Contents

Simple Motion

	xxii
1.1 Vectors and Scalars	2
1.2 Position and Displacement	3
1.3 Distance and Displacement	5
1.4 Uniform Motion	5
1.5 Speed and Velocity	7
1.6 Graphing Motion	9
1.7 Motion at Different Velocities	13
1.8 Average Velocity and Average Speed	16
1.9 Velocity at a Point	19
Investigations	
Preamble	21
1.1 The Period of a Recording Timer	23
1.2 Uniform Motion	24
1.3 Uniform Motion	25
1.4 A Challenge	27
Chapter Summary	27
Chapter Review	28

Velocity and Acceleration

	34
2.1 Acceleration	36
2.2 Velocity-Time Graphs and Acceleration	38
2.3 Positive, Negative, and Zero Accelerations	40
2.4 Displacement from a Velocity-Time Graph	42
2.5 Equations for Motion with Uniform Acceleration	44
2.6 Changing Acceleration	48
Investigations	
2.1 Motion on an Inclined Plane	52
2.2 Chain Sliding from a Desktop	53
2.3 Motion of a Pendulum	54
Chapter Summary	55
Chapter Review	56
Physics Connects to Biology Acceleration and the Human Body	61

Vectors

62

- 3.1 Vector Diagrams 64
- 3.2 Vector Addition 65
- 3.3 Speed and Velocity 66
- 3.4 Velocity Vectors in One Dimension 66
- 3.5 Velocity Vectors in Two Dimensions 68
- 3.6 Airplane Navigation Problems 70
- 3.7 Uniform Circular Motion 72

Chapter Summary 77

Chapter Review 78

Careers Meet Arlene Yakeley . . . Air Traffic Controller 81

Bodies in Free Fall

82

- 4.1 How Do Things Fall? 84
- 4.2 Free Fall Analyzed 87
- 4.3 Gravity and the Pendulum 89
- 4.4 Gravimetry 91

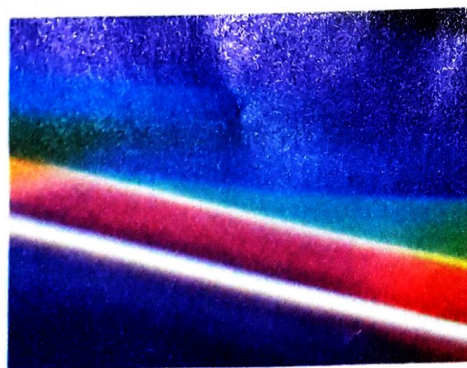

Investigations

- 4.1 Gravity 92
- 4.2 Falling Objects and Air 92
- 4.3 Motion of a Freely Falling Object 93
- 4.4 Motion of a Freely Falling Body 95
- 4.5 Gravity and the Pendulum 96

Chapter Summary 96

Chapter Review 97

Careers Meet Diana Gonzalez . . . Teacher 99

Forces

100

- 5.1 Kinds of Force 102
- 5.2 The Force of Gravity 103
- 5.3 Variations in Gravitational Field Strength 106
- 5.4 Satellites in Orbit and Projectiles 108
- 5.5 The Law of Universal Gravitation 109
- 5.6 Hooke's Law 110
- 5.7 Frictional Forces 113
- 5.8 Adding Force Vectors 115

