CONTENTS

PART I

CELL BIOLOGY

* 1.	✓ FUNCTIONAL ANATOMY OF THE CELL	1
	✓ Prokaryotes	1
	✓ Eukaryotes	3
	✓ Structure of typical cell	3
	✓ Plasma membrane	5
	Cytoplasm	11
	✓ Endoplasmic reticulum	11
	✓ Golgi complex	13
	✓ <u>Lysosomes</u>	15
	✓ <u>Peroxisomes</u>	17
	✓ Mitochondria	18
	Cytoskeleton	18
	✓ Ribosomes	23
	✓ Chloroplast	25
	✓ Nucleus	25
	Important Questions	26
2.	HIGH ENERGY PHOSPHATE COMPOUNDS	27
	Classification of High-energy Phosphates	27
	Properties of High-energy Phosphates	28
	Adenosine triphosphate	29
	Interrelationships between High-energy compounds	32
	Important Questions	33
3.*	THE NUCLEUS AND THE STORAGE AND TRANSMISSION OF INFORMATION	35
	✓ Nucleus and Nucleic acid	35
	✓ The organic chemistry of nucleic acids	35
	✓ Indications of biological functions	38
	Structure of DNA	39
	Replication of DNA	42
	Chromosome Duplication	45
	RNA	48
	Types of RNA	49

	Important Questions.....	52
4.	PHYSICAL STRUCTURE AND CHEMICAL COMPOSITION OF	
	CELLULAR COMPONENTS	53
	* PROTEINS	
	Purification of proteins	53
	The size and shape of protein molecules.....	54
	Amino acids	56
	Isolation of Amino acids	59
	Primary structure of Proteins.....	62
	Secondary structure of Proteins.....	62
	Tertiary structure of Proteins.....	67
	Quaternary structure of Proteins.....	69
	Interactions of R groups	70
	Biological roles of Proteins	72
	* CARBOHYDRATES	73
	Monosaccharides	73
	Oligosaccharides.....	81
	Polysaccharides	82
	* LIPIDS	85
	Simple lipids.....	85
	Acylglycerols.....	87
	Waxes	88
	Compound lipids	88
	Phospholipids	89
	Sphingolipids	90
	Steroids and terpenes.....	90
	Glycolipids	93
	Lipoproteins	93
	Carotenoids.....	93
	Important Questions.....	95
5.	* ENZYME CATALYSIS	97
	Enzymes as specific biological catalysts	97
	Enzyme Assay	99
	The protein nature of enzymes	100
	Enzyme activation.....	101
	Enzyme substrate complex.....	102
	Specificity of enzyme action	104
	Enzyme inhibition.....	106
	Mechanism of enzyme action	110
	Important Questions.....	116

	Important Questions.....	52
4..	PHYSICAL STRUCTURE AND CHEMICAL COMPOSITION OF	53
	CELLULAR COMPONENTS	
	* PROTEINS	53
	Purification of proteins	54
	The size and shape of protein molecules.....	56
	Amino acids	59
	Isolation of Amino acids	62
	Primary structure of Proteins.....	62
	Secondary structure of Proteins.....	67
	Tertiary structure of Proteins.....	69
	Quaternary structure of Proteins.....	70
	Interactions of R groups	72
	Biological roles of Proteins	73
	CARBOHYDRATES	73
	Monosaccharides	81
	Oligosaccharides.....	82
	Polysaccharides	85
	* LIPIDS	85
	Simple lipids.....	87
	Acylglycerols.....	88
	Waxes	88
	Compound lipids	89
	Phospholipids	90
	Sphingolipids	90
	Steroids and terpenes.....	93
	Glycolipids	93
	Lipoproteins	93
	Carotenoids.....	95
	Important Questions.....	97
5.	* ENZYME CATALYSIS	97
	Enzymes as specific biological catalysts	99
	Enzyme Assay	100
	The protein nature of enzymes	101
	Enzyme activation.....	102
	Enzyme substrate complex.....	104
	Specificity of enzyme action	106
	Enzyme inhibition.....	110
	Mechanism of enzyme action	116
	Important Questions.....	

