

PRINCIPLES OF ANIMAL BIOLOGY

(REVISED & ENLARGED)

By
Khan Mohammad Rafique

THE CARAVAN BOOK HOUSE LAHORE
KACHEHRI ROAD, LAHORE

Chapter 1:

Functional Anatomy of the cell

1 — 1:	Introduction	
1 — 2:	Cell Components	11-36
1 — 3:	Types Of Cells	11
1 — 4:	Cell Membrane	11
1 — 5:	✓ Structure Of Plasma Membrane	13
1 — 6:	✓ Endoplasmic Reticulum	14
1 — 7:	✓ Golgi Complex	15
1 — 8:	✓ Lysosomes	21
1 — 9:	✓ Peroxisomes	23
✓ 1 — 10:	✓ Nucleus	29
✓ 1 — 11:	Microvilli	30
1 — 13:	Cytoskeleton	32
		33

Chapter 2:

Biochemistry of the Cell and High Energy Phosphates

2 — 1:	Introduction	37-
2 — 2:	Basic Chemistry	38
2 — 3:	R-groups	39
2 — 4:	Carbohydrates	41
2 — 5:	Chemistry Of Glucose	8
2 — 6:	Chemistry Of Lipids	0
2 — 7:	High Energy Phosphates	2
2 — 8:	ATP (Adenosine Triphosphate)	7
2 — 9:	ATP-Metabolic Role	16
		56

Chapter 3:

Proteins

3 — 1:	Introduction	61-91
3 — 2:	Amino Acids	57
3 — 3:	R-groups Of Amino Acids	60
3 — 4:	Classification Of Amino Acids	265
3 — 5:	✓ Protein Primary Structure	265
3 — 6:	✓ Protein Secondary Structure	267
3 — 7:	✓ Protein-Tertiary Structure	269
3 — 8:	Protein-Quaternary Structure	275
3 — 9:	Protein-Biological Role	278
		278
		279
		283

Chapter 4:

Enzyme Catalysis

4 — 1:	Introduction	
4 — 2:	Enzymes	283
4 — 3:	Enzymes Biocatalysis	293-301
4 — 4:	Enzyme Mechanism Of Catalysis	293
4 — 5:	Enzyme-Energy Of Activation	293
4 — 6:	Enzyme-Equilibrium Of Reaction	295
4 — 7:	Enzyme- ΔG Of Reaction	298
4 — 8:	Enzyme-Substrate Specificity	300
4 — 9:	Enzyme-Co-factors	301
4 — 10:	Enzyme-Kinetics	302-326
4 — 11:	Enzyme-Inhibition	302
		302
		302
		303

Metabolic Pathways

6-phosphate

- ✓ 5 — 6: Oxidative Oxidation of Glucose
- ✓ 5 — 7: Citric Acid cycle
- ✓ 5 — 8: Citric Acid Cycle Features

Chapter 6: Mitochondrion

- 6 — 1: Mitochondrion-introduction
- 6 — 2: Mitochondrion History
- 6 — 3: Mitochondrion-structure
- 6 — 4: Sub Mitochondrial-Particals
- 6 — 5: Electron Transport Chain(ETC)
- 6 — 6: Respiratory Chain Complexes
- 6 — 7: Components of ETC
- 6 — 8: Phosphorylation
- 6 — 9: Mechanism Of Oxidative Phosphorylation
- 6 — 10: Energy Budget Of Glucose

Chapter 7: Ground Substance

- 7 — 1: Ground Substance Introduction
- 7 — 2: Types Of Muscles
- 7 — 3: Structure Of Striated Muscle
- 7 — 4: Contractile Apparatus
- 7 — 5: Structural Organization Of Myofilament
- 7 — 6: Macromolecular Basis Of Contraction
- 7 — 7: Sliding Mechanism Of Muscle Contraction
- 7 — 8: Energetics Of Muscle Contraction
- 7 — 9: Guide Question Of Chapter-6th And 7th

