Contents

- 1 ^{14}C Labeling and two-dimensional paper chromatography of plant metabolites, 1
James A. Bassham
- 2 Photosynthetic CO_2 incorporation in isolated spinach chloroplasts, 13
Martin Gibbs and J. Michael Robinson
- 3 Photoinduced electron transport and phosphorylation in chloroplasts, 21
Mordhay Avron
- 4 Partial reactions in photophosphorylation, 30
Andre T. Jagendorf
- 5 Biosynthesis of chlorophyll, 47
Lawrence Bogorad and Stephan Miller
- 6 Protein synthesis and nonribosomal amino acid incorporation into protein, 52
Alva A. App and C. O. Manahan
- 7 A statistical method for the collection of identical samples of plant leaves, 58
Hubert B. Vickery
- 8 The regulation of abscission, 65
A. Carl Leopold and B. W. Poovaiah
- 9 Senescence, 69
Leonard Beevers

10. Contents
11. Transmission of the floral stimulus by means of grafting in the
dandelion plant *Potentilla anserina*, 73
Jan A. W. Zeevalk
12. Photoperiodic induction of flower formation in Japanese morning
glory, *Pharbitis nil*, and movement of the floral stimulus, 79
Jan A. W. Zeevalk
13. Photochrome and photomorphogenesis, 82
Arthur W. Galston and Ruth C. Satter
14. Hormonal control of a secretory tissue, 96
Joseph E. Varner
15. Developmental patterns of gluconeogenic enzymes in fatty seed
storage tissues, 105
R. William Broderick
16. Tissue culture, 110
Julia Wang and Donald E. Armstrong
17. The respiration of plant storage organ tissue slices, 118
George C. Laffer
18. Plant mitochondria, 125
Walter D. Brown, Jr.
19. Determination of some characteristics of photorespiration in leaf
disks, 134
Israel Zelitch
20. Carbon 14 labeling of photosynthate as a means for studying
translocation, 138
Donald R. Geiger
21. Water relations of tissues and cells, 155
Jacob Levitt
22. Effect of biochemical inhibitors on stomatal opening, 161
Israel Zelitch
23. Plant water stress: its development and effects on physiology, 164
Merrill R. Kauffmann
24. Stress resistance, 174
Jacob Levitt
