# Handbook of Nuclear Chemistry

*Second Edition*

Basics of Nuclear Science

# Table of Contents

|                            |       |
|----------------------------|-------|
| List of Contributors ..... | xxvii |
|----------------------------|-------|

## Volume 1

### Basics of Nuclear Science

|                                                          |     |
|----------------------------------------------------------|-----|
| 1 Nuclear and Radiochemistry: the First 100 Years .....  | 3   |
| <i>G. Friedlander · G. Herrmann</i>                      |     |
| 2 Basic Properties of the Atomic Nucleus .....           | 39  |
| <i>T. Fényes</i>                                         |     |
| 3 Nuclear Reactions .....                                | 143 |
| <i>L. G. Sobotka · V. E. Viola</i>                       |     |
| 4 Nuclear Fission .....                                  | 223 |
| <i>J. O. Denschlag</i>                                   |     |
| 5 Tunneling Through Triple-Humped Fission Barriers ..... | 281 |
| <i>A. Krasznahorkay</i>                                  |     |
| 6 Nuclear Fusion .....                                   | 319 |
| <i>G. Veres</i>                                          |     |
| 7 Kinetics of Radioactive Decay .....                    | 333 |
| <i>S. Nagy</i>                                           |     |
| 8 Interaction of Radiation with Matter .....             | 363 |
| <i>D. Horváth · A. Vértes</i>                            |     |
| 9 Stochastics and Nuclear Measurements .....             | 395 |
| <i>S. Nagy</i>                                           |     |
| 10 The Standard Model of Elementary Particles .....      | 457 |
| <i>D. Horváth</i>                                        |     |
| 11 Appendixes – Reference Data to Part I .....           | 475 |
| <i>G. L. Molnár · R. B. Firestone</i>                    |     |

## Volume 2

## Elements and Isotopes Formation, Transformation, Distribution

- 12 Origin of the Chemical Elements ..... 25  
*T. Raucher · A. Patkós*
- 13 Natural Radioactive Decay Chains ..... 26  
*H. C. Griffin*
- 14 Radioelements ..... 27  
*H. C. Griffin*
- 15 Isotope Effects ..... 28  
*G. Jancsó*
- 16 Isotopic Paleoclimatology ..... 29  
*R. Bowen*
- 17 Radioactive Dating Methods ..... 30  
*R. Bowen*
- 18 Production and Chemistry of Transuranium Elements ..... 31  
*Y. Nagame · M. Hirata · H. Nakahara*
- 19 Production and Identification of Transactinide Elements ..... 32  
*G. Münzenberg · M. Gupta*
- 20 Chemistry of Transactinides ..... 33  
*J. V. Kratz*
- 21 Superheavy Elements ..... 34  
*D. C. Hoffman · D. A. Shaughnessy*
- 22 Appendix to Part II – Table of Nuclides ..... 35  
*R. B. Firestone*

## Volume 3

## Chemical Applications of Nuclear Reactions and Radiations

- 23 Radiation Chemistry .....  
*L. Wojnárovits*
- 24 Hot Atom Chemistry .....  
*H. K. Yoshihara · T. Sekine*

|           |                                                                                                     |             |
|-----------|-----------------------------------------------------------------------------------------------------|-------------|
| <b>25</b> | <b>Mössbauer Spectroscopy</b> .....                                                                 | <b>1379</b> |
|           | <i>E. Kuzmann · Z. Homonnay · S. Nagy · K. Nomura</i>                                               |             |
| <b>26</b> | <b>Mössbauer Excitation by Synchrotron Radiation</b> .....                                          | <b>1447</b> |
|           | <i>M. Sete</i>                                                                                      |             |
| <b>27</b> | <b>Positron Annihilation Spectroscopies</b> .....                                                   | <b>1461</b> |
|           | <i>K. Sliwegh · T. Marek</i>                                                                        |             |
| <b>28</b> | <b>Exotic Atoms and Muonium</b> .....                                                               | <b>1485</b> |
|           | <i>D. Horváth</i>                                                                                   |             |
| <b>29</b> | <b>Neutron Scattering Methods in Chemistry</b> .....                                                | <b>1515</b> |
|           | <i>L. Pusztai</i>                                                                                   |             |
| <b>30</b> | <b>Activation Analysis</b> .....                                                                    | <b>1553</b> |
|           | <i>R. Zeisler · N. Vajda · G. Kennedy · G. Lamaze · G. L. Molnár</i>                                |             |
| <b>31</b> | <b>Neutron-Induced Prompt Gamma Activation Analysis (PGAA)</b> .....                                | <b>1619</b> |
|           | <i>Z. Révay · R. M. Lindstrom · E. A. Mackey · T. Belgya</i>                                        |             |
| <b>32</b> | <b>Applications of Neutron Generators</b> .....                                                     | <b>1673</b> |
|           | <i>J. Csikai · R. Dóczi</i>                                                                         |             |
| <b>33</b> | <b>Chemical Applications of Ion Accelerators</b> .....                                              | <b>1695</b> |
|           | <i>E. Koltay · F. Pászti · Á. Z. Kiss</i>                                                           |             |
| <b>34</b> | <b>Microscopic X-ray Fluorescence Analysis with Synchrotron Radiation Sources</b> .....             | <b>1737</b> |
|           | <i>F. Adams · B. Vekemans · G. Silversmit · B. De Samber · L. Vincze</i>                            |             |
| <b>35</b> | <b>Tracer Technique</b> .....                                                                       | <b>1761</b> |
|           | <i>H. Haba · S. Motomura · S. Kamino · S. Enomoto</i>                                               |             |
| <b>36</b> | <b>Appendixes – Reference Data to Part III</b> .....                                                | <b>1793</b> |
|           | <i>Z. Homonnay · Z. Klencsár · R. B. Firestone · Z. Révay · G. L. Molnár · J. Csikai · R. Dóczi</i> |             |