Chapter 8: Nucleic Acids-Biochemistry

- 8 — 1: Nucleic Acids Introduction
- 8 — 2: Nucleic Acids — History
- 8 — 3: ✓ Nucleic Acids — Chemistry
- 8 — 4: ✓ DNA — Structure
- 8 — 5: ✓ RNA — Structure
- 8 — 6: ✓ RNA — Types
- 8 — 7: Guide Questions

Chapter 9: Nucleic Acids-Biosynthesis

- 9 — 1: Introduction
- 9 — 2: DNA-Coded Genetic Messages
- 9 — 3: ✓ DNA-Replication types
- 9 — 4: ✓ Transcription Mechanism
- 9 — 5: Transcription-The synthesis of RNA
- 9 — 6: ✓ Translation-The process of Protein synthesis

PART 2—Genetics

Chapter 10: Chromosome Structure and Duplication

- 10 — 1: Introduction
- 10 — 2: ✓ Chromosome Structure
- 10 — 3: ✓ Cell-Cycle
- 10 — 4: Synthesis and Growth
- 10 — 5: ✓ Mitosis
- 10 — 6: ✓ Mitotic Duplication of DNA

..... 183

10 — 8	Life cycles	
10 — 8-1	Life cycle of Paramecium	199
10 — 8-2	Life cycle of Clamydomonas	200
10 — 8-3	Life cycle of Neurospora	201
10 — 8-4	Life cycle of Drosophila	202
		203

Chapter 11: Law of Segregation

11 — 1	Introduction	205-225
11 — 2	Law of Segregation	205
11 — 3	Segregation-Mendilian cross	209
11 — 4	Segregation-Incomplete Dominance	209
11 — 5	Segregation-Human Pedegree	211
11 — 6	Segregation-Tetrad Analysis	213
11 — 7	Segregation-Strand Analysis	214
		221

Chapter 12: Law of Independent Assortment

12 — 1	Introduction	227-256
12 — 2	Law of Independent assortment	227
12 — 3	Independent Assortment-Dihybrid Self Crosses	227
12 — 4	Independent Assortment-dihybrid Test Cross	228
12 — 5	Independent Assortment-Incomplete Dominance	230
12 — 6	Independent Assortment-Tetrad Analysis	232
12 — 7	Independent Assortment-Strand Analysis	237
12 — 8	Chi-Square Test and its Application	246
		256

Chapter 13: Linkage and Recombination of Genes

13 — 1	Introduction	257-291
13 — 2	Linkage	257
13 — 3	Linkage and Crossing over	260
13 — 4	Linkage and Crossing-Sex-Linkage	265
13 — 5	Colour-Blindness	265
13 — 6	Linkage and Crossing Over Autosomal traits	267
13 — 7	Linkage and Cross Over-Tetrad Analysis	267
13 — 7A	Linkage and Cross over-Strand Analysis	269
13 — 8	Linkage Groups and Chromosomes	275
13 — 9	Linkage and Cross over-cytological proof	278
13 — 10	Interference and coincidence	278
13 — 11	Genetic Maps	279
		283

Chapter 14: Cytoplasmic Inheritance

14 — 1	Introduction	293-301
14 — 2	Cytoplasmic Inheritance Types	293
14 — 3	Cytoplasmic Inheritance of Pigments in Ephestia	293
14 — 4	Cytoplasmic Inheritance coiling of shell	293
14 — 5	Inheritance of Kappa	295
14 — 6	Inheritance of CO ₂ Sensitivity	298
14 — 7	Inheritance of Plastids	300
		301

Chapter 15: Mutations-Chromosomal and Genetic

15 — 1	Introduction	302-326
15 — 2	Chromosomal aberrations	302
15 — 3	Heteroploidy Aberrations	302
15 — 4	Euploid Aberrations	303
15 — 5	Anuploid Aberrations	303
15 — 6	Chromosomal Aberrations	

- 15 — 7 Gene Mutations
- 15 — 8 Molecular Basis of Gene Mutations
- 15 — 9 Mutagens

