THOMAS L. ROST
GARY J. BRECKON

CONTENTS

1. The vegetative body of the flowering plant	1	17. Photosynthesis	85
2. Use of the light microscope	7	18. Respiration	93
3. Structure and function of the cell	11	19. The flower	97
4. Primary meristems and the shoot apex	21	20. Fruit structure	99
5. Cell types and tissues	25	21. Seeds and seedlings	105
6. Primary tissues in stems, and the initiation of secondary growth	31	22. Regulation of growth	109
7. Buds and the external morphology of woody stems	35	23. The plant kingdom	117
8. Secondary tissues in woody stems	37	24. Meiosis	123
9. Morphology and anatomy of roots	43	25. Prokaryotes: bacteria and blue-green algae	127
10. External morphology of leaves	49	26. Chlorophyta: green algae and stoneworts	135
11. Leaf and twig key to some of the more common genera of trees of the United States	55	27. Bacillariophyta and Pyrrhophyta: diatoms and dinoflagellates	141
12. Leaf anatomy	61	28. Xanthophyta and Euglenophyta: yellow-green algae and euglenoids	145
13. Transport and pressure in cells	65	29. Phaeophyta: brown algae	149
14. Soils and root function	71	30. Rhodophyta: red algae	153
15. Transpiration and xylem function	75	31. Keys to selected algal groups	155
16. Enzyme action	81	32. Myxomycota: slime molds	163
		33. Water molds and related fungi	165
		34. Eumycota: zygomycete fungi	169

|--|-----|---|-----|
| 35. Eumycota: sac fungi
(ascomycetes) | 173 | 45. Gymnosperms: Coniferophyta | 215 |
| 36. Eumycota: club fungi
(basidiomycetes) | 177 | 46. Gymnosperms: Cycadophyta,
Ginkgophyta, and Gnetophyta | 221 |
| 37. Imperfect fungi | 181 | 47. Anthophyta: life cycle | 231 |
| 38. Symbioses involving fungi; lichens
and mycorrhizae | 183 | 48. Anthophyta: variations in
floral structure | 237 |
| 39. Bryophyta: liverworts, hornworts
and mosses | 187 | 49. Anthophyta: the composite
inflorescence and flower | 243 |
| 40. Psilophyta | 193 | 50. Anthophyta: the grass
inflorescence and flower | 245 |
| 41. Lycophyta: club mosses | 197 | 51. A key to selected families of
Anthophyta of the United
States | 247 |
| 42. Sphenophyta: horsetails | 203 | 52. Pollination syndromes of
Anthophyta families | 253 |
| 43. Pterophyta: ferns | 207 | 53. Genetics | 259 |
| 44. Key to selected genera of Psilophyta,
Lycophyta, Sphenophyta, and
Pterophyta | 211 | | |
