

CELL BIOLOGY

SIXTH EDITION

DeROBERTIS

Summary: Enzymes in the Cell.....	
Bioenergetics	
Concept of Entropy	
Cell Metabolism	
Energy Cycle	
Energy Transformation	
Cell Respiration	73
Anaerobic Glycolysis	73
Aerobic Respiration	73
The Krebs Cycle	73
Respiratory Chain	73
Oxidative Phosphorylation	75
Summary: Bioenergetics and Cell Respiration.....	76
References	77
Additional Reading	77

Part Three METHODS FOR THE STUDY OF THE CELL

Chapter Five INSTRUMENTAL ANALYSIS OF BIOLOGICAL STRUCTURES..... 81

Resolving Power of the Microscope.....	81
Methods for Increasing Contrast	82
Phase Microscopy	82
Interference Microscopy	85
Darkfield Microscopy	86
Polarization Microscopy	86
Electron Microscopy	88
X-ray Diffraction	94
Summary: Microscopy	97
References	99
Additional Reading	99

Chapter Six METHODS FOR CYTOLOGIC AND CYTOCHEMICAL ANALYSIS 101

Examination of Living Cells	101
Fixation	103
Embedding and Sectioning	105
Cytologic Staining	105
Summary: Observation of Living and Fixed Cells	108
Histochemistry and Cytochemistry	109
Cell Fractionation Methods	109
Zonal Centrifugation	112
Microchem try and Ultramicrochemistry	112
Cytochemical and Histochemical Staining Methods	113
Histochemical Methods Based on Physical Determinations	119

CONTENTS

Summary: Elementary Units	133
References	133
Additional Reading	139

Part Four UNITS OF STRUCTURE AND THE PLASMA MEMBRANE

Chapter Seven	
ELEMENTARY UNITS OF STRUCTURE IN BIOLOGICAL SYSTEMS	133
Elementary Structures and Their Function	133
Principles in the Assembly of Macromolecules	134
Summary: Assembly of Macromolecules	137
Elementary Membranous Structures	139
Summary: Artificial Membrane Systems	143
References	143
Additional Reading	144
 Chapter Eight	
THE PLASMA MEMBRANE	145
Isolation of the Plasma Membranes	145
Chemical Composition	149
Summary: Chemistry of the Plasma Membrane	149
Structure of the Plasma Membrane	151
Summary: Structure of the Plasma Membrane	156
The Fluid Mosaic Model of Membrane Structure	158
Summary: The "Fluid Mosaic" Model	158
Differentiations at the Cell Surface	164
Coats of the Cell Membrane	164
Glycocalyx	166
Summary: The Cell Surface	166
References	168
Additional Reading	168

Part Five THE CYTOPLASM AND CYTOPLASMIC ORGANELLES

Chapter Nine	
THE CYTOPLASM AND VACUOLAR SYSTEM	171
Cytoplasmic Matrix	171
Properties of the Cytoplasmic Matrix	173
Summary: Cytoplasmic Matrix	175
Cytoplasmic Vacuolar System	176
General Morphology of the Vacuolar System	176

CONTENTS

Summary: Cytoplasmic Vacuolar System.....	181
Fractionation of the Vacuolar System.....	181
Summary: Microsomal Fraction.....	185
Summary: Endoplasmic Reticulum.....	188
Golgi Complex.....	188
Isolation of the Golgi Complex.....	193
Summary: Isolation of the Golgi Complex.....	197
References.....	198
Additional Reading.....	199
 Chapter Ten	200
MITOCHONDRIA	
Morphology.....	200
Distribution.....	201
Summary: Nature of Mitochondria.....	203
Structure.....	203
Summary: Structure of Mitochondria.....	210
Isolation of Mitochondria and Mitochondrial Membranes.....	210
Summary: Isolation of Mitochondria.....	214
Molecular Structure and Function.....	214
Summary: Energy Transduction in Mitochondria.....	218
Permeability of Mitochondria.....	219
Summary: Other Functions of Mitochondria.....	223
Mitochondria as Semiautonomous Organelles.....	224
References.....	228
Additional Reading.....	229
 Chapter Eleven	231
THE PLANT CELL AND THE CHLOROPLAST	
Characteristics of Plant Cells.....	231
Summary: Characteristics of Plant Cells.....	237
Plastids.....	237
Chloroplasts.....	238
Summary: Plastids.....	243
Photosynthesis.....	244
Summary: Photosynthesis and the Chloroplast.....	250
References.....	252
Additional Reading.....	254

18-5-57
Dear Sir,
I have the pleasure to inform you that
the order for 1000 copies of the
book has been placed with the printer.

