

MODERN SPECTROSCOPY

Fourth Edition

J. MICHAEL HOLLAS

 WILEY

Contents

Preface to first edition	xiii
Preface to second edition	xv
Preface to third edition	xvii
Preface to fourth edition	xix
Units, dimensions and conventions	xxi
Fundamental constants	xxiii
Useful conversion factors	xxv
1 Some important results in quantum mechanics	1
1.1 Spectroscopy and quantum mechanics	1
1.2 The evolution of quantum theory	2
1.3 The Schrödinger equation and some of its solutions	8
1.3.1 The Schrödinger equation	9
1.3.2 The hydrogen atom	11
1.3.3 Electron spin and nuclear spin angular momentum	17
1.3.4 The Born–Oppenheimer approximation	19
1.3.5 The rigid rotor	21
1.3.6 The harmonic oscillator	23
Exercises	25
Bibliography	26
2 Electromagnetic radiation and its interaction with atoms and molecules	27
2.1 Electromagnetic radiation	27
2.2 Absorption and emission of radiation	27
2.3 Line width	34
2.3.1 Natural line broadening	34
2.3.2 Doppler broadening	35
2.3.3 Pressure broadening	36
2.3.4 Power, or saturation, broadening	36
2.3.5 Removal of line broadening	37
2.3.5.1 Effusive atomic or molecular beams	37
2.3.5.2 Lamb dip spectroscopy	37

Exercises	38
Bibliography	38

3 General features of experimental methods

3.1 The electromagnetic spectrum	41
3.2 General components of an absorption experiment	41
3.3 Dispersing elements	41
3.3.1 Prisms	41
3.3.2 Diffraction gratings	41
3.3.3 Fourier transformation and interferometers	48
3.3.3.1 Radiofrequency radiation	49
3.3.3.2 Infrared, visible and ultraviolet radiation	55
3.4 Components of absorption experiments in various regions of the spectrum	59
3.4.1 Microwave and millimetre wave	59
3.4.2 Far-infrared	61
3.4.3 Near-infrared and mid-infrared	62
3.4.4 Visible and near-ultraviolet	62
3.4.5 Vacuum- or far-ultraviolet	63
3.5 Other experimental techniques	64
3.5.1 Attenuated total reflectance spectroscopy and reflection-absorption infrared spectroscopy	64
3.5.2 Atomic absorption spectroscopy	64
3.5.3 Inductively coupled plasma atomic emission spectroscopy	66
3.5.4 Flash photolysis	67
3.6 Typical recording spectrophotometers for the near-infrared, mid-infrared, visible and near-ultraviolet regions	68
Exercise	70
Bibliography	70

4 Molecular symmetry

4.1 Elements of symmetry	73
4.1.1 n -Fold axis of symmetry, C_n	74
4.1.2 Plane of symmetry, σ	75
4.1.3 Centre of inversion, i	76
4.1.4 n -Fold rotation-reflection axis of symmetry, S_n	76
4.1.5 The identity element of symmetry, I (or E)	77
4.1.6 Generation of elements	77
4.1.7 Symmetry conditions for molecular chirality	78
4.2 Point groups	81
4.2.1 C_n point groups	82
4.2.2 S_n point groups	83
4.2.3 C_{nv} point groups	83
4.2.4 D_n point groups	83
4.2.5 C_{nh} point groups	83
4.2.6 D_{nd} point groups	84
4.2.7 D_{nh} point groups	84

