SECOND EDITION

List of contents

ACKNOWLEDGEMENTS ix

PREFACE xi

1 THE STRUCTURE OF CELLS

- 1.1 Cell structure as interpreted by the light microscope 2
- 1.2 Cell ultrastructure as revealed by the electron microscope 5
 - 1.2.1 Cell membranes 8
 - 1.2.2 Endoplasmic reticulum 9
 - 1.2.3 The Golgi body 11
 - 1.2.4 Vacuoles 12
 - 1.2.5 Lysosomes 12
 - 1.2.6 Ribosomes 13
 - 1.2.7 Centrosomes 13
 - 1.2.8 Mitochondria 14
 - 1.2.9 Chloroplasts 16
 - 1.2.10 The nucleus 18
 - 1.2.11 The plant cell wall 20
- 1.3 A comparison of light and electron microscopes 21
- 1.4 Cell fractionation 24

2 WATER AND AQUEOUS SOLUTIONS

- 2.1 The water molecule 26
- 2.2 Properties of water 27
 - 2.2.1 Thermal properties 27
 - 2.2.2 Density and viscosity 29
 - 2.2.3 Surface tension, capillarity and tensile strength 29
 - 2.2.4 Penetration by light 29
 - 2.2.5 Dissociation of water 30
 - 2.2.6 Water as a solvent 31
- 2.3 Some properties of aqueous solutions
 - 2.3.1 Acids, bases and buffers 33
 - 2.3.2 Colligative properties 34
- 2.4 Uptake and loss of water by living cells 35
 - 2.4.1 Osmotic behaviour of plant cells 35
 - 2.4.2 Osmotic behaviour of animal cells 38
 - 2.4.3 Non-osmotic movement of water 40

3 THE CHEMICAL CONSTITUENTS OF CELLS

- 3.1 Carbohydrates 41
 - 3.1.1 Monosaccharides 41
 - 3.1.2 Disaccharides 44
 - 3.1.3 Polysaccharides 46
- 3.2 Lipoids 49
 - 3.2.1 Fats and oils 49
 - 3.2.2 Phospholids 51
 - 3.2.3 Waxes 52
 - 3.2.4 Steroids and sterols 52
- 3.3 Proteins 52
 - 3.3.1 Amino acids 53
 - 3.3.2 Polypeptides and proteins 55
- 3.4 Biochemical techniques 60
 - 3.4.1 Chromatography 60
 - 3.4.2 Electrophoresis 66

4 ENZYMES

- 4.1 The structure of enzymes 67
- 4.2 Enzyme action 68
 - 4.2.1 Enzyme catalysis 69
 - 4.2.2 The lock and key mechanism 69
 - 4.2.3 Enzyme specificity 70
 - 4.2.4 Control of enzyme action 70
- 4.3 Factors affecting enzyme action 70
 - 4.3.1 Co-factors 71
 - 4.3.2 Inhibitors 71
 - 4.3.3 Temperature 72
 - 4.3.4 pH 73
 - 4.3.5 Enzyme concentration 74
 - 4.3.6 Substrate concentration 74
- 4.4 The classification of enzymes 75
 - 4.4.1 Hydrolases 75
 - 4.4.2 Oxido-reductases 76
 - 4.4.3 Transferases 76
 - 4.4.4 Isomerases 77
 - 4.4.5 Ligases 77
 - 4.4.6 Lyases 77

5 ENERGY CHANGES IN LIVING CELLS

- 5.1 Respiration 78
 - 5.1.1 Adenosine 5'-triphosphate 78

PHYSIOLOGY OF THE HUMAN BODY

1.1 The human body	10
1.2 The human body as a system	10
1.3 The human body as a system	10
1.4 The human body as a system	10
1.5 The human body as a system	10
1.6 The human body as a system	10
1.7 The human body as a system	10
1.8 The human body as a system	10
1.9 The human body as a system	10
1.10 The human body as a system	10

