MOTION
OF CHARGED
PARTICLES
IN ELECTRIC
AND MAGNETIC
FIELDS

MIR PUBLISHERS • MOSCOW

CONTENTS

PREFACE TO THE SECOND RUSSIAN EDITION	5
PREFACE TO THE FIRST RUSSIAN EDITION	5
CHAPTER I. MOTION IN AN ELECTRIC FIELD	9
§ 1. The force acting on a charged particle. Equations of motion	9
§ 2. The analogy between the motion of charged particles in electrostatic fields and propagation of light beams in transparent media	11
§ 3. Centred electron-optical systems. The basic equation of electron optics for axially symmetric fields	15
§ 4. Focussing in axially symmetric fields. The Helmholtz-Lagrange equation. The thin lens	21
§ 5. Approximation techniques in electron optics	28
§ 6. Electronic devices with electrostatic fields	31
CHAPTER II. MOTION IN A MAGNETIC FIELD	56
§ 7. Motion in a uniform magnetic field	56
§ 8. Axially symmetric magnetic fields. Short-coil focussing	60
§ 9. The electron microscope	64
§ 10. Motion in a slowly varying magnetic field. Adiabatic invariant	75
§ 11. Radiation belts of the Earth	83
§ 12. Focussing in crossed electric and magnetic fields. Strong focussing	92
CHAPTER III. MOTION IN COMBINED FIELDS	105
§ 13. Motion of charged particles under the effect of a uniform electric field and a uniform magnetic field	105
§ 14. General description of the motion of charged particles in combined fields	109

CONTENTS

8

§ 15. Mass spectroscopy	112
§ 16. Electromagnetic separation of isotopes	121
 CHAPTER IV. MOTION AT VELOCITIES COMPARABLE TO THE VELOCITY OF LIGHT. CYCLIC ACCELERATORS	
§ 17. Fundamental formulas of relativistic dynamics	128
§ 18. The cyclotron	128
§ 19. The betatron	133
§ 20. Modern high-energy accelerators	145
§ 21. Colliding-beam accelerators	156
 CHAPTER V. MOTION IN THE FIELD OF A POINT CHARGE	
§ 22. Scattering of charged particles in a Coulomb field. The Rutherford formula	177
 CHAPTER VI. PLASMA PHYSICS	
§ 23. Definition of plasma. Debye length	188
§ 24. Motion of electrons and ions in plasma (in the absence of external fields)	188
§ 25. Plasma in an electric field	195
§ 26. Plasma in a strong magnetic field	199
§ 27. Some applications of plasma physics. Controlled synthesis of light nuclei	206
	211