The book is expected to be ready
for delivery by the end of the month.
I am sure you will find it of
great interest and value.
Yours faithfully,
[Signature]

I am sure you will find it of
great interest and value.
Yours faithfully,
[Signature]

I am sure you will find it of
great interest and value.

I am sure you will find it of
great interest and value.
Yours faithfully,
[Signature]

CONTENTS

Chapter Sixteen

SEX DETERMINATION AND HUMAN CYTOGENETICS

Sex Determination	342
Sex-linked Inheritance	343
Summary: Cytogenetics of Sex Determination	344
Human Cytogenetics	345
The Normal Human Karyotype	347
Abnormal Human Karyotypes	351
Summary: Aberrations of Human Chromosomes	352
References	352
Additional Reading	352

Part Seven

MOLECULAR BIOLOGY

Chapter Seventeen

CYTOCHEMISTRY OF THE NUCLEUS, THE CELL CYCLE, AND DNA DUPLICATION

	358
Cytochemistry of the Nucleus	360
DNA Content of the Nucleus	360
Summary: Chemistry of the Nucleus	364
DNA and the Cell Cycle	365
RNA Synthesis and the Cell Cycle	377
Protein Synthesis and the Cell Cycle	378
Summary: The Cell Cycle	379
References	382
Additional Reading	383

Chapter Eighteen

RIBOSOMES: STRUCTURE AND BIOGENESIS

	384
Chemical Composition	387
Summary: Structure and Composition of Ribosomes	389
Biogenesis of Ribosomes	391
Summary: Biogenesis of Ribosomes	401
References	402
Additional Reading	403

Chapter Nineteen

PROTEIN SYNTHESIS AND MOLECULAR GENETICS

	404
The Genetic Code	409
Summary: Molecular Genetics	411
Transcription of Genetic Information	412
Messenger RNA	412

Summary: Transcription	422
Nucleosides and Nucleic Acid Synthesis	422
Summary: Protein Synthesis	431
Genetic Regulation	432
Summary: Genetic Regulation	437
References	438
Additional Reading	439

Chapter Twenty

CELL DIFFERENTIATION AND CELLULAR INTERACTION 441

Nucleocytoplasmic Interrelations in Protozoa	442
Mitotic Events in Amphibian Eggs	443
Mechanisms of Gene Expression	445
Summary: Cell Differentiation	447
Gene Regulation in Eukaryotes	448
Summary: Regulation of Genetic Information	455
Renewal of Cell Populations	457
Cellular Interaction	458
Summary: Intercellular Interactions	462
References	463
Additional Reading	464

Part Eight CELL PHYSIOLOGY

Chapter Twenty-one

CELL PERMEABILITY, ENDOCYTOSIS, LYSOSOMES, AND PEROXISOMES 471

Diffusion or Passive Permeability	472
Cell Permeability and Active Transport	474
Summary: Cell Permeability and Active Transport	479
Endocytosis	481
Pinocytosis	482
The Lysosome	485
Peroxisomes and Oxyxysomes (Microbodies)	492
Summary: Endocytosis, Lysosomes, and Peroxisomes	493
References	494
Additional Reading	495

Chapter Twenty-two

PRIMITIVE CELL MOVEMENTS, CILIA, CENTRIOLES, MICROTUBULES, AND MICROFILAMENTS 497

Cilia and Ciliary Motion	497
Basal Bodies (Kinetosomes) and Centrioles	501
Origin of Cilia, Basal Bodies, and Centrioles	507

CONTENTS

Summary: Structure, Motion, and Origin of Cilia and Flagella	508
Microtubules	510
Summary: Properties of Microtubules	512
Cytoplasmic Streaming	513
Ameboid Motion	513
Microfilaments and Cell Motion	516
Summary: Cyclosis, Ameboid Motion, and Microfilaments	519
References	520
Additional Reading	521
 Chapter Twenty-three	
MOLECULAR BIOLOGY OF MUSCLE	523
Biochemistry of Muscle	529
The Sliding Theory of Muscle Contraction	531
Sarcoplasmic Reticulum	534
Summary: Molecular Biology of Muscle	537
References	539
Additional Reading	540
 Chapter Twenty-four	
CELLULAR AND MOLECULAR NEUROBIOLOGY	541
General Organization of a Neuron	542
Summary: General Organization of the Neuron	551
Synaptic Transmission	553
Molecular Biology of Receptors	564
Summary: Synaptic Transmission	569
References	571
Additional Reading	573
 Chapter Twenty-five	
CELL SECRETION	575
Summary: Secretion; Methods of Study	576
Morphology of the Secretory Cycle	577
Summary: Morphology of the Secretory Cycle	583
Cytochemistry of the Secretory Cycle	584
Summary: Cytochemistry of the Secretory Cycle	589
References	592
Additional Reading	592
 INDEX	595