Physics Connects to Space Science The Sensation of Weightlessness

118

Investigations

5.1 Mass and the Force of Gravity

120

5.2 Sliding Friction

120

Chapter Summary

122

Chapter Review

123

Newton's Laws of Motion

126

6.1 Galileo Looks at Force and Motion

128

6.2 Newton's First Law (The Law of Inertia)

131

6.3 Newton's Second Law: Motion with Unbalanced Forces

135

6.4 Newton's Third Law

139

6.5 Using Newton's Laws

145

6.6 Motion and Momentum

149

6.7 Momentum and Impulse

150

6.8 Conservation of Momentum

152

Investigations

6.1 Newton's Second Law

159

6.2 Testing Newton's Laws

162

Physics Connects to Health and Safety Wear Your Seat Belt

165

Chapter Summary

166

Chapter Review

166

Work, Power, and Energy

172

7.1 Work

174

7.2 Power

178

7.3 Another Unit for Work

179

7.4 Energy

180

7.5 Gravitational Potential Energy

185

7.6 Kinetic Energy

187

7.7 Conservation of Energy

190

7.8 Machines

195

7.9 Efficiency

197

7.10 Energy and Society

199

7.11 Sources of Energy

201

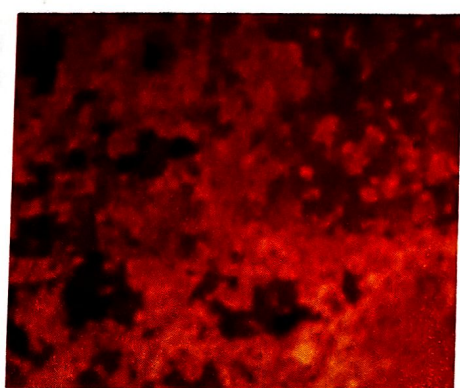

7.12 The Flow of Energy

205

7.13 Alternate Sources of Energy

207

Investigations	
7.1 Power Running Up Stairs	210
7.2 The Pendulum and Mechanical Energy	210
7.3 The Inclined Plane	212
7.4 Total Energy of a Toy Car	213
Careers Meet Caesar Wheeler . . . Civil Engineer	215
Chapter Summary	216
Chapter Review	217

Thermal Energy 224

8.1 Kinetic Theory of Matter	226
8.2 Temperature	228
8.3 Thermal Expansion	229
8.4 Thermal Energy	233
8.5 Heat Exchange in Mixtures	237
8.6 Change of State and Latent Heat	240
8.7 Thermodynamics, Heat, and Work	244
8.8 Conservation of Heat Energy in the Home	249
8.9 Applications: Solar Homes	251

Investigations

8.1 Coefficient of Linear Expansion	254
8.2 Heat and Work	255
8.3 Specific Heat Capacity	256
8.4 Latent Heat of Fusion	257
8.5 Latent Heat of Vaporization	258

Chapter Summary	259
Chapter Review	261

Fluids 266

9.1 Density and Relative Density	268
9.2 Pressure in Fluids	271
9.3 Pascal's Principle	278
9.4 Buoyancy and Archimedes' Principle	282
9.5 Bernoulli's Principle	291
9.6 Applications: Bernoulli's Principle	294

Investigations

9.1 Pressure in a Liquid	295
9.2 Buoyant Forces—Archimedes' Principle	297
9.3 The Law of Flotation	298

Chapter Summary
Chapter Review

299
301

Careers Meet a Meteorologist . . . Michael LePage

305

10

The Properties and Behavior of Waves

306

10.1	What Are Waves?	308
10.2	Vibrations	308
10.3	Wave Motion	311
10.4	Transmission of Waves	314
10.5	Transmission and Reflection	317
10.6	Waves in Two Dimensions	319
10.7	Interference of Waves	323
10.8	Standing Waves—A Special Case of Interference in a One-Dimensional Medium	325
10.9	Interference of Water Waves	327

Investigations

10.1	Analyzing the Motion of a Pendulum	329
10.2	Transmission and Reflection of a One-Dimensional Transverse Wave	330
10.3	Longitudinal Waves	331
10.4	Water Waves—Transmission and Reflection	332
10.5	Interference of Waves in a One-Dimensional Medium	334
10.6	Standing Waves in a One-Dimensional Medium	335
10.7	Interference of Water Waves in a Ripple Tank	336

Chapter Summary
Chapter Review

337
339

Physics Connects to Earth Science Earthquake Waves

346

11

The Production and Properties of Sound

348

11.1	What Is Sound?	350
11.2	The Speed of Sound	352
11.3	Mach Number	353
11.4	The Transmission of Sound Waves	354
11.5	The Intensity of Sound	355