6.	✓ METABOLIC PATHWAYS	117
	Carbohydrate metabolism	117
	Fate of glucose-6-phosphate in the liver cell	118
	Pentose phosphate pathways	119
	*✓ The Krebs cycle	121
	✓ Fatty acid metabolism :..... <i>Fatty acid oxidation</i>	125
	✓ Amino acid metabolism	129
	Important Questions	135
7.	THE MITOCHONDRION AND THE FIXATION OF ENERGY	137
	Mitochondria: History & Description	137
	History	137
	Description	138
	Mitochondria as energy converters	141
	✓ Electron transport chain	142
	Oxidative phosphorylation	145
	Substrate phosphorylation	145
	Coupled phosphorylation	145
	Kinetics of electron transport and ATP formation	146
	Determination of sites of ATP synthesis	146
	Concepts of coupled phosphorylation	147
	Efficiency of phosphorylation as an energy transducer	148
	Important Questions	150
8.	GENETIC CODE AND PROTEIN SYNTHESIS	151
	The Genetic code	151
	Protein synthesis	156
	The Assignment of codons	160
	The colinearity and universality of the code	162
	Important Questions	163
9.	THE GROUND SUBSTANCE AND THE CONVERSION OF CHEMICAL ENERGY INTO WORK	165
	Macromolecular components	165
	Energetics	166
	Postulated chemical mechanism :	167
	Energy supply: Glycolysis	168
	Muscle mitochondria	171
	Gross mechanics	171
	Types of muscles	171
	Structure of striated muscle	173
	Mechanism of muscle contraction	175
	Important Questions	177

PART II GENETICS

1.	CHROMOSOME DUPLICATION AND DIVISION	181
	Mitosis	181
	Meiosis	185
	Similarities & differences between mitosis and meiosis	190
	Mitotic & meiotic duplication of chromosomes and chromosomal DNA	191
	Life cycles	193
	✓ Life cycle of <i>Chlamydomonas</i>	193
	✓ Life cycle of <i>Neurospora</i>	195
	✓ Life cycle <i>Drosophila</i>	196
	Important Questions	197
* 2.	THE SEGREGATION OF GENES	199
	✓ Law of segregation	199
	✓ Tetrad analysis	200
	✓ Replica plating	200
	✓ Segregation - Strand analysis	202
	Segregation and Brachydactyly	206
	✓ Incomplete dominance	207
	✓ Test cross	209
	Stages of meiosis at which segregation occurs	210
	Multiple alleles	211
	Problems	215
	Important Questions	221
3.	LAW OF INDEPENDENT ASSORTMENT	223
	Law of Independent assortment	223
	Independent assortment - Tetrad analysis	224
	Strand analysis	227
	Chi square test	228
	Problems	232
	Important Questions	246
4.	THE LINKAGE AND RECOMBINATION OF GENES	247
	Linkage	247
	Linkage and recombination in <i>Chlamydomonas</i>	248
	Linkage and recombination in <i>Drosophila</i>	251
	Linkage groups	253
	✓ Genetic and cytological proof of crossing over	253
	Genetic map	255
	Construction of genetic map	255

	Interference and coincidence.....	262
	The gene as a unit of recombination	263
	Problems.....	263
	Important Questions.....	277
5.	SEX LINKED INHERITANCE	279
	Sex determination in <i>Drosophila</i> & man	279
	The inheritance of X chromosome in <i>Drosophila</i>	280
	Inheritance of white eye colour ...in <i>Drosophila</i>	280
	Inheritance of bar eye.....	283
	Significant features of sex-linked inheritance	283
	Exceptional case of sex-linked inheritance in <i>Drosophila</i>	284
	Haemophilia	285
	Problems.....	286
	Important questions	289
6.	THE CYTOPLASM IN HEREDITY	291
	The maternal effect	291
	Pigmentation in moth <i>Ephesia</i>	291
	Coiling of shell of <i>Limnaea</i>	293
	Extranuclear inheritance	293
	Sigma particles in <i>Drosophila</i>	294
	Kappa particles in <i>Paramecium</i>	294
	Inheritance of chloroplasts in plants	297
	Important Questions.....	299
7.	THE NUCLEIC ACIDS AS THE GENETIC MATERIAL	301
	Transforming principle	301
	Bacteriophages	304
	RNA as genetic material	306
	Features of genetic material	306
	Important questions	307
8.	THE TRANSMISSION OF THE GENETIC MATERIAL IN BACTERIA AND BACTERIAL VIRUSES	309
	Conjugation and gene recombination in <i>E. coli</i>(sup)	309
	Transduction.....in <i>Bacillus</i>	316
	Genetic recombination in bacteriophage	321
	Bacterial transformation.....	324
	Important questions	326
9.	MUTATION	329
	Mutation	329
	Chromosomal aberrations	329
	Gene mutation.....	333