PART 3—ECOLOGY

Chapter 16 Ecology And Ecosystem

- 16 — 1: Introduction
- 16 — 2: Ecosystem
- 16 — 3: Some Features of Ecosystems
- 16 — 4: Components of an Ecosystem
- 16 — 5: Taxonomic Components and Ecological Niches
- 16 — 6: Diversity and Stability in the Ecosystem
- 16 — 7: Basic Types of Ecosystems
- 16 — 8: Guide Questions

Chapter 17 Energy Flow within An Ecosystem

- 17 — 1: Introduction
- 17 — 2: Food chains and Trophic levels
- 17 — 3: Transformation of Energy by Autotrophs
- 17 — 4: Primary Productivity of Autotrophs
- 17 — 5: Methods of Measuring of Primary Production
- 17 — 6: Photosynthesis and its kind
- 17 — 7: Energy Beyond the producers
- 17 — 8: Energy Flow through Autotroph based Ecosystem
- 17 — 9: Energy Flow through Detritus Based Ecosystem

Chapter 18 Bio-geo-chemical Cycles

- 18 — 1: Introduction
- 18 — 2: Elements of Biogeochemical Cycle
- 18 — 3: Types of Biogeochemical Cycles
- 18 — 4: Nitrogen Cycle
- 18 — 5: Nitrogen Budget
- 18 — 6: Sedimentary Nutrient Cycles
- 18 — 7: Phosphorous Cycle
- 18 — 8: Sulfur Cycle
- 18 — 9: Air Pollution
- 18 — 10: Nutrients Cycling in Tropical and Temperate Soils
- 18 — 11: Biological Magnification
- 18 — 12: Limiting Factors
- 18 — 13: Temperature as Limiting Factor

Chapter 19 Major Ecosystems of the world

- 19 — 1: Introduction
- 19 — 2: Terrestrial Ecosystems
- 19 — 3: Tundra Biomes to Ponds Ecosystem

Chapter 20 Population Ecology

- 20 — 1: Introduction
- 20 — 2: Intra specific Interaction
- 20 — 3: Inter specific Interaction
- 20 — 4: Competition
- 20 — 5: Regulation of Population Size

PART — 4

REVISED SYLLABUS

Chapter 21: DNA — The Genetic Material	407-412
Transforming Experiment	409
Hershey and Chase Experiment	410
RNA and Genetic Material	412
Chapter 22: Transfer of Genetic Material in Bacteria and Viruses	414-425
Transformation	414
Sexual Conjugation	416
Transduction	419
Chapter 23: Sex Determination in Diploids	425-433
Chromosomal System for Sex Determination	426
Sex Determination in Humans	427
Sex Determination in Drosophilla	429
Other Factors Influencing Sex Determination	430
Meiotic Behaviour of Sex Chromosomes	432
Chapter 24: Sex Linkage	435-441
White Eye Colour in Drosophilla	435
Sex-Liked Inheritance in Humans — Hemophilia	437
Chapter 25: Recombinant DNA Technology	443-465
Site Directed Mutagenesis	443
Genetic Engineering	446
Restriction Endonucleases	446
Plasmids	448
Vectors	450
Mechanism of Genetic Engineering	450
Applications of Genetic Engineering	455
Applications of Polymerase Reaction	461
Transgenic Organisms	462
Transgenic Animals	463
Transgenic Plants	464
Chapter 26: Environmental Pollution	467-485
✓ Air Pollution	468
✓ Water Pollution	472
✓ Radiation	476
Thermal Pollution	479
Pesticides	479
Noise Pollution	482
Control of Environmental Pollution	483
Chapter 27: Energy Sources & Energy Crisis	487-492
Non-renewable Energy Resources	487
Renewable Energy Resources	487
Energy Crisis	490
Conservation and Resources Management	491
Chapter 28: Major Ecosystems of Pakistan	493-508
Ecoregions of Pakistan	494
Wildlife of Pakistan	497
Major Ecosystems of Pakistan	498
Glossary	509-524
