

KNOW YOUR GENES,
SECURE YOUR HEALTH,
SAVE YOUR LIFE

CONTENTS

Preface

Acknowledgments

xiii
xiv

KNOWLEDGE IS LIFE-MAKING

1 What You Should Know and Why 3

To Know Is to Care • Why You Should Know • What You Should Know • A Responsibility to Tell • Types of Genetic Disorders • Good Genes, Bad Genes • It's All in the Genes • The Gene Orchestra

2 Personal Considerations and Your Family History 12

Your Family History • Whom to Ask • Constructing Your Family Pedigree • Decisions to Transmit Harmful Genes

THE THREADS OF YOUR LIFE

3 Too Many or Too Few Chromosomes 23

Cells • Normal Chromosomes • Number, Size, Sex, and Identity • Sperm and Eggs • Multiplication by Division • Chromosomal Disorders • Numerical Chromosome Abnormalities • Down syndrome • Other Trisomies • Miscarriage and Stillbirth • Birth Defects Due to Chromosome Abnormalities

4 Sex Chromosome Disorders 37

Males with an Extra X • Males with an Extra Y • Females with an Extra X • Rarer Additions • Too Few Sex Chromosomes • Turner syndrome • Mosaic Chromosome Patterns

5 Chromosome Rearrangements 45

When Chromosomes Break • Translocations • Sex-Chromosome Translocations • Deletions • Inversions • Clues Suggesting a Rearrangement • Future Risks • "FISH"ing for Chromosomes • Chromosome Breaks and Cancer Risks

THE BLUEPRINTS FOR LIFE

6	Genes	55
	What Is a Gene? • How Do Genes Function? • Errors in the Chain • The Gene Team • Gene Families • Designer Genes • Gene Programs • Programmed Cell Suicide • Clock Genes • Gene that Distinguish Left from Right • The Power of Silence • Imprinted Genes	
7	You and Your Genes	66
	Harmful Genes from One Parent • Characteristics of Dominant Inheritance • Gene Mutations • Harmful Genes from Both Parents • Characteristics of Recessive Inheritance • Harmful Genes Passed from Mothers to Sons • Symptoms and Signs in Carriers • Characteristics of X-linked Recessive Inheritance • Mosaic Ovaries or Testes • Harmful Genes from Mothers to Their Children • Characteristics of Maternal Inheritance • Genes from Fathers to Sons • Age of Onset and Severity of a Genetic Disorder • DNA Fingerprints • Incest • Rape and Murder	
8	Ethnic Genes and the Disorders They Cause	85
	Coping with the Risks of Being a Carrier • Who Needs Testing? • The Gene Screen • Common Mutations • Testing Prior to Conception • Ancestral Founders • Signs in Carriers • Marrying in the Family • Avoiding Tragedies: What Should You Do?	
9	When Threads or Blueprints Go Awry: Mental Retardation and Birth Defects	98
	Extent of the Problem • Major and Minor Birth Defects • When Normal Development Goes Awry • Syndromes • Deformation • Dysplasia • Disruption • Causes of Birth Defects and Mental Retardation • The Fragile X Syndrome • Drugs that Cause Defects • Vitamin Supplements • Maternal Illness and Birth Defects • Birth Defects and Multifactorial Influences • Risks of Having a Second Child with a Birth Defect or Mental Retardation • Common Superstitions • Avoidance and Prevention	
10	Genes That Make You Susceptible to Various Disorders or Complications	119
	Born Susceptible • Blood Groups and Disease • ABO blood groups • Rh blood groups • the HLA system • Allergy, Asthma, and Emphysema • A Predisposition to Clot • Genes and Drugs • Genes, Alcohol, and Diet •	

Genes and Infection • Genes and Behavior • Susceptibility Genes
and Brain Injury or Hemorrhage • "Athletic" Genes

