
25.6	Discharge of a Capacitor through a Resistance and Inductance	433

Chapter 26. ALTERNATING CURRENTS

442

26.1	Sinusoidal Alternating Current	442
26.2	Effects of an Alternating Current	443
26.3	Root Mean Square Value of an Alternating Current	443

- 26.4 The Mean Value of an Alternating Current 444
- 26.5 Application of an Alternating Voltage to a Pure Resistance 444
- 26.6 Application of an Alternating Voltage to a Pure Inductance 445
- 26.7 Application of an Alternating Voltage to a Capacitor 446
- 26.8 Application of an Alternating Voltage to an LR Circuit 447
- 26.9 The j Operator 449
- 26.10 Application of an Alternating Potential to a CR Circuit 450
- 26.11 Application of an Alternating Potential to an LRC Circuit in Series 451
- 26.12 Power in an A.C. Circuit 452
- 26.13 Choke Coil 453
- 26.14 Series Resonance 454
- 26.15 Quality Factor 455
- 26.16 The Q Factor of a Series LRC Circuit and Selectivity 456
- 26.17 Parallel Resonance 459

Chapter 27. ELECTRON TUBES

467

- 27.1 Work Function 467
- 27.2 Modes of Electron Emission 468
- 27.3 Thermionic Emission 468
- 27.4 Types of Electron Tubes 469
- 27.5 Types of Cathodes 469
- 27.6 The Diode 470
- 27.7 Diode Characteristics 471
- 27.8 Diode Resistance 472
- 27.9 The Triode 472
- 27.10 Triode Characteristics 473
- 27.11 Triode Constants 474
- 27.12 Relation between the Triode Constants 475
- 27.13 Interelectrode Capacitances in a Triode 476
- 27.14 The Tetrode 476
- 27.15 The Pentode 478
- 27.16 Thyatron 479

Chapter 28. SEMICONDUCTOR DIODE

485

- 28.1 Theory of the p - n Junction 485
- 28.2 Use of Diodes in Rectifiers 493
- 28.3 Diode as a Half-Wave Rectifier 494
- 28.4 Peak Inverse Voltage in a Half-Wave Rectifier 496
- 28.5 Output dc Voltage and Current in a Half-Wave Rectifier 496