11.6	The Human Ear	357
11.7	The Reflection of Sound Waves	360
11.8	Applications: Acoustics in Buildings	364
11.9	Diffraction and Refraction of Sound Waves	365
	Careers Meet Cindy Martindale . . . Ultrasound Technologist	367
	Investigation	
11.1	Speed of Sound—Echo Method	368
	Chapter Summary	369
	Chapter Review	369

12

	The Interference of Sound Waves	374
12.1	Interference of Identical Sound Waves	376
12.2	Beat Frequency	379
12.3	Vibrating Strings	381
12.4	Modes of Vibration—Quality of Sound	384
12.5	Mechanical Resonance	386
12.6	Resonance in Air Columns	388
12.7	Applications: Music and Musical Instruments	390
12.8	Sonic Booms	393
12.9	The Doppler Effect	396
	Investigations	
12.1	Interference in Sound Waves from a Tuning Fork and Two Loudspeakers	397
12.2	Resonance in Closed Air Columns	399
12.3	Speed of Sound in an Air Column Closed at One End	400
	Chapter Summary	401
	Chapter Review	402

13

	Light Rays and Reflection	408
13.1	What Is Light?	410
13.2	The Speed of Light	412
13.3	The Transmission of Light	415
13.4	The Pinhole Camera	416
13.5	Laws of Reflection	418
13.6	Images in a Plane Mirror	419
13.7	Applications: Plane Mirrors	422

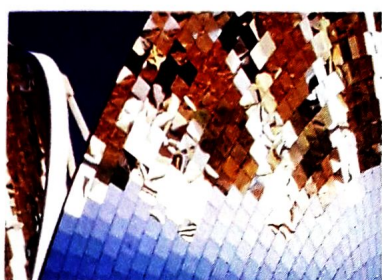

Investigations

13.1	Images in a Pinhole Camera	427
13.2	Reflection in a Plane Mirror	428
13.3	Locating Images in a Plane Mirror	429

Chapter Summary	430
-----------------	-----

Technology Using Light for Distance Measurement	431
--	-----

Chapter Review	432
----------------	-----

14**Curved Mirrors****436**

14.1	Curved Reflectors	438
14.2	Reflection in a Converging Mirror	439
14.3	Images in a Converging Mirror	440
14.4	Images Formed by Diverging Mirrors	442
14.5	Equations for Curved Mirrors	445
14.6	Spherical Aberration	448
14.7	Applications: Curved Mirrors	449

Investigation

14.1	Images Formed by a Converging Mirror	452
------	--------------------------------------	-----

Chapter Summary	454
-----------------	-----

Chapter Review	455
----------------	-----

Physics Connects to Astronomy Seeing the Edge of the Universe

460

15**Refraction of Light****462**

15.1	Refraction	464
15.2	Index of Refraction	465
15.3	Laws of Refraction	467
15.4	Snell's Law—A General Equation	469
15.5	Total Internal Reflection and the Critical Angle	470
15.6	Lateral Displacement and Deviation of Light Rays	473
15.7	Applications: Refraction	474

Investigations

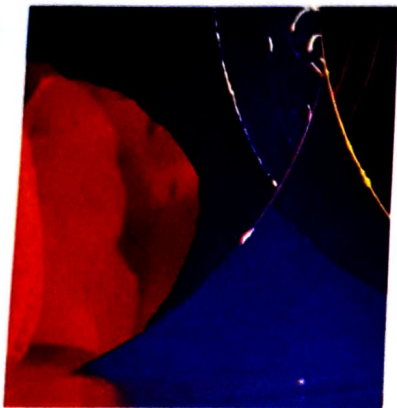

15.1	Refraction of Light—Air into Glass	478
15.2	Refraction of Light—Glass into Air	479

Careers Meet Blair Wong . . . Optician	481
---	-----

Chapter Summary	482
-----------------	-----

Chapter Review	482
----------------	-----

16

Lenses and Their Applications

488

- 16.1 Lenses 490
- 16.2 Refraction in Lenses 491
- 16.3 Images Formed by Converging Lenses 492
- 16.4 Images Formed by Diverging Lenses 495
- 16.5 The Thin Lens Equation 497
- 16.6 The Camera 500
- 16.7 The Human Eye 501
- 16.8 Defects in Vision and Their Correction 502