2 CELL PHYSIOLOGY

2.1 Cells	11
2.2 The cell membrane	11
2.3 The cell membrane	11
2.4 The cell membrane	11
2.5 The cell membrane	11
2.6 The cell membrane	11
2.7 The cell membrane	11
2.8 The cell membrane	11
2.9 The cell membrane	11
2.10 The cell membrane	11

3 GAS EXCHANGE IN MAN

3.1 Gas exchange and respiration	12
3.2 Gas exchange and respiration	12
3.3 Gas exchange and respiration	12
3.4 Gas exchange and respiration	12
3.5 Gas exchange and respiration	12
3.6 Gas exchange and respiration	12
3.7 Gas exchange and respiration	12
3.8 Gas exchange and respiration	12
3.9 Gas exchange and respiration	12
3.10 Gas exchange and respiration	12

4 THE HUMAN BODY

4.1 The human body	13
4.2 The human body	13
4.3 The human body	13
4.4 The human body	13
4.5 The human body	13
4.6 The human body	13
4.7 The human body	13
4.8 The human body	13
4.9 The human body	13
4.10 The human body	13

5 THE HUMAN BODY

5.1 The human body	14
5.2 The human body	14
5.3 The human body	14
5.4 The human body	14
5.5 The human body	14
5.6 The human body	14
5.7 The human body	14
5.8 The human body	14
5.9 The human body	14
5.10 The human body	14

6 THE HUMAN BODY

6.1 The human body	15
6.2 The human body	15
6.3 The human body	15
6.4 The human body	15
6.5 The human body	15
6.6 The human body	15
6.7 The human body	15
6.8 The human body	15
6.9 The human body	15
6.10 The human body	15

12 PHOTOSYNTHESIS AND TRANSLOCATION OF PHOTOSYNTHETIC PRODUCTS

- 12.1 The leaf as a photosynthetic organ 217
 - 12.1.1 Penetration of light 217
 - 12.1.2 Supply of water 219
 - 12.1.3 Uptake of carbon dioxide 219
 - 12.1.4 Opening and closing of stomata 221
- 12.2 Factors affecting the rate of photosynthesis 223
 - 12.2.1 Temperature 226
 - 12.2.2 Light intensity 226
 - 12.2.3 Concentration of carbon dioxide 227
- 12.3 Productivity of plants and plant communities 228
 - 12.3.1 Leaf area index 228
 - 12.3.2 Unit leaf rate 229
 - 12.3.3 Net primary productivity 229
- 12.4 Translocation of photosynthetic products 229
 - 12.4.1 The pathway of translocation 230
 - 12.4.2 The mechanism of translocation 235

13 MINERAL NUTRITION OF FLOWERING PLANTS

- 13.1 Mineral requirements of flowering plants 240
 - 13.1.1 Water culture experiments 240
- 13.2 Function of minerals in flowering plants 242
 - 13.2.1 Macronutrients 242
 - 13.2.2 Micronutrients 244
- 13.3 Toxic minerals 245
- 13.4 Soil as a source of minerals 245
- 13.5 Mineral absorption by plants 246
 - 13.5.1 Roots as organs of mineral absorption 246
 - 13.5.2 Mechanisms of mineral absorption 247
- 13.6 Transport of mineral in plants 249
 - 13.6.1 Passage across the root tissues 250
 - 13.6.2 Movement into the shoot system 250
 - 13.6.3 Circulation of minerals in plants 250
- 13.7 The nutrient-film technique 253

14 THE MAMMALIAN ALIMENTARY SYSTEM

- 14.1 Mammalian nutritional requirements 254
 - 14.1.1 Organic nutrients 254
 - 14.1.2 Vitamins 255
 - 14.1.3 Inorganic nutrients 256
- 14.2 Mammalian dentition 256
 - 14.2.1 Structure and development of teeth 256
 - 14.2.2 Variety of mammalian teeth 258
- 14.3 Digestion 264
 - 14.3.1 The mouth 264
 - 14.3.2 The stomach 267
 - 14.3.3 Rumination 270
 - 14.3.4 The small intestine 271
 - 14.3.5 The caecum 275
- 14.4 Absorption 275
- 14.5 The liver 278
 - 14.5.1 Structure of the liver 278
 - 14.5.2 Functions of the liver 280