4.2.8	T_d point group	85
4.2.9	O_h point group	85
4.2.10	K_4 point group	86
4.2.11	I_h point group	86
4.2.12	Other point groups	87
4.3	Point group character tables	87
4.3.1	C_{2v} character table	92
4.3.2	C_{3v} character table	96
4.3.3	$C_{\infty v}$ character table	97
4.3.4	I_h character table	97
4.4	Symmetry and dipole moments	102
	Exercises	102
	Bibliography	
5	Rotational spectroscopy	103
5.1	Linear, symmetric rotor, spherical rotor and asymmetric rotor molecules	103
5.2	Rotational infrared, millimetre wave and microwave spectra	103
5.2.1	Diatomic and linear polyatomic molecules	103
5.2.1.1	Transition frequencies or wavenumbers	110
5.2.1.2	Intensities	111
5.2.1.3	Centrifugal distortion	112
5.2.1.4	Diatomic molecules in excited vibrational states	112
5.2.2	Symmetric rotor molecules	112
5.2.3	Stark effect in diatomic, linear and symmetric rotor molecules	112
5.2.4	Asymmetric rotor molecules	112
5.2.5	Spherical rotor molecules	112
5.2.6	Interstellar molecules detected by their radiofrequency, microwave or millimetre wave spectra	112
5.3	Rotational Raman spectroscopy	12
5.3.1	Experimental methods	12
5.3.2	Theory of rotational Raman scattering	12
5.3.3	Rotational Raman spectra of diatomic and linear polyatomic molecules	12
5.3.4	Nuclear spin statistical weights	12
5.3.5	Rotational Raman spectra of symmetric and asymmetric rotor molecules	13
5.4	Structure determination from rotational constants	13
	Exercises	13
	Bibliography	
6	Vibrational spectroscopy	13
6.1	Diatomic molecules	13
6.1.1	Infrared spectra	14
6.1.2	Raman spectra	14
6.1.3	Anharmonicity	14
6.1.3.1	Electrical anharmonicity	14
6.1.3.2	Mechanical anharmonicity	14

6.1.4	Vibration-rotation spectroscopy	
6.1.4.1	Infrared spectra	
6.1.4.2	Raman spectra	
6.2	Polyatomic molecules	14
6.2.1	Group vibrations	14
6.2.2	Number of normal vibrations of each symmetry species	15
6.2.2.1	Non-degenerate vibrations	15
6.2.2.2	Degenerate vibrations	15
6.2.3	Vibrational selection rules	16
6.2.3.1	Infrared spectra	16
6.2.3.2	Raman spectra	16
6.2.4	Vibration-rotation spectroscopy	16
6.2.4.1	Infrared spectra of linear molecules	17
6.2.4.2	Infrared spectra of symmetric rotors	17
6.2.4.3	Infrared spectra of spherical rotors	17
6.2.4.4	Infrared spectra of asymmetric rotors	17
6.2.5	Anharmonicity	18
6.2.5.1	Potential energy surfaces	18
6.2.5.2	Vibrational term values	18
6.2.5.3	Local mode treatment of vibrations	18
6.2.5.4	Vibrational potential functions with more than one minimum	18
6.2.5.4(a)	Inversion vibrations	18
6.2.5.4(b)	Ring-puckering vibrations	18
6.2.5.4(c)	Torsional vibrations	19
	Exercises	19
	Bibliography	19
7	Electronic spectroscopy	199
7.1	Atomic spectroscopy	199
7.1.1	The periodic table	199
7.1.2	Vector representation of momenta and vector coupling approximations	201
7.1.2.1	Angular momenta and magnetic moments	201
7.1.2.2	Coupling of angular momenta	205
7.1.2.3	Russell-Saunders coupling approximation	206
7.1.2.3(a)	Non-equivalent electrons	206
7.1.2.3(b)	Equivalent electrons	210
7.1.3	Spectra of alkali metal atoms	213
7.1.4	Spectrum of the hydrogen atom	216
7.1.5	Spectra of helium and the alkaline earth metal atoms	219
7.1.6	Spectra of other polyelectronic atoms	222
7.2	Electronic spectroscopy of diatomic molecules	225
7.2.1	Molecular orbitals	225
7.2.1.1	Homonuclear diatomic molecules	225
7.2.1.2	Heteronuclear diatomic molecules	232
7.2.2	Classification of electronic states	233
7.2.3	Electronic selection rules	236
7.2.4	Derivation of states arising from configurations	237
7.2.5	Vibrational coarse structure	240
7.2.5.1	Potential energy curves in excited electronic states	240
7.2.5.2	Progressions and sequences	242

7.2.5.3 The Franck-Condon principle	246
7.2.5.4 Deslandres tables	250
7.2.5.5 Dissociation energies	250
7.2.5.6 Repulsive states and continuous spectra	253
7.2.6 Rotational fine structure	254
7.2.6.1 $^1\Sigma - ^1\Sigma$ electronic and vibronic transitions	254
7.2.6.2 $^1\Pi - ^1\Sigma$ electronic and vibronic transitions	257
7.3 Electronic spectroscopy of polyatomic molecules	260
7.3.1 Molecular orbitals and electronic states	260
7.3.1.1 AH_2 molecules	261
7.3.1.1(a) $\angle HAH = 180^\circ$	261
7.3.1.1(b) $\angle HAH = 90^\circ$	263
7.3.1.2 Formaldehyde (H_2CO)	265
7.3.1.3 Benzene	267
7.3.1.4 Crystal field and ligand field molecular orbitals	270
7.3.1.4(a) Crystal field theory	271
7.3.1.4(b) Ligand field theory	273
7.3.1.4(c) Electronic transitions	275
7.3.2 Electronic and vibronic selection rules	275
7.3.3 Chromophores	278
7.3.4 Vibrational coarse structure	278
7.3.4.1 Sequences	279
7.3.4.2 Progressions	279
7.3.4.2(a) Totally symmetric vibrations	279
7.3.4.2(b) Non-totally symmetric vibrations	283
7.3.5 Rotational fine structure	284
7.3.6 Diffuse spectra	287
Exercises	288
Bibliography	

