	Interest rate changes	
	Open-market operations	
	The State and the money supply	

The five markets

The bill of exchange

The money and discount markets

The Bank of England and the discount market

The changing character of the discount market

The capital market

VI EXPENDITURE AND REVENUE OF THE STATE . . . 88

Objects of Government expenditure

Sources of Government revenue

Direct taxes

Indirect taxes

Some other taxes

Local rates

Taxable capacity

The National Debt

The burden of the National Debt

Management of the National Debt

PART II

INTERNATIONAL MONETARY RELATIONS

VII INTERNATIONAL MONETARY TRANSACTIONS . . . 111

International payments

International trade

Towards greater freedom of trade

The balance of payments

The balance of trade

The "invisible" balance

The balance on capital account

The character of the balance of payments

The question of balance

VIII THE PROBLEM OF EXCHANGE RATES: THE GOLD STANDARD . . . 130

The choice of a system

Stability, flexibility, convertibility

The gold standard and the forms it may take

Exchange rates on the gold standard

The gold standard and the internal situation

The gold standard and the external situation

The restored gold standard and its collapse

The United Kingdom leaves the gold standard

IX ALTERNATIVES TO THE GOLD STANDARD . . . 145

Flexible (or floating) exchange rates

Features of flexible exchange rates

Purchasing power parity
Exchange control
Exchange intervention
The regional gold reserve standard
The Bretton Woods Scheme

PART III

MONEY AS A DYNAMIC FACTOR

X	THE VALUE OF MONEY	165
	Meaning of the value of money	
	Changes in the value of money	
	Measurement of changes in the value of money	
	The early Quantity Theory	
	The improved Quantity Theory	
	The equation of exchange	
	The demand for money	
	The rate of interest	
XI	THE IMPORTANCE OF CHANGES IN THE VALUE OF MONEY	183
	The changing value of money	
	Prices and production	
	Redistribution of income	
	Types of inflation	
	Features of inflation	
XII	MONEY AND INDUSTRIAL FLUCTUATIONS	197
	The trade cycle	
	Features of industrial fluctuations	
	Full employment	
	Money and the trade cycle	
	Some real causes of fluctuations	
	Monetary theories of fluctuations	
	Under-consumption theories	
XIII	SAVING, INVESTMENT AND INCOME	211
	The two forms of production	
	The propensity to save and the propensity to consume	
	Investment and the marginal efficiency of capital	
	The determination of income	
	Equality of saving and investment	
	Differences between saving and investment	
XIV	MONETARY POLICY	221
	General purpose of monetary policy	
	Monetary policy and the internal situation	

Monetary policy and the external situation
 Instruments of monetary policy
 The efficacy of monetary policy
 Adjuncts to monetary policy
 The "package deal"
 Recent developments

PART IV

SOME OTHER BANKING SYSTEMS

XV BANKING IN NORTH AMERICA 241

General features of the U.S. banking system
 The commercial banks
 Functions of the U.S. commercial banks
 Central banking in the United States
 Functions of the Federal Reserve Banks
 Banking in Canada

XVI BANKING IN AUSTRALIA 262

Features of banking in Australia
 Functions of the Australian trading banks
 The importance of the sterling balances of the Australian
 banks
 Central banking in Australia

PART V

RECENT MONETARY DEVELOPMENTS

XVII AN OUTLINE OF MONETARY HISTORY (1945-74) . . . 275

I. THE EXTERNAL SITUATION

The Washington Loan Agreement (1945)
 The convertibility crisis (1947)
 Effects of the failure of convertibility
 Temporary setback to the Bretton Woods Scheme
 The European Payments Union
 The sterling area
 The devaluation of sterling (1949)
 The convertibility of sterling
 Steps towards convertibility
 Sterling crises

II. THE INTERNAL SITUATION

Cheap money with physical controls
 The problem of persistent inflation
 Full employment and inflation
 Taxation and inflation
 The control of inflation