15 NERVOUS CONTROL AND CO-ORDINATION IN MAMMALS

- 15.1 Electrochemical basis of nervous activity 283
 - 15.1.1 The resting potential 284
 - 15.1.2 The action potential 286
 - 15.1.3 The nerve impulse 287
 - 15.1.4 Membrane recovery 289
 - 15.1.5 Rate of impulse conduction 289
 - 15.1.6 Synaptic transmission 293
 - 15.1.7 Neuroeffector junctions 296
 - 15.1.8 Muscle and contraction 296
 - 15.1.9 Cartilage, bone and joints 299
- 15.2 The mammalian nervous system 302
 - 15.2.1 The peripheral nervous system and reflexes 303
 - 15.2.2 The autonomic nervous system 307
 - 15.2.3 The central nervous system 310

16 THE MAMMALIAN EYE AND EAR

- 16.1 The mammalian eye 317
 - 16.1.1 Structure of the eye 317
 - 16.1.2 Focusing 319
 - 16.1.3 Defects of the eye 321
 - 16.1.4 Photoreception 322
- 16.2 The mammalian ear 327
 - 16.2.1 Structure of the ear 327
 - 16.2.2 Hearing 327
 - 16.2.3 Balance 330
 - 16.2.4 Defects of the ear 332

17 THERMOREGULATION IN MAMMALS

17.1 Heat production	334
17.1.1 Measuring metabolic rate	335
17.1.2 Distribution of body heat	336
17.2 Heat loss	337
17.2.1 Radiation	337
17.2.2 Evaporation	338
17.2.3 Conduction	338
17.2.4 Surface area and body volume	340
17.3 Thermoregulation	340
17.3.1 The thermoregulation centres	341
17.3.2 Regulating heat production	341
17.3.3 Regulating heat loss	347
17.3.4 Hibernation	347

18 ENDOCRINE CONTROL IN MAMMALS

18.1 The thyroid and parathyroid glands	349
18.1.1 The thyroid gland	349
18.1.2 Control of thyroid activity	351
18.1.3 Measurement of thyroid activity	351
18.1.4 Malfunction of the thyroid gland	352
18.1.5 The parathyroid glands	353
18.1.6 Role of the thyroid gland in calcium control	355
18.1.7 Malfunction of the parathyroid glands	356
18.2 Control of blood glucose	357
18.2.1 Insulin and glucagon	357
18.2.2 Cortisol	360
18.3 Control of blood sodium and potassium	361
18.3.1 Aldosterone	362
18.4 The adrenal medulla	363
18.4.1 The medullary hormones	363
18.5 The pituitary body	364
18.5.1 The anterior pituitary	364
18.5.2 The posterior pituitary	367

19 REPRODUCTION IN FLOWERING PLANTS

19.1 Sexual reproduction	368
19.1.1 Flower structure	368
19.1.2 Development of pollen and ovules	370
19.1.3 Fertilisation and its consequences	375
19.2 The life cycle of a flowering plant	379

19.3 Pollination 380

19.3.1 Mechanisms for ensuring outbreeding 380

19.3.2 Pollination mechanisms 380

19.4 Asexual reproduction 384

19.4.1 Diploid parthenogenesis 384

19.4.2 Haploid parthenogenesis 384

19.4.3 Vegetative propagation 384

19.4.4 The consequences of asexual reproduction 386

19.5 The physiology of angiosperm reproduction 386

19.5.1 The physiology of flowering 386

19.5.2 Physiology of pollen growth 386

19.5.3 Physiology of seed and fruit formation 390

19.5.4 Physiology of fruit ripening 390

20 SEED STRUCTURE AND GERMINATION

20.1 Seed structure	392
20.2 Morphological aspects of seed germination	392
20.2.1 Germination of broad bean	392
20.2.2 Germination of sunflower	395
20.2.3 Germination of maize	395
20.3 Physiology of germination	396
20.3.1 Mobilisation of stored food	396
20.3.2 Factors affecting seed germination	399
20.3.3 Seed dormancy	403