## Volume 4

### Radiochemistry and Radiopharmaceutical Chemistry in Life Sciences

|           |                                                     |             |
|-----------|-----------------------------------------------------|-------------|
| <b>37</b> | <b>Introduction to the Fourth Volume</b> .....      | <b>1855</b> |
| <b>38</b> | <b>Reactor-Produced Medical Radionuclides</b> ..... | <b>1857</b> |
|           | <i>S. Mirzadeh · L. F. Mausner · M. A. Garland</i>  |             |

- 39 **Cyclotron Production of Medical Radionuclides** .....  
*S. M. Qaim*
- 40 **Radionuclide Generators** .....  
*F. Rösch · F. F. (Russ) Knapp*
- 41  **$^{11}\text{C}$ : Labeling Chemistry and Labeled Compounds** .....  
*G. Antoni · T. Kihlberg · B. Långström*
- 42  **$^{18}\text{F}$ : Labeling Chemistry and Labeled Compounds** .....  
*T. L. Ross · H. J. Wester*
- 43  **$^{99\text{m}}\text{Tc}$ : Labeling Chemistry and Labeled Compounds** .....  
*R. Alberto · U. Abram*
- 44 **Radioiodination Chemistry and Radioiodinated Compounds** .....  
*M. Eisenhut · W. Mier*
- 45 **Radiometals (non-Tc, non-Re) and Bifunctional Labeling Chemistry** .....  
*M. Fani · S. Good · H. R. Maecke*
- 46 **Radionuclide Therapy** .....  
*M. R. Zalutsky*

## Volume 5

### Instrumentation, Separation Techniques, Environmental Issues

- 47 **Dosimetry and Biological Effects of Ionizing Radiation** .....  
*B. Kanyár · G. J. Köteles*
- 48 **Radiation Detection** .....  
*H. C. Griffin*
- 49 **Dosimetry Methods** .....  
*W. L. McLaughlin · A. Miller · A. Kovács · K. K. Mehta*
- 50 **Particle Accelerators** .....  
*S. Biri · E. Koltay · A. Valek*
- 51 **Isotope Separation** .....  
*W. A. Van Hook*
- 52 **Solvent Extraction and Ion Exchange in Radiopharmaceuticals** .....

|           |                                                                    |             |
|-----------|--------------------------------------------------------------------|-------------|
| <b>53</b> | <b>Radiochemical Separations by Thermochromatography</b> . . . . . | <b>2429</b> |
|           | <i>A. F. Novgorodov · F. Rösch · N. A. Korolev</i>                 |             |
| <b>54</b> | <b>Methods of Cosmochemical Analysis</b> . . . . .                 | <b>2459</b> |
|           | <i>S. Lahiri · M. Maiti</i>                                        |             |
| <b>55</b> | <b>Environmental Radiation Protection</b> . . . . .                | <b>2503</b> |
|           | <i>Y. Maeda · S. Osaki · A. Vincze</i>                             |             |
| <b>56</b> | <b>Appendix – Reference Data to Part V</b> . . . . .               | <b>2565</b> |
|           | <i>R. B. Firestone · G. L. Molnár</i>                              |             |

## Volume 6

### Nuclear Energy Production and Safety Issues

|              |                                                                          |             |
|--------------|--------------------------------------------------------------------------|-------------|
| <b>57</b>    | <b>Technical Application of Nuclear Fission</b> . . . . .                | <b>2615</b> |
|              | <i>J. O. Denschlag</i>                                                   |             |
| <b>58</b>    | <b>Developments and Tendencies in Fission Reactor Concepts</b> . . . . . | <b>2663</b> |
|              | <i>E. O. Adamov · Y. Fuji-ie</i>                                         |             |
| <b>59</b>    | <b>Nuclear Power Sources for Space Systems</b> . . . . .                 | <b>2731</b> |
|              | <i>N. E. Kukharkin · N. N. Ponomarev-Stepnoi · V. A. Usov</i>            |             |
| <b>60</b>    | <b>Technical Developments for Harnessing Controlled Fusion</b> . . . . . | <b>2759</b> |
|              | <i>G. Veres · S. Zoletnik · W. Jacob</i>                                 |             |
| <b>61</b>    | <b>Radioactive Waste Management</b> . . . . .                            | <b>2797</b> |
|              | <i>P. A. Baisden · C. E. Atkins-Duffin</i>                               |             |
| <b>62</b>    | <b>Nuclear Forensic Materials and Methods</b> . . . . .                  | <b>2837</b> |
|              | <i>I. D. Hutcheon · P. M. Grant · K. J. Moody</i>                        |             |
| <b>63</b>    | <b>Nuclear Safeguards Verification Measurement Techniques</b> . . . . .  | <b>2893</b> |
|              | <i>M. Zendel · D. L. Donohue · E. Kuhn · S. Deron · T. Bíró</i>          |             |
| <b>Index</b> |                                                                          | <b>3017</b> |