Physics Connects to Medicine Cataracts

505

- 16.9 **Applications:** Lenses 506

Investigation

- 16.1 Images Formed by a Converging Lens 508

Chapter Summary 510

Chapter Review 511

17

Light and Color

516

- 17.1 Dispersion and Recomposition 518
- 17.2 Color by Subtraction 519

Physics Connects to Biology The Theory of Color Vision

522

- 17.3 Color by Addition 524
- 17.4 Infrared and Ultraviolet Radiation 524
- 17.5 **Applications:** Color and Light 526

Investigations

- 17.1 Dispersion in a Prism 529

- 17.2 Color by Subtraction 530

Chapter Summary 531

Chapter Review 532

18

Electrostatics

534

- 18.1 Electrification 536
- 18.2 Electrical Structure of Matter 538
- 18.3 Transfer of Electric Charge 539
- 18.4 **Applications:** Electric Discharge 545
- 18.5 Electric Fields 549
- 18.6 Measuring Electric Charge 551

Investigations

18.1 Electric Charge and Forces	554
18.2 Induced Charge Separation	555
18.3 Charging by Contact	556
18.4 Charging by Induction	557
18.5 An Experiment Similar to Millikan's	558

Chapter Summary	559

----------------	-----

Magnetism

- 21.1 Magnetism and Magnetic Forces
- 21.2 Magnetic Fields
- 21.3 Magnetic Field of the Earth
- 21.4 Magnetic Materials: Induced Magnetism

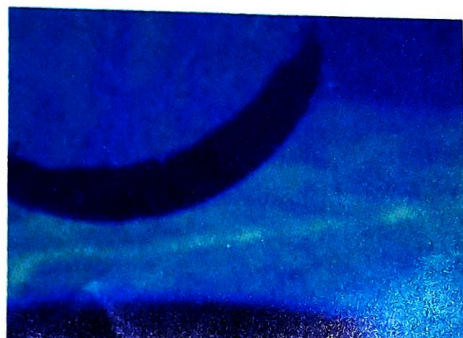

Investigation

- 21.1 Magnetic Fields

Chapter Summary

Chapter Review

Physics Connects to Earth Science Northern Lights

Electromagnetism

- 22.1 Electricity and Magnetism
- 22.2 Oersted's Discovery
- 22.3 The Magnetic Field of a Coil or Solenoid
- 22.4 Factors Affecting the Magnetic Field of a Coil
- 22.5 **Applications:** Electromagnetism
- 22.6 Conductor in a Magnetic Field—The Motor Principle
- 22.7 **Applications:** The Motor Principle

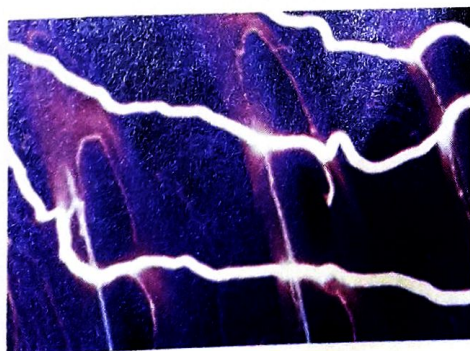

Investigations

- 22.1 Magnetic Field of a Straight Conductor
- 22.2 Magnetic Field of a Coil
- 22.3 The Motor Principle
- 22.4 Constructing a Simple DC Motor

Technology Superconductivity

Chapter Summary

Chapter Review

Electromagnetic Induction

- 23.1 The Electromagnetic Age
- 23.2 Faraday's Discovery
- 23.3 The Magnitude of the Induced Electric Potential
- 23.4 The Direction of the Induced Current: Lenz's Law
- 23.5 Electrical Generators: AC and DC
- 23.6 The Victory of Alternating Current: The Transformer
- 23.7 Distribution of Electrical Energy

Investigations

- 23.1 Electromagnetic Induction
- 23.2 Factors Affecting Induction
- 23.3 Transformers