	A molecular interpretation of the mutation process.....	33
	Hydroxylamine.....	34
	Base analogues.....	34
	Important Questions.....	34
10.	GENE REGULATION	34
	Enzyme induction.....	34
	The genetics of regulation.....	34
	Enzyme repression	35
	Feedback inhibition	35
	The significance of gene regulation	35
	Important questions	35
11.	GENETIC ENGINEERING	355
	Procedure	355
	Application of genetic engineering	358
	Important questions	360

PART III ECOLOGY

1.	THE ECOSYSTEM	363
	Ecology and Ecosystem	363
	Ecology and other branches of Biology	363
	Ecosystem	365
	Biosphere.....	365
	Autoecology and synecology.....	366
	Basic kinds of Ecosystems.....	366
	The component parts of an ecosystem.....	370
	Biotic components	370
	Abiotic components	373
	The meadow and the pond as ecosystems	375
	Pond as an ecosystem.....	377
	Components of Pond ecosystem.....	380
	Biotic components	381
	Tracers as aids in assessing function	383
	The tropical reef: A complex ecosystem.....	383
	The city as an ecosystem	384
	Taxonomic components in the ecosystem; The ecological niche.....	388
	Diversity and stability in the ecosystem.....	389
	Diversity indices	393
	Important Questions.....	394
2.	ENERGY FLOW WITHIN THE ECOSYSTEM	395

IX

	Materials and one way flow of energy.....	395
	The solar radiation environment.....	396
	Food chains and trophic levels.....	398
	The relationship between energy flow and the standing crop	401
	Grazing and detritus food chains:	
	The Y-shaped energy-flow model.....	402
	The area-based chlorophyll model	406
	Important Questions.....	410
3.	BIOGEOCHEMICAL CYCLES.....	411
	Nutrients, nonessential elements and poisons	411
	Types of biogeochemical cycles.....	412
	The sulfur cycle in aquatic environments.....	413
	The nitrogen cycle	414
	Phosphorus cycle	416
	Air pollution and the sulfur & nitrogen cycles	418
	Biological magnification	419
	Nutrient cycling in the tropics.....	420
	Ecological indicators.....	422
	Important Questions.....	422
4.	MAJOR ECOSYSTEMS OF THE WORLD.....	423
	The sea	423
	Estuaries and seashores	425
	Streams and rivers.....	427
	Lakes and Ponds.....	428
	The biomes	432
	Desert ecosystem	434
	The tundra	436
	The grassland ecosystem.....	437
	Temperate grassland	437
	Tropical grassland or Savana ecosystem	438
	Forest ecosystems.....	438
	Tropical rain forest.....	438
	Temperate deciduous forest.....	439
	Coniferous alpine and boreal forest	440
	Important Questions.....	441
5.	POPULATION ECOLOGY.....	443
	Population attributes	443
	Population growth form	444
	Competition	448
	Competitive exclusion versus coexistence	450

	Predation	45
	Parasitism	45
	Positive interactions	45
	Nutrient cycling and energy flow at the population level ..	46
	Mathematical models of populations	46
	Human population growth	46
	Important questions	46
6.	POLLUTION	46
	Origin of pollution	46
	Pollutants: The creators of pollution	46
	Types of pollution	46
	Air pollution	47
	Water pollution	48
	Land pollution	48
	Radioactive pollution	48
	Noise pollution	48
	Important questions	48
7.	ENERGY RESOURCES AND ENERGY CRISIS	48
	Degradation of environmental quality	48
	Renewable and non-renewable resources	48
	Energy resources	48
	Fossil fuels	48
	Nuclear energy	48
	Hydro-electric power	49
	Geothermal energy	49
	Wind energy	49
	Solid wastes	49
	Ocean-thermal gradients	49
	Tidal power	49
	Energy crisis	49
	Energy conservation	49
	Important questions	49
