

BOTANY

AN INTRODUCTION
TO PLANT BIOLOGY

SIXTH EDITION

T. ELLIOT WEIER
C. RALPH STOCKING

MICHAEL G. BARBOUR
THOMAS L. ROST

1	Introduction	1
2	Classification—The Relationship of Plants	6
3	The Plant Body of Seed Plants	26
4	The Metabolic Plant Cell	32
5	Chemistry and Physiology of the Cell	60
6	The Cell Cycle	84
7	Cell Types, Tissues, and Primary Growth in Stems	110
8	Secondary Growth in Stems and Stem Modifications	136
9	Roots	158
10	Leaves	178
11	Soil and Mineral Nutrition	200
12	Transpiration, Conduction, and Absorption	214
13	Photosynthesis	232
14	Respiration	254
15	The Flower and the Flowering Plant Life Cycle	268
16	The Fruit, the Seed, and Germination	302
17	Meiosis and Basic Genetics	326
18	Plant Ecology	346
19	Principles of Plant Taxonomy	374
20	Plant Growth and Development	388
21	Prokaryotes	418
22	Viruses	442
23	Algae: Morphological Diversity	456
24	Algae: Reproduction	484
25	Myxomycota and Oomycota	498
26	Eumycota	512

27	Bryophyta	550
28	Lower Vascular Plants	572
29	Gymnosperms	598
30	Angiosperms	622
31	Evolution	644
	Glossary	669
	Table of Metric Equivalents	701
	Subject Index	702
	Index to Genera	715