HARMFUL GENES

- 11 Genes and Heart Disease 143**
The Extent of the Problem • Causes and Risk Factors • Smoking •
Some Facts about Fats • Coronary Artery Disease and
Inflammation • Hypertension • Clots in the Coronaries • Diabetes
Mellitus • Obesity and CAD • Miscellaneous Risk Considerations •
Fetal-Infant Programming and Adult Consequences • Directly
Inherited Coronary Artery Disease • Familial Combined
Hyperlipidemia • Familial Hypercholesterolemia • Familial
Hypertriglyceridemia • Familial Defective Apolipoprotein B-100 •
Familial Dysbetalipoproteinemia • Other Genetic Lipid Disorders
• Are You at Risk of a Heart Attack? • What Should You Do?
- 12 Genetic Disorders of Heart Structure
Rhythm, and of the Arteries 158**
Genetic Disorders of the Heart Muscle • "Large Muscle"
Cardiomyopathy • "Floppy Muscle" Cardiomyopathy • Genetic
Disorders of the Blood Vessels • Marfan syndrome • the Ehlers-
Danlos syndromes • Genes and Abnormalities of Heart Rhythm •
The Long QT syndrome • other Familial Heart Rhythm Disorders
• Mitral Valve Prolapse • Structural Heart Defects • Chromosomes
and Heart Defects • Multifactorial Heart Defects • Syndromes and
Heart Defects • Environmental Causes of Heart Defects
- 13 Is High (or Low) Blood Pressure Inherited? 172**
What Is High Blood Pressure? • Is Hypertension Inherited? • Not
Genetic, But Still Important • Does Hypertension in the Adult
Originate in the Womb? • Ethnic Aspects • Screening and
Prevention • Is Low Blood Pressure Inherited?
- 14 Genes and Diabetes 178**
Diagnosing Diabetes • Types of Diabetes • Insulin-Dependent
Diabetes • Non-Insulin Dependent Diabetes • Diabetes Associated
with Other Disorders • A Common Disorder • Culprit Genes and
Environmental Factors • Diabetes and the Single Gene • Maturity-
Onset Diabetes of the Young • Diabetes, Multiple Genes and
Environment • Genes and Non-Insulin-Dependent Diabetes •
Genes and Insulin-Dependent Diabetes • Fetal Origins of Diabetes
• Diabetes and Genetic Syndromes • Pregnancy and Diabetes •

	Gestational Diabetes • A Predisposition to Diabetic Complications • Heart Disease • Eye Complications • Kidney Complications • Susceptibility to Infection • Nerve Damage • Hypertension • Obesity and Diabetes • Dietary Guidelines	
15	Obesity: Genes or Environment? The Obesity Epidemic • Obesity and Associated Disorders • Why and How People Get Fat • Signals and More Signals • Genes and Obesity • Genetic Disorders and Obesity • Risks of Obesity • Maternal Obesity • Maternal Obesity and Birth Defects • Treatment and Prevention	193
16	Genes and Cancer What Is Cancer? • How Widespread Is It? • How Does a Normal Cell Become a Cancer Cell? • Genes at Checkpoints • Cells with Brakes • Gene Silencing • Cell Suicide • DNA Repair Systems • Means to an End • Imprinted Genes • Broken Threads • Causes of Cancer • Genetic Cancer	203
17	Is There a History of Cancer in Your Family? Genetic Causes • Prenatal Risk Factors for Cancer • Cancer and Ethnic Origin • Birth Defects and Cancer • Cancers of the Breast, Ovary, Colon, and Prostate • Breast Cancer • Ovarian Cancer • Gene Tests Treatment Options • Colon Cancer • Prostate Cancer • Family Cancer Syndromes • Other Cancers • Cancer and Childbearing • Should Children Be Tested? • Privacy and Confidentiality • What You Should Know Before Having a Cancer Gene Test • Gene Therapy for Cancer	211
18	Mental Illness in the Family: Schizophrenia Is Schizophrenia Inherited? • The Diagnosis • Family Studies • Twins and Schizophrenia • Adoption and Schizophrenia • Early Signs • Eye Movements and Susceptibility to schizophrenia • Genes and Schizophrenia • Treatment • Predicting the Outcome • What Happens Over Time? • Costs	240
19	Genes, Depression and other Mood Disorders Mood Disorders • Depression (Unipolar Disorder) • Manic Depression (Bipolar Disorder) • How Common a Problem • Suicide • ADHD and Bipolar Disorder • Genes or Environment • Family Studies • Patterns of Inheritance • Genes and Anxiety Disorders • Alcoholism	250

