CONTENTS

PART I PROTOSTOMIA

1.	Animal Classification, Phylogeny and Organization	1
	Classification of Organisms	1
	A Taxonomic Hierarchy	2
	Nomenclature	3
	Molecular Approaches to Animal Systematics	3
	Kingdoms of Life	4
	Animal Systematics	8
	Evolutionary Relationships and Tree Diagrams	14
	Patterns of Organization	15
	Symmetry	16
	Other Patterns of Organization	19
	The Unicellular (Cytoplasmic) level of Organization	19
	Diploblastic Organization	20
	Triploblastic Organization	20
	Higher Animal Taxonomy	23
	Monophyletic	23
	Polyphyletic	23
	Taxonomic levels	25
	Protostomes	25
	Deuterostomes	25
2.	Animal-like Protists – The Protozoa	27
	Evolutionary Perspective	27
	Life within a single Plasma membrane	28
	Maintaining homeostasis	29
	Reproduction	30
	Symbiotic Life-styles	31
	Protozoan Taxonomy	32
	Phylum Sarcomastigophora	32
	Subphylum Mastigophora: Flagellar Locomotion	32
	Class Phytomastigophorea	32
	Class Zoomastigophorea	37
	Subphylum Sarcodina: Pseudopodia and Amoeboid Locomotion	39
	Superclass Rhizopoda, Class Lobosea	40

Superclass Actinopoda; Foraminiferans, Heliozoans and Radiolarians

Phylum Labyrinthomorpha 42

Phylum Apicomplexa..... 43

Class sporozoa 43

Phylum Microspora 44

Phylum Acetospora 47

Phylum Myxozoa 47

Phylum Ciliophora..... 48

Cilia and other pellicular structures 48

Nutrition..... 49

Genetic Control and Reproduction 50

Symbiotic Ciliates..... 52

Further Phylogenetic Considerations 52

Multicellular and Tissue Levels of Organization 53

Evolutionary Perspective..... 53

Origins of Multicellularity 53

Animal Origins..... 54

Phylum Porifera 56

Cell types, Body wall and Skeletons 56

Phagocytes 58

Mesenchyme cells 58

Choanocytes..... 58

Spicules 59

Water currents and Body forms 59

Ascon body form..... 60

Sycon body form..... 60

Leucon body form 60

Maintenance Functions..... 60

Feeding 61

Excretion and gas exchange..... 62

Nervous coordination and response to other stimuli ... 62

Reproduction..... 64

Classification of Phylum Porifera 64

Phylum Cnidaria (Coelenterata)..... 64

Characteristics 65

Classification of Phylum Cnidaria..... 65

The body wall and Nematocysts 66

Alternation of generations 67

Gastrovascular cavity	67
Feed and feeding	67
Support and Movement	68
Nerve cells	68
Sensory structures	68
Excretion	69
Reproduction	70
Class Hydrozoa	70
Obelia	70
Gonionemus	71
Hydra	73
Order Siphonophora – <i>Physalis physalis</i>	74
Class Scyphozoa	74
Aurelia	74
Class Cubozoa	77
Class Anthozoa	77
Sea anemones	77
Corals	79
Phylum Ctenophora	82
Characteristics	82
Classification	82
Pleurobranchia	82
Further Phylogenetic Consideration	83
4. The Triploblastic Acoelomate Body Plan	87
Evolutionary Perspective	87
Phylum Platyhelminthes	88
Characteristics	89
Classification	89
Class Turbellaria: The Free living flatworms	90
Characteristics	90
Body wall	90
Locomotion	91
Digestion and nutrition	92
Exchanges with the environment	93
Nervous system and Sense organs	94
Reproduction and Development	95
Class Monogenea	98
Ectoparasites	98
Class Trematoda	98
Characteristics	98

7.

v1

Further Phylogenetic Considerations	
Annelida	191
Evolutionary perspective	192
Characteristics	193
Classification	194
Relationships to other animals	195
Metamerism and Tagmatization	196
Relationship between Annelids and Arthropods	197
Class Polychaeta	198
External structure and locomotion	199
Feeding and the digestive system	200
Gas exchange and Circulation	201
Nervous and Sensory functions	202
Excretion	203
Regeneration, Reproduction and Development	204
Class Oligochaeta	205
External structure and locomotion	206
Feeding and the digestive system	207
Gas exchange and Circulation	208
Nervous and Sensory functions	209
Excretion	210
Reproduction and Development	211
Class Hirudinea	212
External structure and locomotion	213
Feeding and the digestive system	214
Gas exchange and Circulation	215
Nervous and Sensory functions	216
Excretion	217
Reproduction and Development	218
8.	
Further Phylogenetic Considerations	197
The Arthropods	199
Evolutionary Perspective	200
Characteristics	201
Classification and Relationships to other animals	202
Metamerism and Tagmatization	203
The exoskeleton	204
Metamorphosis	205
Classification	206
Subphylum Trilobitomorpha	207
Subphylum Chelicerata	208

Class Merostomata	207
Class Arachnida	209
Order Scorpionida	212
Order Araneae	214
Order Opiliones	215
Order Acarina	216
Class Pycnogonida	217
Subphylum Crustacea	218
Class Malacostraca	220
Order Decapoda	220
Order Isopoda	227
Order Amphipoda	227
Class Branchiopoda	227
Order Anostraca	227
Order Cladocera	228
Class Copepoda	228
Class Cirripedia	229
Further Phylogenetic considerations	230
9. The Hexapods and Myriapods	233
Evolutionary Perspective	233
Classification of Subphylum Uniramia	234
Class Diplopoda	237
Class Chilopoda	239
Class Pauropoda	240
Class Symphyla	240
Class Hexapoda	240
External structure and locomotion	240
Nutrition and the digestive system	243
Gas exchange	246
Circulation and Temperature regulation	247
Nervous and Sensory functions	248
Excretion	251
Chemical Regulation	251
Reproduction and Development	253
Insect behaviour	255
Insects and the humans	257
Further Phylogenetic considerations	258

Order Crocodilia x

Evolutionary Pressures	
Adaptations of Chuckwalla	
External structure and Locomotion	
Nutrition and The Digestive system	
Circulation, Gas exchange, and Temperature regulation	
Excretion and Sensory functions	
Reproduction and Development	
Further Phylogenetic Consideration	

15.

Birds

Evolutionary perspective	
Phylogenetic relationships	
Ancient birds and the Evolution of Flight	
Diversity of Modern Birds	
Evolutionary Pressures	
External structure and Locomotion	
Feathers and their functions	
The skeleton	
Muscles	
Flight	
Nutrition and The Digestive system	
Circulation, Gas exchange, and Temperature regulation	
Nervous and Sensory systems	
Excretion and Osmoregulation	
Reproduction and Development	
Migration and Navigation	

16.

Mammals

Evolutionary perspective	
Diversity of Mammals	
Subclass Prototheria	
Subclass Theria	
Class Mammalia	
Evolutionary Pressures	
External structure and Locomotion	
Skin	
Hair	
Claws, Nails and Hooves	
Glands	
The skull	

The teeth	444
The Vertebral column	446
Appendicular skeleton	446
Muscles	446
Nutrition and The Digestive system	447
Circulation, Gas exchange, and Temperature regulation..	449
Nervous and Sensory functions	453
Excretion and Osmoregulation	454
Behaviour	456
Reproduction and Development	458
