

Biology

MADE SIMPLE

ETHEL R. HANAUER, M.A.
advisory editor
SUSAN BARNETT, B.Sc. (Hons.)

Table of Contents

1	BIOLOGY—ITS SCOPE AND METHOD	1
2	THE NATURE OF LIFE	5
	Differences Between Living and Non-Living	6
	Do Plants Differ From Animals?	7
	Brief History of Cells	8
	Cell Structure	9
	Food-Getting	13
	Digestion	15
	Absorption	16
	Transport	16
	Assimilation	17
	Respiration	17
	Excretion	19
	Growth and Reproduction	19
	Motion and Locomotion	20
	Sensitivity and Behaviour	20
3	THE ROLE OF ENVIRONMENT	22
	Environment	22
	Habitat	22
	Climate Conditions	24
	Natural Barriers	24
	Community Living	24
	Protective Adaptations	25
	Plant and Animal Interdependence	29
	Symbiosis	29
	Parasitism	30
	Saprophytes and Scavengers	32
4	ORGANIZATION AND CLASSIFICATION	34
	Single-Celled Life: Plants	34
	Single-Celled Life: Animals	36
	Cellular Organization	40
5	CYCLES OF LIFE	49
	Matter	49
	Elements, Mixtures and Compounds	49
	Diffusion and Osmosis	51
	Oxidation and Energy	53
	Water Cycle	55

Oxygen-Carbon Cycle
Nitrogen Cycle
Balance in Nature

6 THE PLANT KINGDOM: NON-FLOWERING PLANTS

- Characteristics and Distribution of Algae
- ✓ Types of Algae
- Mosses and Liverworts
- ✓ Ferns
- ✓ Fungi
- ✓ Bacteria
- Useful Bacteria
- Harmful Bacteria
- ✓ Yeast
- ✓ Rusts and Smuts
- Moulds and Mildews
- Antibiotics: The Wonder Drugs
- ✓ Mushrooms

7 SEED-BEARERS

- Conifers
- Flowering Plants
- Roots
- Modified Roots
- Stems
- Modified Stems
- Leaves
- Modified Leaves
- The Leaf as a Food Factory
- Home Experiments
- Leaf Fall
- The Flower
- The Fruit and Seed

8 THE ANIMAL KINGDOM: THE INVERTEBRATES

- Invertebrates: Protozoa
- Jellyfish and Related Animals
- Coral
- Flatworms
- Roundworms
- True Segmented Worms
- Snails and Their Relatives
- The Arthropods (Jointed Legs)
- Lobsters, Crabs and Their Relatives (Crustaceans)
- Centipedes and Millipedes
- Spiders (Arachnids)
- Insects
- Life Cycles and Metamorphosis of Insects
- Social Insects

Natural Body Protection Against Bacterial Invasion
Natural and Acquired Immunity
The Virus
Parasitic Diseases
Chemotherapy
Diseases—A Social Problem

14 REPRODUCTION

Spontaneous Generation
Asexual Reproduction
Vegetative Propagation
Primitive Sexual Reproduction
Sexual Reproduction—The Flowering Plant
Sexual Reproduction—Vertebrate Animals
Mitosis
Reduction Division
The Human Embryo

15 GENETICS: HEREDITY

Variations Within a Species
Gene Theory of Hereditary Characteristics
Mendel and the Laws of Heredity
Mendel's Experiments
Blending or Incomplete Dominance
Sex Determination
Linkage
Heredity versus Environment
Mutations
Practical Application of Genetics
Induced Mutations
Plant and Animal Breeding
Eugenics
Human Hereditary Traits
Multiple Births

16 EVOLUTION: THE NATURE OF CHANGE

History of the Earth
Theory of Earth's Formation
Changes in the Earth's Surface
Evolution of Life—To the Modern Era
Evidence of Evolution
Theories of Evolution
The Evolution of Man
From Prehistoric to Modern Man
Races of Man

17 CONSERVATION

Balance in Nature
Conservation of Forests
Conservation of Wildlife

Table of Contents

Conservation of Soil	293
Scientific Farming	295
APPENDIX A: CLASSIFICATION OF THE ANIMAL AND PLANT KINGDOMS	296
APPENDIX B: CONCISE GLOSSARY OF BIOLOGICAL TERMS	301
ANSWERS TO EXERCISES	311
INDEX	315
