

P. L. KOCHHAR

Textbook of

Plant Physiology

ROOT HAIR

FILMS OF WATER

SOIL PARTICLES

Diagrammatic representation of the
of root hair to the soil

کتاب خانہ اسلامیہ کالج برائے خواتین ملتان

Class No. 581.1

Author No kec

Acc. No. 3388

Estd. Library 1973

CONTENTS

HAF.		PAGE
1. Introduction		1
	1.1. Scope of Plant Physiology. 1.2. Relation between Plant Structure and Function. 1.3. Plant Physiology and the Physical Sciences. 1.4. Importance of Plant Physiology.	
2. Cell—The Unit of Function		5
	2.1. Cell as a Physiological Unit. 2.2. Parts of a Plant Cell. 2.3. Cytoplasm—Plasma Membrane; Plastids; Mitochondria; Ribosomes; Endoplasmic reticulum; Golgi bodies; Lysosomes; Golgi-ER-Lysosome complex; Sphaerosomes; Matrix; Cell inclusions; Vacuoles. 2.4. Nucleus—Structure of DNA and RNA. 2.5. Cell Wall. 2.6. The Integrated Cell. 2.7. Properties of Protoplasm. 2.8. Chemical Nature of Protoplasm. 2.9. Physical Nature of Protoplasm—Colloidal System. 2.10. Protoplasm as a Polyphase Colloidal System. 2.11. Surface Tension. Experimental Work. Questions.	
3. Physiology of the Cell		44
	3.1. Movement of Material from and into the Cell. 3.2. Imbibition. 3.3. Diffusion. 3.4. Osmosis—Osmotic Pressure. 3.5. Chemical Membranes of Traube and Pfeffer. 3.6. Vegetable Membranes. 3.7. Plant Cell as an Osmotic System. 3.8. Plasmolysis. 3.9. Osmotic Relations of a Plant Cell. 3.10. Methods of Determining the Osmotic Pressure of Plant Cells. 3.11. Magnitude of Osmotic Pressure in Plant Cells. 3.12. Force of Osmosis. 3.13. Differentially Permeable Membranes. Diffusion of Solutes. Experimental Work. Questions.	
Absorption of Water		66
	4.1. Soil as a Water Supplying System. 4.2. Water Absorbing System of the Plant. 4.3. Osmotic Absorption of Water. 4.4. Active Absorption of Water. 4.5. Passive Absorption of Water. 4.6. Environmental Conditions Influencing Absorption of Water by the Roots. 4.7. Root Structure in Relation to Water Absorption. 4.8. Other Methods of Water Absorption. Experimental Work. Questions.	
Loss of Water from Plants		87
	5.1. Mechanism of Transpiration and the Kinds of Transpiration. 5.2. Measurement of Transpiration. 5.3. Stomatal Apparatus of Plants. 5.4. Efficiency of Stomatal Transpiration. 5.5. Mechanism of Stomatal Movement. 5.6. Daily Periodicity of Stomatal Movements. 5.7. Measurement of Stomatal Opening. 5.8. Role of Stomata in Regulating Transpiration. 5.9. Factors Affecting Transpiration. 5.10. Daily and Seasonal Periodicity of Transpiration. 5.11. Significance of Transpiration. 5.12. Other Methods of Water Loss. 5.13. Water Economy of Plants. 5.14. Effects of Water Deficits on Plant Processes. Experimental Work. Questions.	

CHAP.

6. Ascent of Sap

- 6.1. Path of Water Stream. 6.2. Theories of Ascent of Sap. 6.3. Summary. Experimental Work. Questions.

7. Absorption of Minerals

- 7.1. Introduction. 7.2. Passive Absorption of Minerals—Diffusion; Mass flow; Mechanism of Ionic Exchange; Donnan equilibrium. 7.3. Active Absorption of Minerals. 7.4. Cell Permeability. Questions.

8. Mineral Nutrition of Plants

- 8.1. General Role of Mineral Elements in Plants. 8.2. Essential and Non-essential Elements. 8.3. Specific Role of Mineral Elements in Plant Nutrition. 8.4. Soil Fertilisers. 8.5. Soilless Growth or "Hydroponics". 8.6. Balancing Function of Salts. Experimental Work. Questions.

9. Enzymes

- 9.1. Nature and Function. 9.2. Properties of Enzymes. 9.3. Chemical Nature of Enzymes. 9.4. Mechanism of Enzyme Action. 9.5. Naming and Classification of Enzymes. Questions.

10. Photosynthesis

- 10.1. Organic Matter in Plants and Animals. 10.2. Photosynthesis—The Process and its Significance. 10.3. Magnitude of World's Photosynthesis. 10.4. Historical. 10.5. Intake of Carbon dioxide. 10.6. Nature of the Photosynthetic Products. 10.7. Measurement of Photosynthesis. Experimental Work. Questions.

11. Photosynthesis—(Contd.)

- 11.1. Chlorophyll Apparatus—Chlorophyll formation. 11.2. Factors Affecting Photosynthesis—The Principle of Limiting Factors. Experimental Work. Questions.