20 Genes and Alzheimer's Disease 259

Alzheimer's Disease • Telltale Features • How Common a Problem?
• Is It Aging or Alzheimer's? • Trouble in the Brain Cells: Plaques
and Tangles • Is Alzheimer's Disease Inherited? • Culprit Genes •
risks • Ethnicity and Familial Alzheimer's disease • Acquired or
Environmental Factors • Should You Have a Predictive Test or
Not? • Predictive or Susceptibility Tests • Ethical Considerations

21 Genes, Aging, and Longevity 270

Lessons from Other Species • Why and How Do We Age? • Death
Clocks • Body Clocks and Programmed Aging • Chromosome Tips
• Cell suicide • Immune System and Aging • Aging Due to Wear
and Tear • Problems in the Power Plants • The Protein-Sugar Mix •
The Molecular Defense Against Aging • Aging and Cancer • Aging
Sperm and Eggs • Premature Aging Syndromes • Is Longevity
Inherited? • Postponing Aging

AVOIDANCE AND PREVENTION OF GENETIC DISORDERS

22 Prenatal Diagnosis of Genetic Disorders 283

Early warning • Preconception Planning • Screening in Early
Pregnancy • Prenatal Diagnosis • How are the Studies Done?
Procedural Risks • Diagnostic Accuracy • Ultrasound Imaging •
Very Early Pregnancy Prenatal Diagnosis • Procedures • Accuracy •
Risks • Preimplantation Diagnosis • Procedure • Limitations •
Indications for Prenatal Genetic Studies • Chromosome Defects •
single gene disorders • prenatal studies for physical defects in the
Fetus • Pitfalls and Problems • Diagnostic Errors • Aberrant, but
Normal • An Extra Fragment • Disputed Paternity • Multiple
Pregnancy • Culture Failures • Diagnoses of the Unexpected • The
Future Is Now

23 Genetic Disorders and Pregnancy 300

What You Don't Know Can Hurt You • Preconception Genetic
Counseling • Genetic Disorders That Pregnancy May Aggravate •
Maternal Genetic Disorders That May Threaten Fetal Health and
Survival • Genetic Disorders That May Complicate Pregnancy

**PERSONAL MATTERS PREDICTIVE TESTS,
GENETIC COUNSELING AND TREATMENT**

- 24 **Presymptomatic and Predictive Genetic Diagnosis**
Presymptomatic Testing • Familial Cancers • Testing for Adult
Polycystic Kidney Disease • Predictive Testing 309
- 25 **Genetic Counseling**
What Is Genetic Counseling? • Who Needs Genetic Counseling? •
What Should You Expect from Genetic Counseling? • What to
Expect from a Genetic Counselor • Marriage and Stillbirth •
Infertility • Communicating Bad News • Who Provides Genetic
Counseling? • Risks and Odds • Chance Has No Memory • Contact
and Recontact 322
- 26 **Genes, Ethics, Law, and Public Policy**
Goals and Ethical Principles • Informed Consent for Genetic
Testing • Confidentiality • DNA Banking • Ethical Guidelines •
Ethical and Legal Issues • Forensic DNA Data Banks • DNA Testing
of Children • Genetic Tests in Adoption • The child • Adoptive
Parents • Birth Parents • Adoption Agency • The State •
Professional Guidelines • Law and Ethics • Patenting Human
Genes • Genetic Discrimination in Insurance • Litigation in
Medical Genetics • Future Litigation 331
- 27 **Treatment of Genetic Disorders**
Modifications of the Diet • Restriction and Substitution •
Augmentation and Exclusion • Supplementation and Replacement
• Treatment with Medications • Depletion • Avoiding Harmful
Factors • Repair and Reconstruction • Transplantation • Stem Cell
Transplantation • Genetic Engineering • Gene Knock-Outs and
Knock-Ins • Cloning for Health • Gene Therapy • Gene Delivery •
Disease Candidates for Gene Therapy • Gene Therapy Before Birth
• Germline Gene Therapy • A Challenge for the Future 349

Appendix A Some Frequently Asked Questions 371

Appendix B Genetics Resource Organizations 376

Appendix C Genetics and Health-Related Internet Sites 383

Appendix D Reference Books 388

Index 392
