

Seventh International Student Edition

# Biology of the Cell

An Evolutionary Approach  
DE WITT

# Contents

|                                                     |     |
|-----------------------------------------------------|-----|
| Chapter 1                                           |     |
| THE ORIGIN AND FUNCTION OF LIVING SYSTEMS .....     | 1   |
| Chapter 2                                           |     |
| ANCESTRAL ORGANISMS .....                           | 18  |
| Chapter 3                                           |     |
| LIFE AND THE FITNESS OF CHEMICAL ELEMENTS .....     | 39  |
| Chapter 4                                           |     |
| THE SPECIAL ROLES OF WATER AND CARBON DIOXIDE ..... | 63  |
| Chapter 5                                           |     |
| CELLULAR ENERGETICS .....                           | 83  |
| Chapter 6                                           |     |
| THE PRIMITIVE EARTH AND ITS ENVIRONMENT .....       | 113 |
| Chapter 7                                           |     |
| THE CHEMICAL NATURE OF BIOLOGICAL SYSTEMS .....     | 138 |
| Chapter 8                                           |     |
| PREBIOTIC SYNTHESIS OF ORGANIC COMPOUNDS .....      | 191 |
| Chapter 9                                           |     |
| FROM MOLECULES TO CELLS .....                       | 217 |

|                                                                  |     |
|------------------------------------------------------------------|-----|
| Chapter 10                                                       |     |
| THE STRUCTURE OF PROKARYOTIC CELLS .....                         | 234 |
| Chapter 11                                                       |     |
| THE STRUCTURE AND ORIGIN OF EUKARYOTIC CELLS .....               | 260 |
| Chapter 12                                                       |     |
| THE EVOLUTION OF CELLULAR METABOLISM .....                       | 317 |
| Chapter 13                                                       |     |
| THE METABOLISM OF ANAEROBIC HETEROTROPHS .....                   | 340 |
| Chapter 14                                                       |     |
| PHOTOSYNTHESIS AND THE BUILDUP OF OXYGEN IN THE ATMOSPHERE ..... | 358 |
| Chapter 15                                                       |     |
| AEROBIC METABOLISM .....                                         | 383 |
| Chapter 16                                                       |     |
| MEMBRANE STRUCTURE AND THE TRANSPORT OF MATERIALS .....          | 406 |
| Chapter 17                                                       |     |
| CELL DIVISION .....                                              | 443 |
| Chapter 18                                                       |     |
| THE GENETIC CODE: FUNCTION AND EVOLUTION .....                   | 498 |
| Chapter 19                                                       |     |
| EPILOGUE .....                                                   | 534 |
| Appendix I                                                       |     |
| MICROSCOPY .....                                                 | 535 |

**Contents**

**ix**

*Appendix II*

|                                       |     |
|---------------------------------------|-----|
| SOME PRACTICAL RULES OF BONDING ..... | 541 |
|---------------------------------------|-----|

*Appendix III*

|                    |     |
|--------------------|-----|
| THE PH SCALE ..... | 544 |
|--------------------|-----|

*Appendix IV*

|                                              |     |
|----------------------------------------------|-----|
| MECHANISMS OF OXIDATIVE PHOSPHORYLATION..... | 546 |
|----------------------------------------------|-----|

|             |     |
|-------------|-----|
| Index ..... | 553 |
|-------------|-----|