21 GROWTH AND DEVELOPMENT IN FLOWERING PLANTS

21.1 Morphological and anatomical aspects of growth and development	
21.1.1 Primary growth and development	406
21.1.2 Secondary growth and development	418
21.2 Physiological aspects of growth and development	422
21.2.1 External factors	422
21.2.2 Internal factors	425
21.2.3 Practical uses of plant hormones	432

22 MAMMALIAN REPRODUCTION

22.1 Testes	434
22.1.1 Structure of the testes	435
22.1.2 Spermatogenesis	436
22.1.3 Male hormones	437

22.1.1	Structure of the uterus and ovipositor	479
22.1.2	Seasonal control of ovulation	480
22.1.3	The estrous cycle	480
22.1.4	Other effects of female hormones	481

22.2	Reproduction	481
22.2.1	Gestation	481
22.2.2	Fertilisation and implantation of the embryo	482
22.2.3	The placenta	483
22.2.4	Birth and lactation	483

23 GENETICS

23.1	Autosomal inheritance	489
23.1.1	Monohybrid inheritance	489
23.1.2	Dihybrid inheritance	493
23.1.3	Polyhybrid inheritance	493
23.1.4	Co-dominance and incomplete dominance	495
23.1.5	Multiple alleles	495
23.1.6	Gene interaction	495
23.1.7	Linkage	496
23.1.8	Chromosome maps	498
23.2	Non-autosomal inheritance	499
23.2.1	Inheritance of sex	499
23.2.2	Sex linkage	499
23.3	Inheritance of quantitative characteristics	493
23.4	Population genetics	463
23.4.1	Inbreeding and outbreeding	463
23.4.2	Clones	464
23.4.3	The Hardy-Weinberg law	465
23.4.4	Genetic polymorphism	466

24 THE ORIGIN AND EVOLUTION OF LIFE

24.1	The origin of life	467
24.1.1	Monomer synthesis	467
24.1.2	Polymer synthesis	468
24.1.3	Polymer isolation and replication	468
24.1.4	The first cells	469
24.2	Evidence of evolution	470
24.2.1	Fossils	470
24.2.2	Affinities	476
24.2.3	Geographical distribution	478
24.3	How evolution came about	479
24.3.1	Lamarckism	479
24.3.2	Darwinism	480
24.3.3	Variation	481
24.3.4	Selection	483

24.3.5	Isolating mechanisms	486
24.3.6	The formation of species	488

25 VARIETY OF LIFE: MICRO-ORGANISMS AND PLANTS

25.1	Nomenclature and classification	489
25.2	Viruses	490
25.2.1	Structure	490
25.2.2	Replication	490
25.2.3	Importance to man	492
25.3	Bacteria (Schizomycophyta)	492
25.3.1	Structure	492
25.3.2	Nutrition	494
25.3.3	Respiration	494
25.3.4	Reproduction	494
25.3.5	Endospores	494
25.3.6	Importance to man	494
25.4	Fungi (Eumycophyta)	498
25.4.1	Structure	498
25.4.2	Nutrition	500
25.4.3	Reproduction	500
25.4.4	Importance to man	502
25.5	Algae	505
25.5.1	Cyanophyta (Myxophyta)	505
25.5.2	Chlorophyta	506
25.5.3	Phaeophyta	508
25.5.4	Rhodophyta, Bacillariophyta and Euglenophyta	509
25.6	Bryophyta	510
25.6.1	Hepaticae	510
25.6.2	Musci	512
25.7	Pteridophyta	513
25.7.1	Selaginellales	513
25.7.2	Equisetales	515
25.7.3	Filicales	515
25.8	Spermatophyta	517
25.8.1	Gymnospermae	518
25.8.2	Angiospermae	521

