PREFACE FOR FIRST EDITION

The government of Pakistan authorized the HEC (Higher Education Commission) to design new syllabi for B.Sc. The HEC entirely changed in the syllabi of Botany, Zoology and Chemistry. Opinion does not differ on the point that it is a marvelous effort. These syllabi provide to new out look to the students. But this innovation brings with it a new problem. The students have to face the chronic problem of insufficient and improper literature. Most of the books recommended in the syllabi are not available in Pakistan. If available, they are beyond the perception of our students. Some of the local books are available but they are direct copy of these foreign books and are of no use for our students. It created a wide space for concise, precise and most objective books.

Master Success Text book of Botany is one of the efforts. This series is composed of four books for all the papers. Paper D and A are already in market. It has earned invaluable reputc and enforced us to complete the series as early as possible. This book includes Plant Taxonomy (Systematic) and Anatomy: It has following important features:

1. The book is written strictly in accordance with the syllabus of Higher Education Commission (For all other university).
2. The book is written to the point. Irrelevant material is avoided.
3. The topics are expressed in really simple language.
4. Well illustrated diagrams are given.

We do hope that this effort will bear fruit. We hope that this effort will be well taken by teachers and student. We encourage criticism. Please don hesitate to write us, email us or ring us if you feel any difficulty in this book.

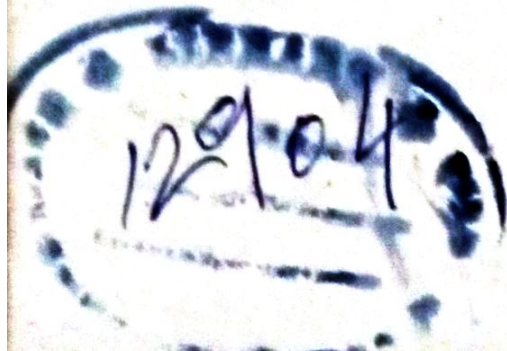

July, 2006

Plant Taxonomy (Systematics)

	Chapter	Page
	Introduction to Plant Systematics ✓	8
	Classification	12
	Nomenclature ✓	28
	Morphology and Phytography: Morphological characters of root, stem, leaves, inflorescence, flower, placentation, and fruit types	35
	Angiospermic Families: 1. Ranunculaceae 2. Brassicaceae (Cruciferae) ✓ 3. Fabaceae (Leguminosae): ✓ 4. Rosaceae 5. Euphorbiaceae 6. Rutaceae 7. Moraceae 8. Chenopodiaceae 9. Cucurbitaceae 10. Solanaceae 11. Lamiaceae (Labiatae) 12. Asteraceae (Compositae) 13. Liliaceae 14. Poaceae (Gramineae)	126

Plant Anatomy and Development

	Chapter	Page
	Cell wall	186
	Tissues and tissue system	201
	Structure of plant parts Root, stem, leaves and meristem, Secondary growth Characteristics of wood (for B.S.)	226
	Embryology (Early development) Capsella bursa-pastoris, Structure and development Parthenocarpy Polyembryony	269
	Appendix Family Apiaceae (Umbelliferae) for B.S. Takhtajan Classification System for B.S.	297 300