8 Photoelectron and related spectroscopies

	289
8.1 Photoelectron spectroscopy	289
8.1.1 Experimental methods	291
8.1.1.1 Sources of monochromatic ionizing radiation	291
8.1.1.2 Electron velocity analysers	294
8.1.1.3 Electron detectors	294
8.1.1.4 Resolution	295
8.1.2 Ionization processes and Koopmans' theorem	297
8.1.3 Photoelectron spectra and their interpretation	297
8.1.3.1 Ultraviolet photoelectron spectra of atoms	298
8.1.3.2 Ultraviolet photoelectron spectra of molecules	298
8.1.3.2(a) Hydrogen	300
8.1.3.2(b) Nitrogen	302
8.1.3.2(c) Hydrogen bromide	305
8.1.3.2(d) Water	305
8.1.3.2(e) Benzene	307
8.1.3.3 X-ray photoelectron spectra of gases	313
8.1.3.4 X-ray photoelectron spectra of solids	315
8.2 Auger electron and X-ray fluorescence spectroscopy	317
8.2.1 Auger electron spectroscopy	317
8.2.1.1 Experimental method	

8.2.1.2	Processes in Auger electron ejection	31
8.2.1.3	Examples of Auger electron spectra	31
8.2.2	X-ray fluorescence spectroscopy	31
8.2.2.1	Experimental method	31
8.2.2.2	Processes in X-ray fluorescence	31
8.2.2.3	Examples of X-ray fluorescence spectra	31
8.3	Extended X-ray absorption fine structure	31
	Exercises	31
	Bibliography	31
9	Lasers and laser spectroscopy	31
9.1	General discussion of lasers	31
9.1.1	General features and properties	31
9.1.2	Methods of obtaining population inversion	34
9.1.3	Laser cavity modes	34
9.1.4	Q-switching	34
9.1.5	Mode locking	34
9.1.6	Harmonic generation	34
9.2	Examples of lasers	34
9.2.1	The ruby and alexandrite lasers	34
9.2.2	The titanium-sapphire laser	34
9.2.3	The neodymium-YAG laser	34
9.2.4	The diode or semiconductor laser	35
9.2.5	The helium-neon laser	35
9.2.6	The argon ion and krypton ion lasers	35
9.2.7	The nitrogen (N ₂) laser	35
9.2.8	The excimer and exciplex lasers	35
9.2.9	The carbon dioxide laser	35
9.2.10	The dye lasers	36
9.2.11	Laser materials in general	36
9.3	Uses of lasers in spectroscopy	36
9.3.1	Hyper Raman spectroscopy	36
9.3.2	Stimulated Raman spectroscopy	36
9.3.3	Coherent anti-Stokes Raman scattering spectroscopy	36
9.3.4	Laser Stark (or laser electron resonance) spectroscopy	37
9.3.5	Two-photon and multiphoton absorption	37
9.3.6	Multiphoton dissociation and laser separation of isotopes	37
9.3.7	Single vibronic level, or dispersed, fluorescence	37
9.3.8	Light detection and ranging (LIDAR)	38
9.3.9	Cavity ring-down spectroscopy	38
9.3.10	Femtosecond spectroscopy	39
9.3.11	Spectroscopy of molecules in supersonic jets	39
9.3.11.1	Properties of a supersonic jet	39
9.3.11.2	Fluorescence excitation spectroscopy	40
9.3.11.3	Single vibronic level, or dispersed, fluorescence spectroscopy	40
9.3.11.4	Zero kinetic energy photoelectron spectroscopy	40
	Exercises	40
	Bibliography	40

Appendix

- A. Characterization of the
- B. Representative species of the