26 VARIETY OF LIFE: NON-CHORDATE ANIMALS

26.1	Protozoa	523
26.1.1	Sarcodina (Rhizopoda)	523
26.1.2	Mastigophora (Flagellata)	524
26.1.3	Ciliata (Ciliophora)	526
26.1.4	Sporozoa	527
26.2	Porifera	529
26.3	Cnidaria	530
26.3.1	Cell differentiation in cnidarians	530
26.3.2	Variety of cnidarians	532
26.4	Platyhelminthes	536
26.4.1	Turbellaria	536
26.4.2	Trematoda	538

26.5	Nematoda	541
26.6	Annelida	542
26.6.1	Polychaeta	542
26.6.2	Oligochaeta	544
26.6.3	Hirudinea	546
26.7	Arthropoda	547
26.7.1	Oxychophora	548
26.7.2	Crustacea	549
26.7.3	Myriapoda	551
26.7.4	Insecta	551
26.7.5	Aracharida	555
26.8	Mollusca	556
26.8.1	Gastropoda	557
26.8.2	Lamellibranchia (Bivalvia)	558
26.8.3	Cephalopoda	558
26.9	Echinodermata	559
26.9.1	Asteroida	560
26.9.2	Echinoida	560

27 VARIETY OF LIFE: CHORDATE ANIMALS

27.1	Protochordates	561
27.1.1	Ascidacea	561
27.1.2	Cephalochorda	562
27.2	Vertebrata (Craniota)	563
27.2.1	Agnatha	563
27.2.2	Chondrichthyes	
	(Elasmobranchii)	564
27.2.3	Osteichthyes	567
27.2.4	Amphibia	569
27.2.5	Reptilia	572
27.2.6	Aves	574
27.2.7	Mammalia	578

28 ECOLOGY 1: DISTRIBUTION OF ORGANISMS; ASSOCIATIONS

28.1	Factors affecting the distribution of organisms	583
28.1.1	Biotic factors	584
28.1.2	Abiotic factors	588
28.1.3	The factor complex	596
28.2	Associations between organisms	597
28.2.1	Parasitism	597
28.2.2	Symbiosis	600
28.2.3	Commensalism	605

29 ECOLOGY 2: POPULATIONS, COMMUNITIES AND ECOSYSTEMS

29.1	Populations	606
29.1.1	Population growth	606
29.1.2	Growth of human populations	609
29.1.3	Population dynamics	609
29.2	Communities	613
29.2.1	Succession	613
29.3	Ecosystems	616
29.3.1	Trophic relationships	616
29.3.2	Energy flow	617
29.3.3	Ecological pyramids	622
29.3.4	Cycling of matter	624
29.3.5	Soil as an ecosystem	627

30 POLLUTION AND CONSERVATION

30.1	Pollution of the atmosphere	636
30.1.1	Carbon dioxide	638
30.1.2	Sulphur dioxide	639
30.1.3	Particulate matter	641
30.1.4	Carbon monoxide	641
30.1.5	Oxides of nitrogen	642
30.1.6	Metals	642
30.2	Pollution by heavy metals	642
30.2.1	Lead	642
30.2.2	Mercury	644
30.2.3	Other heavy metals	645
30.3	Pesticides	646
30.3.1	Herbicides	646
30.3.2	Fungicides	647
30.3.3	Insecticides	647
30.4	Radiation	651
30.4.1	Forms of radiation	651
30.4.2	Sources of radiation	652
30.4.3	Biological effects of radiation	655
30.5	Pollution of aquatic habitats	655
30.5.1	Freshwater pollution	655
30.5.2	Marine pollution	659
30.6	Conservation	661
30.6.1	The case for conservation	661
30.6.2	Conservation in action	661

QUESTIONS 664