12. Photosynthesis—(Contd.)

- 12.1. Mechanism of Photosynthesis—Role of chloroplast pigments; The light and dark reactions; Source of oxygen liberated in photosynthesis; Role of light in photosynthesis and the Nature of the light reaction—Cyclic and non-cyclic photophosphorylation; Two pigment systems; The carbon pathway in photosynthesis or the nature of the light reaction—Calvin cycle; Hatch-Slack cycle. 12.2. Bacterial Photosynthesis. 12.3. Quantum requirement of photosynthesis. 12.4. Chemosynthesis. 12.5. Plant Carbohydrates. 12.6. Organic Carbon Cycle. Experimental Work. Questions.

13. Nitrogen Metabolism

- 13.1 Nitrogen in plants. 13.2. Absorption of Nitrogen by Plants. 13.3. Protein Synthesis—amino acids; nitrate reduction; amino acid synthesis; amides. 13.4. Mechanism of Protein Synthesis. 13.5. Properties of Proteins and their Classification. 13.6. Soil

nitrogen and the Bacteria—Nitrogen Fixation; Ammonification and nitrification in the Soil; Denitrification. 13.7. Nitrogen cycle in nature. Experimental Work. Questions.	PAGE
Special Methods of Nutrition in Plants	261
1. Autotrophic and 'Heterotrophic' Plants. 14.2. Parasites. 14.3. Symbiosis. 14.4. Saprophytes. 14.5. Insectivorous Plants. Questions.	
Other Metabolites	276
1. Organic Substances in Plants. 15.2. Lipids and Fats. 15.3. Fat Synthesis. 15.4. Essential Oils and Resins. 15.5. Glycosides, Anthocyanin and Anthoxanthin Pigments and Tannins. 15.6. Vitamins, Enzymes and Hormones. 15.7. Alkaloids, Mucilages and Antibiotics. Experimental Work. Questions.	
Storage and Digestion of Food	286
1. Storage Organs and Tissues. 16.2. Storage Products. 16.3. Digestion—Hydrolytic enzymes. 16.4. Assimilation. Experimental Work. Questions.	
Translocation of Solutes	295
1. Directions of Translocation. 17.2. Path of Translocation. 17.3. Mechanism of Phloem Conduction—Diffusion hypothesis; 'streaming of protoplasm' theory; Munch hypothesis. 17.4. Xylem Transport in Plants. Experimental Work. Questions.	
Respiration	309
1. Respiration as an Oxidative Energy-Releasing Process. 18.2. Various Aspects of Respiration. 18.3. Respiration and photosynthesis—The Compensation Point. 18.4. Measurement of Respiration. 18.5. Respiratory Quotient. 18.6. Respirable substrates. 18.7. Factors influencing Respiration. 18.8. Anaerobic Respiration. 18.9. Fermentation. 18.10. Respiratory Enzymes. 18.11. Mechanism of Respiration—Glycolysis; Anaerobic breakdown of pyruvic acid; Aerobic Oxidation of pyruvic acid (Krebs cycle); Terminal oxidation and oxidative phosphorylation; Respiration as an energy-conserving process. 18.12. Pentose phosphate Pathway. 18.13. Respiration of Fats and Proteins. 18.14. Site of Cellular Respiration. 18.15. Significance of ATP. 18.16. Connection between Anaerobic and Aerobic Respiration. 18.17. Special Types of Respiration in Certain Bacteria. Experimental Work. Questions.	
Growth	366
1. Definition. 19.2. The Role of Meristems in Growth. 19.3. Phases of Growth. 19.4. Development and Integration. 19.5. The Course of Growth. 19.6. Growth Regions. 19.7. Measurement of Growth. 19.8. Growth Hormones—Auxins, their action on plants; Practical application of auxins; Other growth regulators—traumatin, calines, florigens, gibberellins and kinins. 19.9.	

CHAP.

Factors affecting Growth ; Light—photoperiodism ; Temperature—cold resistance, resistance to high temperatures ; vernalisation ; Nutritional balance. Experimental Work. Questions.

20. Plant Movements

20.1. The Nature of Plant Movements. 20.2. Winnham, Reponses and Irritability. 20.3. Classification of Movements. 20.4. Autonomic Movements of Locomotion. 20.5. Tactic Movement. 20.6. Movements of Curvature ; Autonomic Growth Movements. 20.7. Autonomic Curvature Movements of Variation. 20.8. Tropic Movements of Tropisms. 20.9. Nastic Movements. 20.10. Hypogeic Movements. Experimental Work. Questions.

21. Seed Germination and Dormancy

21.1. Seed Structure. 21.2. Seed Germination. 21.3. Conditions Necessary for Germination. 21.4. Seed Dormancy. 21.5. Methods for Breaking the Dormancy of Seeds. 21.6. Vitality and Vigour of Seeds. Questions.

Appendix 1

Use of Radioactive Isotopes in the Study of Plant Processes.

Appendix 2

Two-dimensional Paper Chromatography and Autoradiography.

Index
